

# Initialization under Configuration

To initialize for the first time, you need to click on the **[Magento Connector]** on the left side panel and click on **[Initialize]** under **[Configuration]** as shown in the following screen.

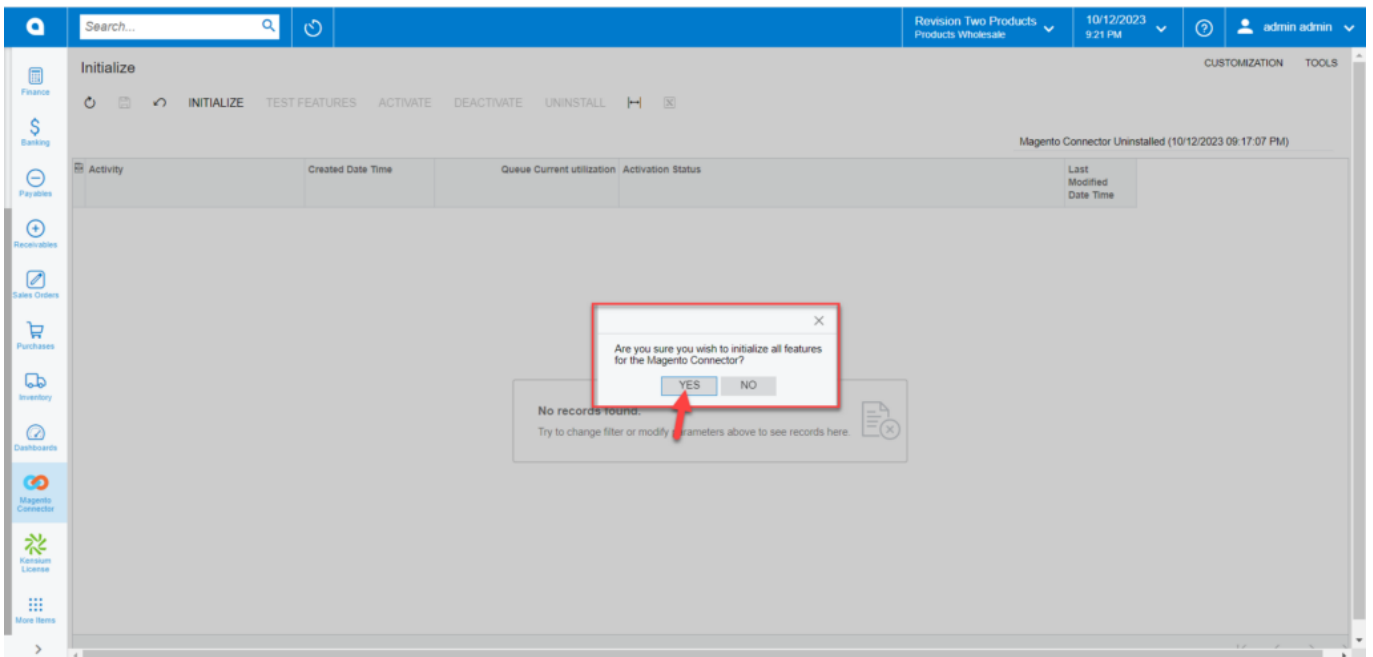

Initialize screen

In the first place, you will only see the [Initialize] button activated. Rest all the buttons should be deactivated, and the screen will appear blank. See the following screenshot.

