

# Enabling the Item Classes for Magento Sync

Before syncing products, item classes must be enabled for Magento sync. Navigate to the Payables workspace in Acumatica and click Item Classes. Follow the steps as described.

1. Select the Item Class that is to be synced with Magento.
2. toggle on the box labelled Enabled for Magento Sync at the top of the page.
3. Click on Save.

**We strongly recommend not modifying the URLs without the support of an implementation specialist. Endpoint URLs are added by default upon installing the package. You should only modify if customization is present or added.**

The screenshot shows the Acumatica software interface. On the left is a navigation menu with options like Banking, Projects, Payables, Receivables, Sales Orders, Purchases, Inventory, Payroll, Dashboards, and Magento Connector. The main area is titled 'Item Classes'. A red box highlights a toolbar with icons for undo, redo, add, delete, and search. Below this, the 'Item Class Tree' lists various classes, with 'ACCESSORIE-S' selected. The right pane shows the details for 'ACCESSORIE-S'. A red box highlights the 'Enabled for Magento Sync' checkbox, which is checked. Other fields include 'Class ID' (ACCESSORIE-S), 'Description' (Accessories), and various settings like 'Stock Item' (checked), 'Valuation Method' (Average), 'Tax Category' (TAXABLE), 'Posting Class' (AOL), 'Lot/Serial Class' (NOTTRACKED), 'Price Class' (ECOM), 'Default Warehouse' (RETAIL), and 'Availability Calculation' (ALLOTHER). The 'UNIT OF MEASURE' section shows 'Overship Threshold (%)' at 100.00 and 'KIT AVAILABILITY ON SO' with units like PIECE and Divisible Unit checked.

Enabling an Item Class in Acumatica for the Magento Sync.

The item class will now be synced to Magento as an Attribute Set. If the item class is not already created in Magento, then the connector will create the corresponding Attribute Set in Magento.
