Options available in the Customer Attribute Mapping

This includes the following options in the Customer Attribute Mapping screen.

- **Update Schema**
- **Recommended Customer Attribute Mapping**
- **Get New Attributes**
- **Map Attributes**

Update Schema:

The customer-selected fields in Acumatica will be synchronized within Magento once you click on [Update Schema]. Upon clicking on this a pop-up will appear and to update you need to click on [OK].

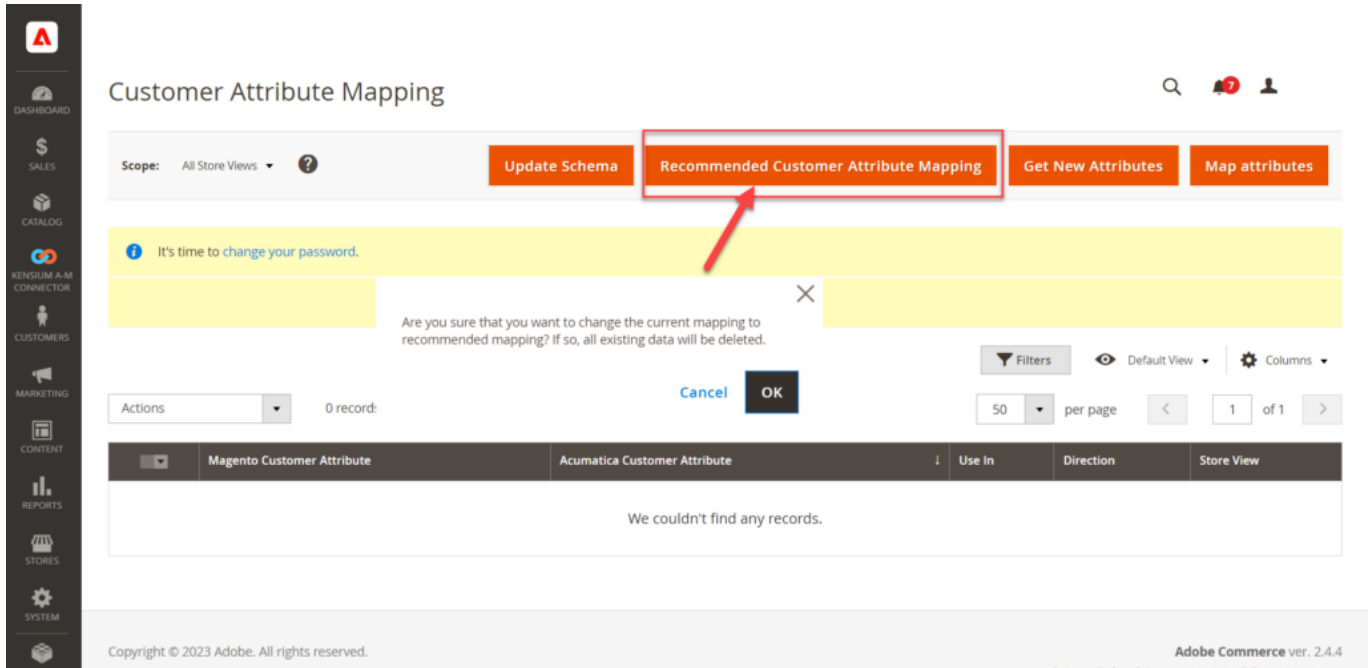

The screenshot shows the 'Customer Attribute Mapping' interface. At the top, there are navigation buttons: 'Update Schema', 'Recommended Customer Attribute Mapping', 'Get New Attributes', and 'Map attributes'. A red arrow points to the 'Update Schema' button. Below this, a yellow banner displays the message: 'It's time to change your password.' A confirmation dialog box is open, asking 'Are you sure that you want to update the schema?' with 'Cancel' and 'OK' buttons. The dialog is positioned over a table of attribute mappings.