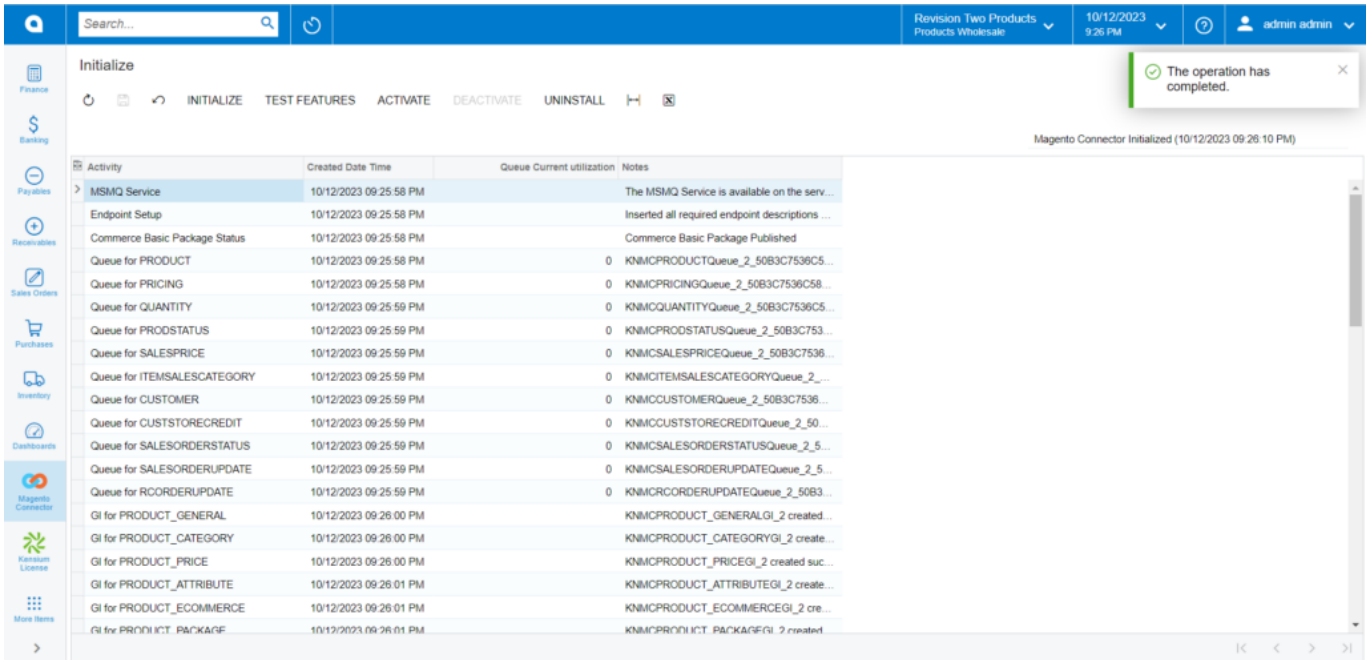

Initializbutton is active and the screen will be blank

To initialize all features in Magento Connector click [Yes]

Click on the [Initialize] button. Upon clicking on Initialize a smart pop-up appears on the screen as [**Are you sure you wish to initialize all features for Magento Connector**] with a [Yes] and [No] option. Click on the [Yes] option.

