

# System Requirements

- ❌ • The latest version of the Commerce Basic package. The package can be obtained through a VAR using the Acumatica portal, through an Account Manager by contacting the Acumatica Helpdesk, or through the Acumatica public site.
- Adobe Commerce 2.4.3 and above (for both Enterprise Edition (EE) and Community Edition (CE)).
- RabbitMQ, (required as a part of Acumatica-Magento Connector). For further information on Magento system requirements, please visit the [System Requirements](#) page of Adobe Commerce.
