Now you have sources in Magento, and you have Branches in Acumatica.

From the Configuration -> organization -> Branches you can see the details within Acumatica.

Branches in Acumatica

So, the data can be defined according to the Branches. When you are defining the branch-wise data and syncing it to Magento, you also need to keep the data similarly (Branch Wise).

Go to [Profiles] in Acumatica and click on Stock Item as shown below.

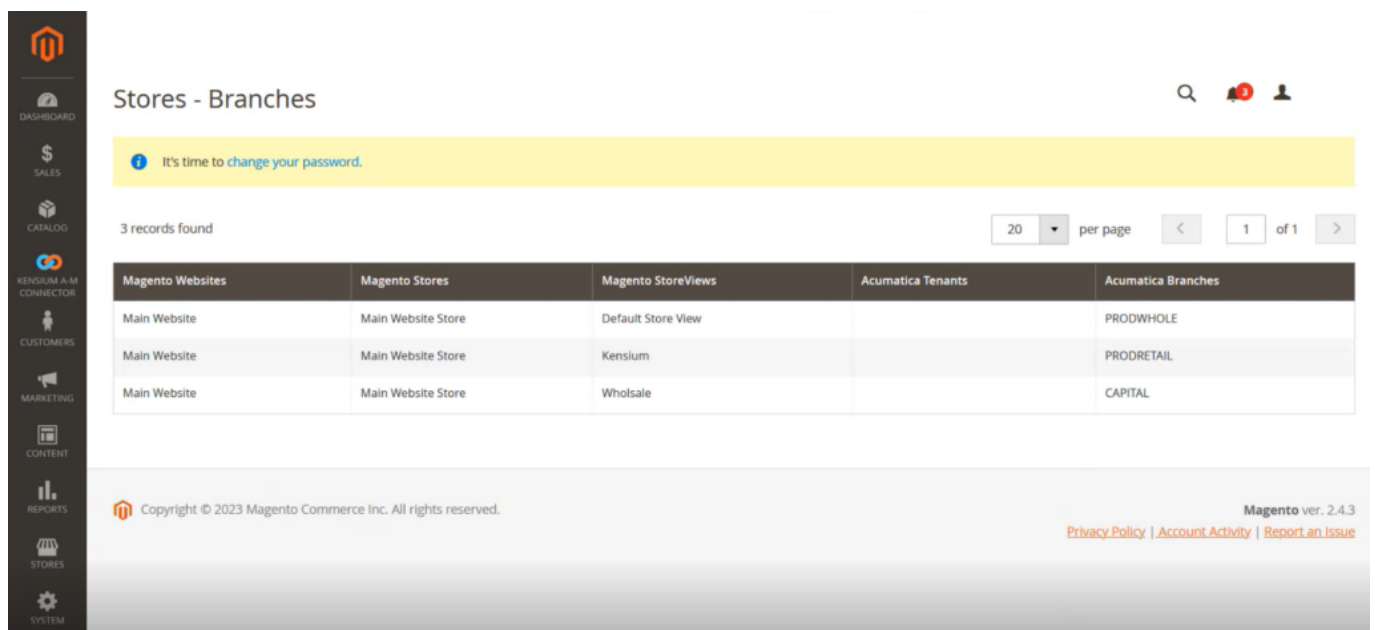

The following Product comes under the [Wholesale]. So, this product belongs to the respective branch. In other branches, the same product will not be available. Here we segregate the data where the product belongs.

You need to map these two. To map you need to go to the mapping screen. To map go to Magento Kensium A-M Connector and under Mapping click on Store-Branches as shown below.

Store-Branches under Mapping

Upon clicking on the Stores- Branches you will be redirected to the mapping screen as shown below.

Mapping Screen for Stores- Branches

In the above screenshot you can view each store of Magento is mapped with each Acumatica Branches.

To see the use of the mapping click on the Catalogue in Magento and from there click on the Products.

The screenshot shows the Magento Catalog interface. On the left, a sidebar menu is visible with the 'Catalog' section highlighted. The main content area displays a table mapping Magento Stores to Acumatica Branches.

Magento Stores	Magento StoreViews	Acumatica Tenants	Acumatica Branches
Main Website Store	Default Store View		PRODWHOLE
Main Website Store	Kensium		PRODRETAIL
Main Website Store	Wholesale		CAPITAL

The footer of the page indicates 'Magento ver. 2.4.3' and provides links for 'Privacy Policy', 'Account Activity', and 'Report an Issue'.

Products under Catalogue

From the Product Screen go to Products in Website.

Since all the products are added to the main website, the [Checkbox] for main Website is checked.

If you have multiple websites and if a product belongs to that website, it should be checked. If a product is available in all the stores you can check all the websites.
