

Initialization under Configuration

To initialize for the first time, you need to click on the **[Magento Connector]** on the left side panel and click on **[Initialize]** under **[Configuration]** as shown in the following screen.

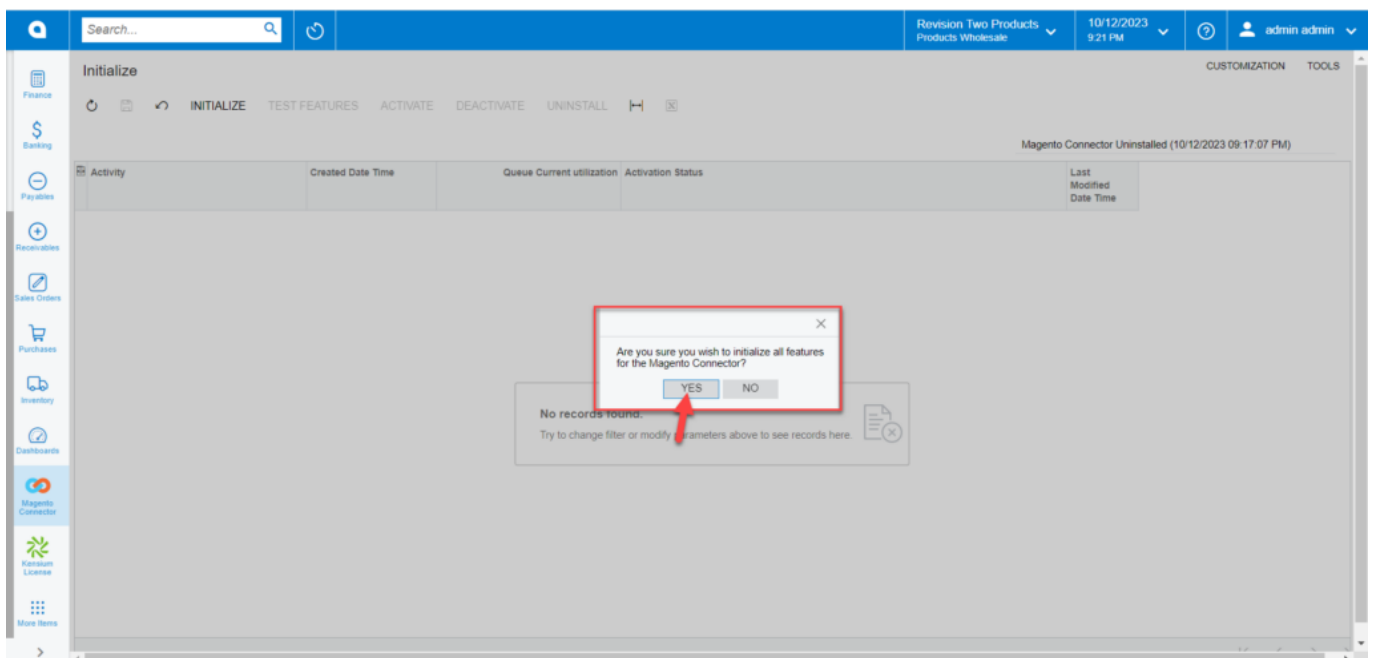

Initialize screen

In the first place, you will only see the [Initialize] button activated. Rest all the buttons should be deactivated, and the screen will appear blank. See the following screenshot.

