Enabling Products for Magento Sync

After the item class is enabled for Magento sync, the items within the item classes need to be enabled for product sync. Navigate to the Inventory workspace in Acumatica and click Stock Items.

1. Select a Stock Item.
2. Click the eCommerce tab.
3. Toggle on the box labelled Enabled for Magento Sync.
4. Select a Visibility
    1. This feature *must* be selected. The options are:
        a. Not Visible Individually: This item is part of a bundled product or kit.
        b. Catalog: visible in the product catalogue but cannot be searched for.
        c. Search: visible only if searched for in the product catalogue.
        d. Catalog, Search: visible in the product catalogue and can be searched for.
5. Click Save.

Stock Item option under Purchases

The product will be ready for sync when the stock item's status is set to active, the item class is enabled for sync and the stock item is enabled for sync.