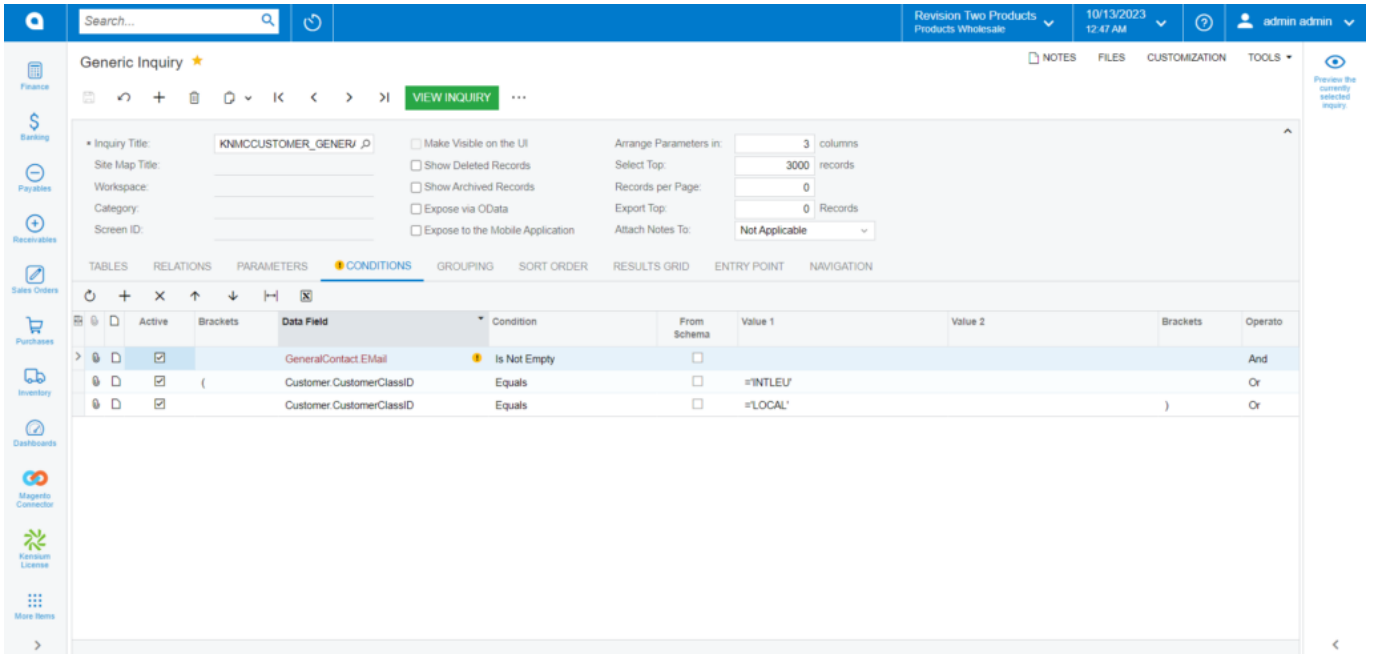

The screenshot shows the 'Initialize' screen in the Magento Connector interface. A notification at the top right states 'The operation has completed.' Below this, a table lists various activities and their status.

### Initialization screen

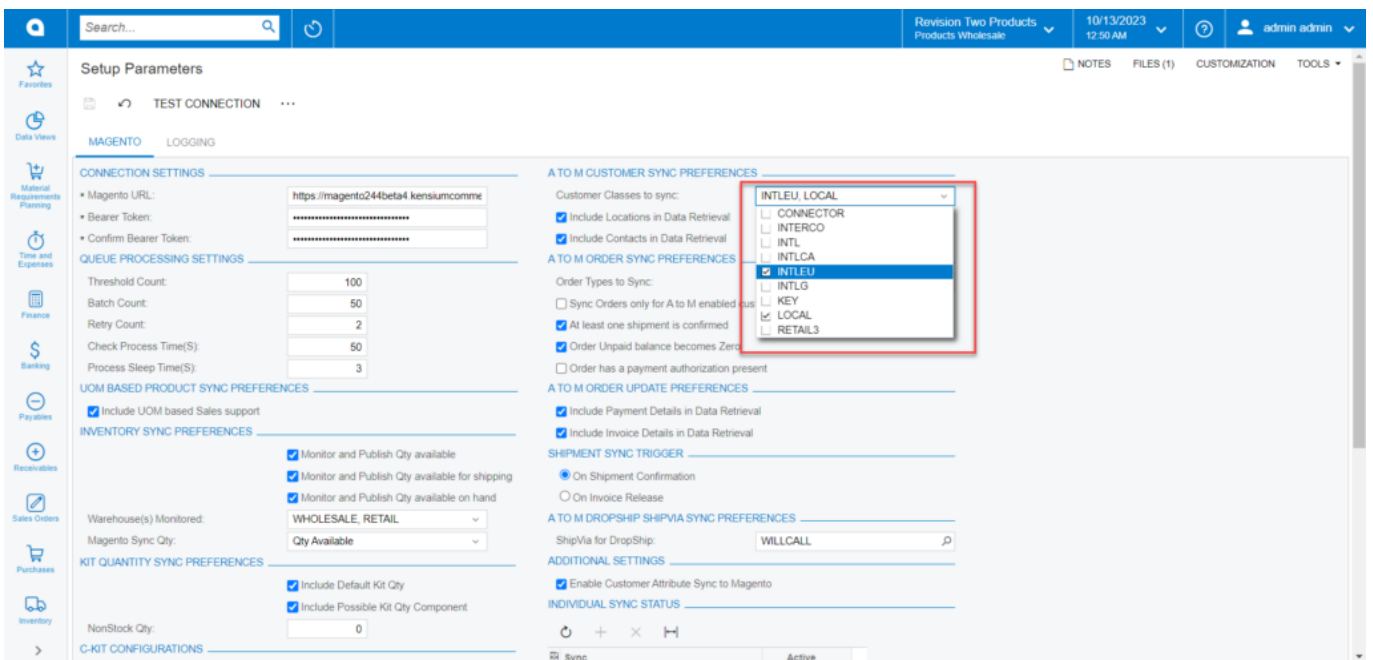

By package publish MSMQ Service and Endpoint Setup will be published. Then the connector will check whether the Commerce Basic package is published or not. The rest of the Generic enquiries will be published. The connectors will create automatically necessary GIs, Push Notifications and Schedulers.