Magento Customer Attribute	Account Name [GeneralInfo]	Direction	Store View	
<input type="checkbox"/> First Name [firstname]	Account Name [GeneralInfo]	Create/Update	Bi-Directional	All Store Views
<input type="checkbox"/> Last Name [lastname]	Account Name [GeneralInfo]	Create/Update	Bi-Directional	All Store Views
<input type="checkbox"/> Acumatica customer id [acu_customer_id]	Customer ID [GeneralInfo]	Create/Update	Bi-Directional	All Store Views
<input type="checkbox"/> Email [email]	Email [GeneralInfo]	Create/Update	Bi-Directional	All Store Views
<input type="checkbox"/> Pan Number [pannumber]	Pan Number [AttributeList]	Create/Update	Bi-Directional	All Store Views

Confirmation message upon clicking [Update Schema]

• **Recommended Customer Attribute Mapping:**

In the first place, the customer attribute mapping browse will be blank on your screen. To bring the default customer attribute you need to click on the [Recommended Customer Attribute Mapping]. A confirmation message will appear on the screen. Click on **[OK]** and the default attributes will appear on the screen.

Default values on recommended customer attribute mapping

- **Get New Attributes:**

Upon clicking the [Get New Attributes] a Grid Slider will open up and here you find the list of Acumatica Attributes which are not yet present in Magento. Provide a screenshot of the Grid.

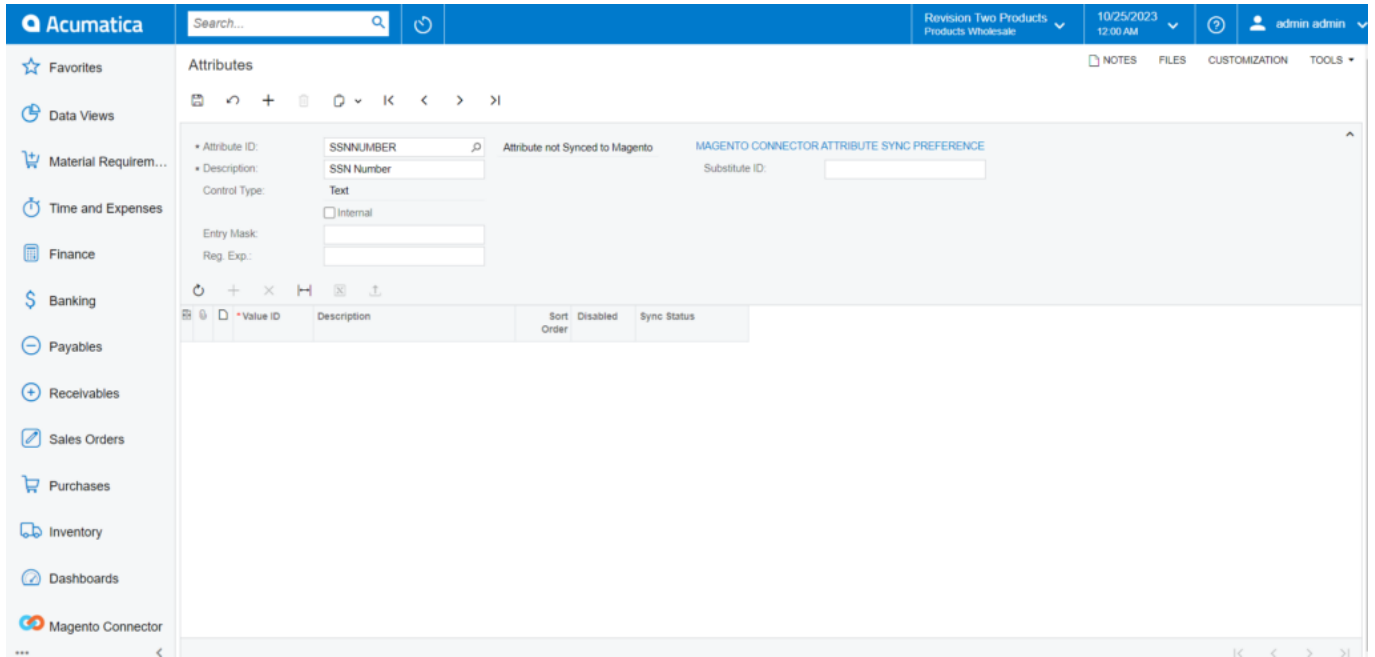

To create any attribute, click on the Create button and it will open up the Magento Customer Attribute Form with the loaded Acumatica attribute data. Provide the Screenshot of the form. After configuring the attribute data in the form click save to create the attribute in the Magento.

Once the attribute is saved it will be available for the mappings.

