

Establishing the Customer Sync Schema

 You need to navigate to the Magento Connector workspace and select Customer under the Schema Management section.

Note that there are two extra columns in this schema management: API Reference Field Path and API Input Field Name. This contains the direction and destination of the selected field using Acumatica's API framework. These are fields that can be modified to the needs of a user based on the schema that is being synced.

1. Click Refresh Schema.
2. Select the tab of schema to enable. The tabs are:
 - a. General Info
 - b. Billing Settings
 - c. Delivery Settings
 - d. Payment Methods
 - e. Salespersons
 - f. Attributes
 - g. Activities
 - h. Mail Settings
3. Toggle the Active box for all Schema and Display Names applicable.
4. Click on Save.

The screenshot shows the 'Customer' schema management interface in Acumatica. The 'Active' column checkboxes for the 'Customer Summary' rows are highlighted with a red box. The table below represents the data shown in the screenshot:

Active	Schema Name	Display Name	API Reference Field Path	API Input Field Name
<input checked="" type="checkbox"/>	Customer Summary	Customer ID	/root/	CustomerID
<input type="checkbox"/>	Customer Summary	Customer Status	/root/	CustomerStatus
<input checked="" type="checkbox"/>	Customer Summary	Customer Class	/root/	CustomerClass
<input type="checkbox"/>	Customer Summary	Customer Kind	/root/	CustomerKind
<input type="checkbox"/>	Customer Summary	chkServiceManagement	/root/	chkServiceManagement
<input type="checkbox"/>	Customer Summary	Note Text	/root/	NoteText
<input type="checkbox"/>	Customer Summary	Add Pop-Up Note	/root/	AddPop-UpNote
<input type="checkbox"/>	Customer Summary	Pop-Up Note Text	/root/	Pop-UpNoteText
<input type="checkbox"/>	General -> Primary Contact -> Name	Name	/root/	Name
<input type="checkbox"/>	General -> Primary Contact -> Name	Name Contact	/root/	NameContact
<input checked="" type="checkbox"/>	General -> Account Info	Account Name	/root/	CustomerName
<input type="checkbox"/>	General -> Additional Account Info -> ...	Ext Ref Nbr	/root/	ExtRefNbr
<input type="checkbox"/>	General -> Additional Account Info -> ...	Locale	/root/	Locale
<input checked="" type="checkbox"/>	General -> Account Address	Address Line 1	/root/MainContact/Address	AddressLine1
<input type="checkbox"/>	General -> Account Address	Address Line 2	/root/MainContact/Address	AddressLine2

The Customer Screen of Schema Management.

The addition of the API Reference Field Path allows installers to adjust data destinations before sync. The selected schema will be active for syncs between Magento and Acumatica.
