

Category Schema in Acumatica

Like the Product Schema, the application allows you to customize the Category through the Category Schema. Category refers to the **item sales category**. Clicking on the Category Schema Acumatica will open the [Category Schema] screen including the option for **[Refresh Schema]** and **[Clear Schema]**. In the first place, the screen should appear blank. There will be two options.

- **Category Info**
- **Ecommerce Data**

See below:

The screenshot shows the Acumatica Category Schema interface. At the top, there are buttons for 'REFRESH SCHEMA' and 'CLEAR SCHEMA'. Below these are two tabs: 'CATEGORY INFO' and 'ECOMMERCE DATA', both of which are highlighted with a red box. Underneath the tabs is a table with the following data:

Active	Schema Name	Display Name
<input checked="" type="checkbox"/>	Category Info	Description
<input checked="" type="checkbox"/>	Category Info	Parent Category
<input checked="" type="checkbox"/>	Category Info	Category ID

A red arrow points to the table, and red text below it reads: **Item Sales Category and E commerce Data in Category Schema**

Options available under category schema