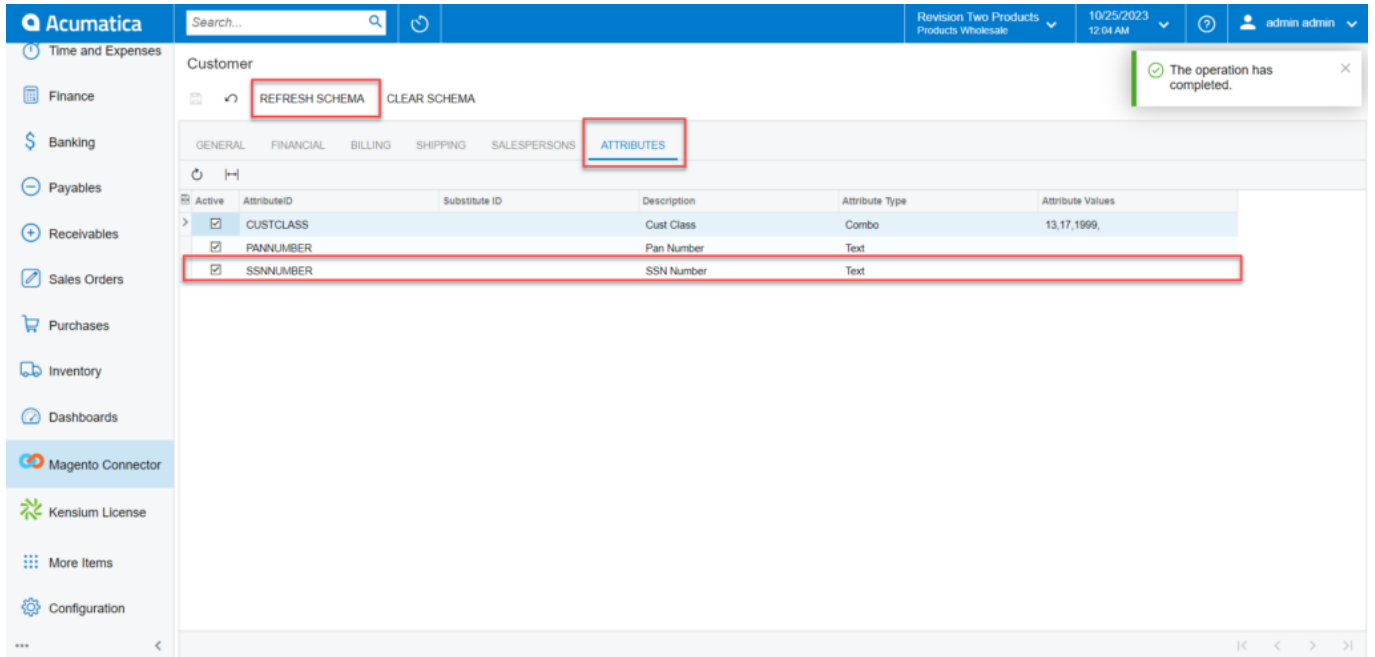

Created New Attributes displayed

Go to the Attributes section.