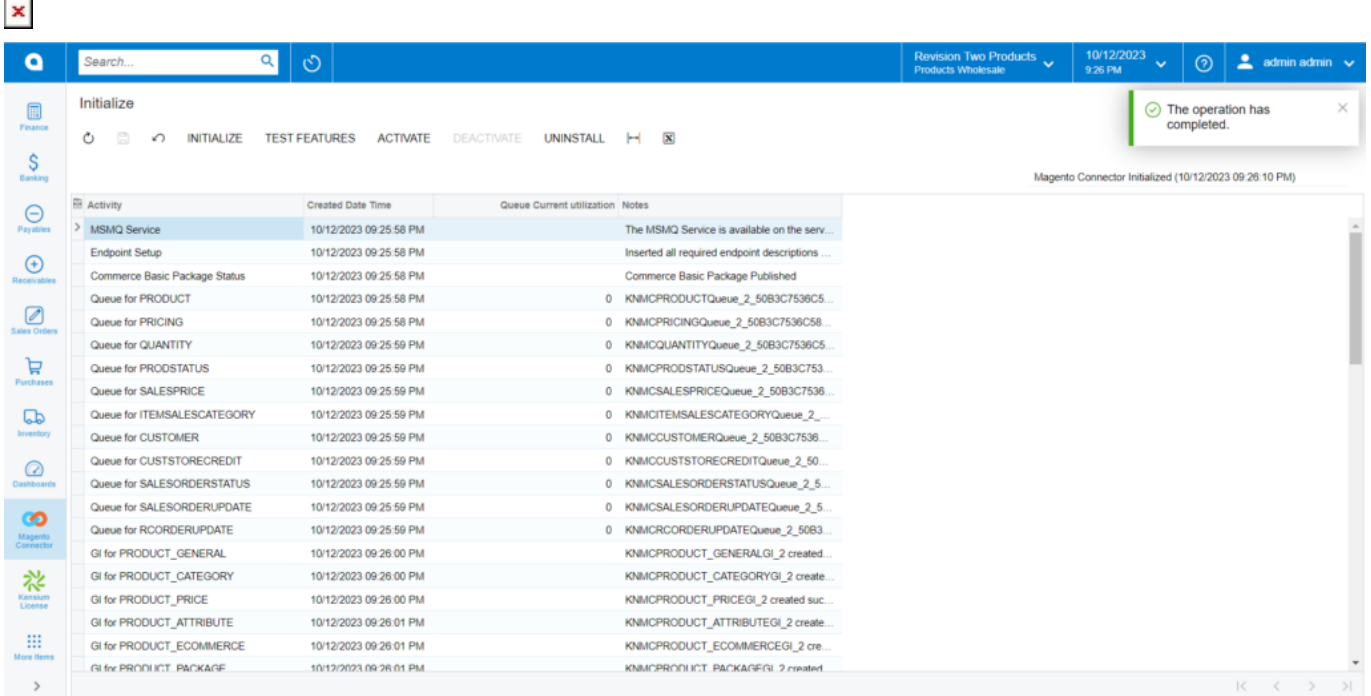

Initialize button is active and the screen will be blank

To initialize all features in Magento Connector click [Yes]

Click on the [Initialize] button. Upon clicking on Initialize a smart pop-up appears on the screen as **[Are you sure you wish to initialize all features for Magento Connector]** with a **[Yes]** and **[No]** option. Click on the **[Yes]** option.

The screenshot shows the 'Initialize' screen of the Magento Connector. A confirmation message at the top right states: 'The operation has completed.' Below this, a table lists the activities performed during initialization. The table has four columns: Activity, Created Date Time, Queue Current utilization, and Notes. The activities include MSMQ Service, Endpoint Setup, Commerce Basic Package Status, and various queues for PRODUCT, PRICING, QUANTITY, PROSTATUS, SALESPRICE, ITEMSALESCATEGORY, CUSTOMER, CUSTSTORECREDIT, SALESORDERSTATUS, SALESORDERUPDATE, and RCORDERUPDATE. Additionally, several GIs (Generic Inquiries) are listed for PRODUCT_GENERAL, PRODUCT_CATEGORY, PRODUCT_PRICE, PRODUCT_ATTRIBUTE, PRODUCT_ECOMMERCE, and PRODUCT_PACKAGE.

Initialization screen

By package publish MSMQ Service and Endpoint Setup will be published. Then the connector will check whether the Commerce Basic package is published or not. The rest of the Generic enquiries will be published. The connectors will create automatically necessary GIs, Push Notifications and Schedulers.

Initialization screen when activated

To deactivate, a pop-up will appear on the screen. You need to click on [Yes] to deactivate.

Deactivate screen in the Magento connector

In the Deactivate Sync pop-up, you will have two options.

1. **Pause Sync to Magento:** If you select this radio button to enable it, the system will continue to monitor and retain the messages that need to be sent to Magento when the Sync is activated again.
2. **Stop Push Notification:** If you select this radio button to enable it, the system will turn off all the backend monitoring and processes of messages to be sent across to Magento and turn off Sync until the system is activated again.