Attributes section

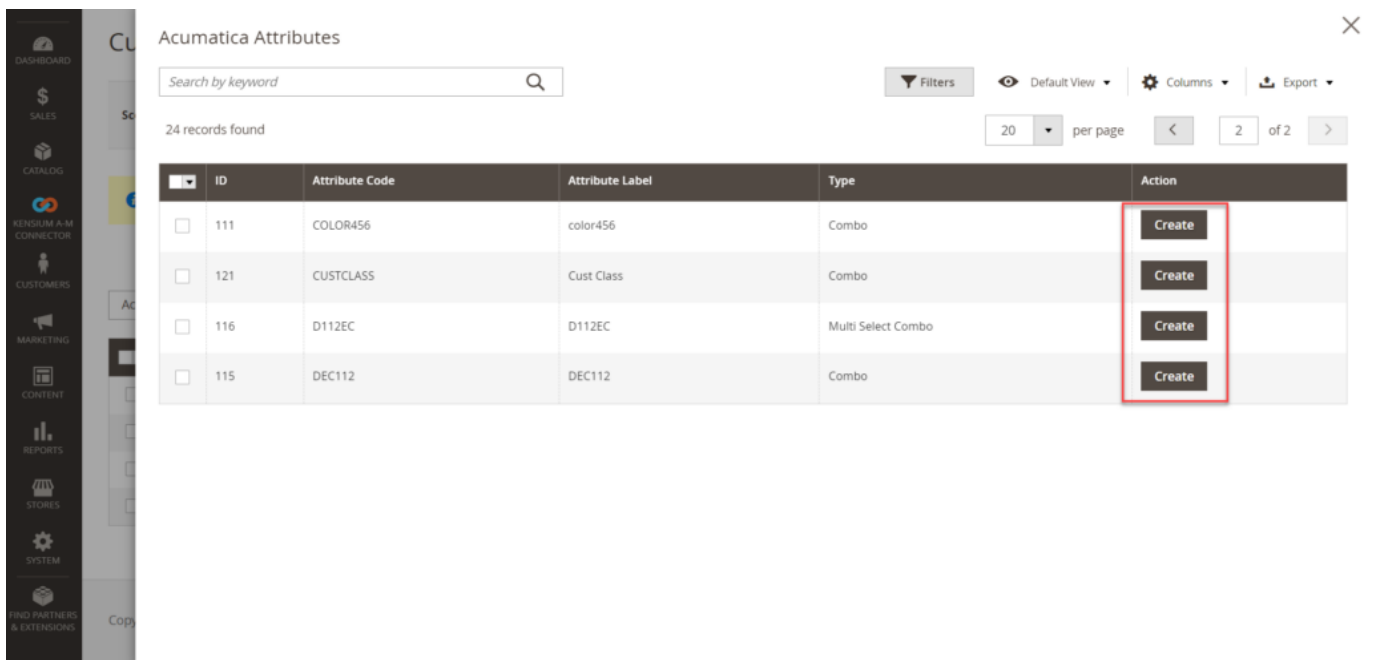

Click on the Customer Schema and click on the Refresh Schema the SSN Number, the newly created attribute should be displayed within Acumatica.

The screenshot shows the Acumatica interface for a Customer. The 'ATTRIBUTES' tab is selected. A table lists attributes with columns: Active, AttributeID, Substitute ID, Description, Attribute Type, and Attribute Values. The 'SSNUMBER' attribute is highlighted with a red box. A 'REFRESH SCHEMA' button is also highlighted with a red box. A notification in the top right corner states 'The operation has completed.'

Active	AttributeID	Substitute ID	Description	Attribute Type	Attribute Values
<input checked="" type="checkbox"/>	CUSTCLASS		Cust Class	Combo	13,17,1999,
<input checked="" type="checkbox"/>	PANNUMBER		Pan Number	Text	
<input checked="" type="checkbox"/>	SSNUMBER		SSN Number	Text	

New attributes creation

The screenshot shows the 'Acumatica Attributes' list. It features a search bar, filters, and a table with 24 records. The table columns are ID, Attribute Code, Attribute Label, Type, and Action. The 'Action' column contains 'Create' buttons for each record, which are highlighted with a red box.

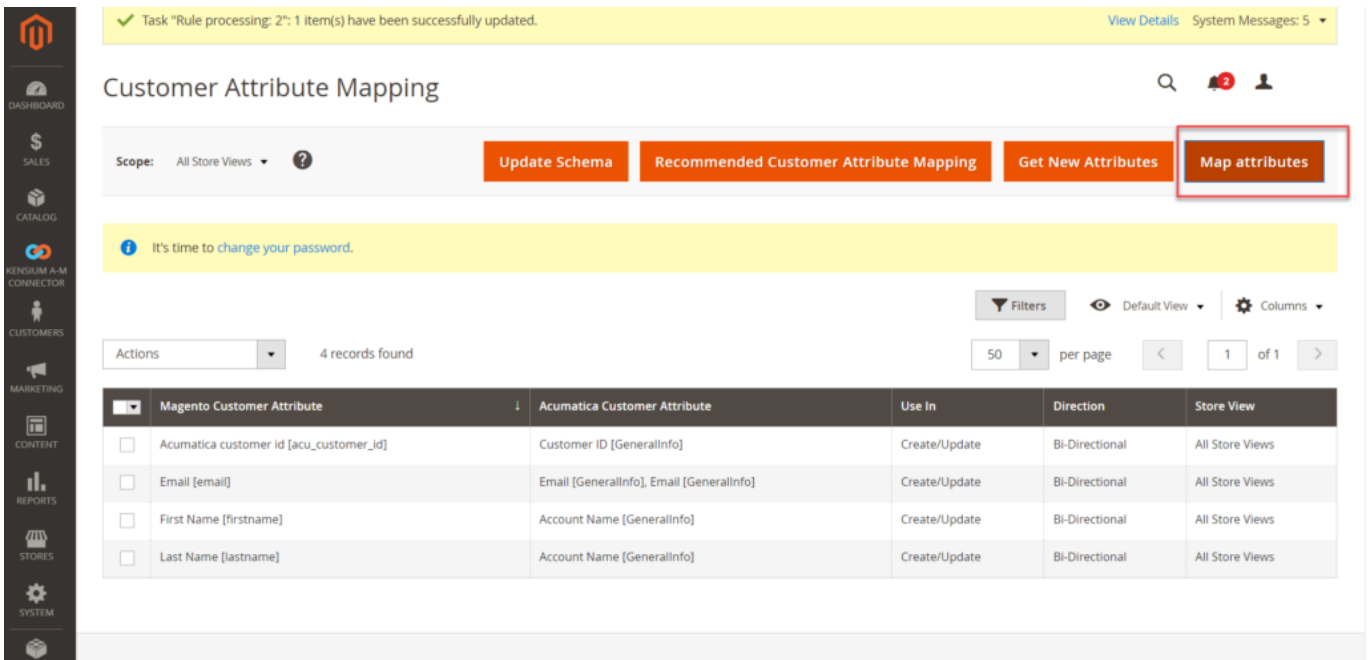

ID	Attribute Code	Attribute Label	Type	Action
111	COLOR456	color456	Combo	Create
121	CUSTCLASS	Cust Class	Combo	Create
116	D112EC	D112EC	Multi Select Combo	Create
115	DEC112	DEC112	Combo	Create

Click on [Create] for new attributes

The next screenshot is not available from Magento in the instance.

1. Map Attributes:

 This feature allows you to configure to map the customer attributes. You can map the Magento Customer Attributes with the Acumatica Customer attribute. The mapping of customer attributes could be bi-directional. You will have 4 dropdowns as shown in the following figures.

<input type="checkbox"/>	Magento Customer Attribute	Acumatica Customer Attribute	Use In	Direction	Store View
<input type="checkbox"/>	Acumatica customer id [acu_customer_id]	Customer ID [GeneralInfo]	Create/Update	Bi-Directional	All Store Views
<input type="checkbox"/>	Email [email]	Email [GeneralInfo], Email [GeneralInfo]	Create/Update	Bi-Directional	All Store Views
<input type="checkbox"/>	First Name [firstname]	Account Name [GeneralInfo]	Create/Update	Bi-Directional	All Store Views
<input type="checkbox"/>	Last Name [lastname]	Account Name [GeneralInfo]	Create/Update	Bi-Directional	All Store Views

Option to Map the Attributes

Upon clicking the **[Map Attributes]** the following pop-up will appear on your screen.

Pop-Up upon clicking the map Attributes

Field	Field Type	Description
Magento Customer Attribute	Search Drop-down	Select the field which you want to map with the Acumatica from Magento.
Acumatica Customer Attribute	Search Drop-down	Select the Acumatica field which should be mapped with the Magento field.
Use In	Search Drop-down	Select the option from the following drop-down list. <ul style="list-style-type: none"> - Create - Update - Create/ Update
Direction	Search Drop-down	Select the direction from the drop-down. For Customers, you will have the option for bi-directional as customer records will be having both in Magento and Acumatica. <ul style="list-style-type: none"> - Acumatica to Magento - Magento to Acumatica - Bi-Directional If you select only one direction then updates will always be triggered from one side, i.e., the selected side. If you select Bi-Directional then the updates will be triggered from both the end.

Since in Acumatica, the Account name refers to the Customer name. However, in Magento Customer name is defined as two separate text boxes first name and last name.

Adobe Connector

The Account Name will be mapped with the Customer's First Name and Last Name in Magento.

In case you only have one name in Acumatica then at the time of mapping Magento will enter the name in the first name and the last name there will be a dot as it's a mandatory field.