The screenshot shows the 'Generic Inquiry' configuration page. The 'CONDITIONS' tab is active, displaying a table of conditions:

Active	Brackets	Data Field	Condition	From Schema	Value 1	Value 2	Brackets	Operator
<input checked="" type="checkbox"/>		GeneralContact.EMail	Is Not Empty	<input type="checkbox"/>				And
<input checked="" type="checkbox"/>	(	Customer.CustomerClassID	Equals	<input type="checkbox"/>	= 'INTLEU'			Or
<input checked="" type="checkbox"/>		Customer.CustomerClassID	Equals	<input type="checkbox"/>	= 'LOCAL'		)	Or

Conditions in the GI

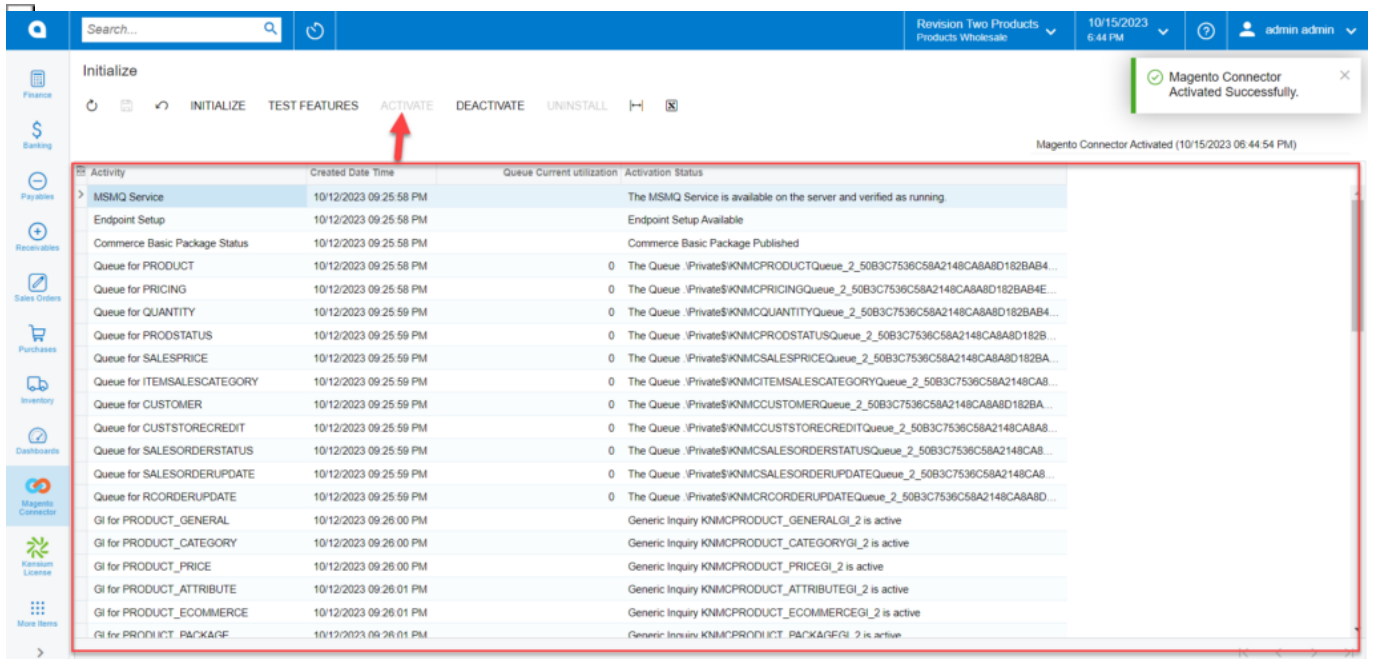

The screenshot shows the 'Setup Parameters' page. A dropdown menu is open, showing a list of customer classes. The 'INTLEU' option is selected and highlighted with a red box.

- INTLEU LOCAL
- CONNECTOR
- INTERCO
- INTL
- INTLCA
- INTLEU**
- INTLG
- KEY
- LOCAL
- RETAIL3

Condition Under the Set of Parameters

Push Notifications are used to send the data from the connector. GI is used to filter data. Automate schedulers are used to process the data through the connector to sync from Magento to Acumatica.

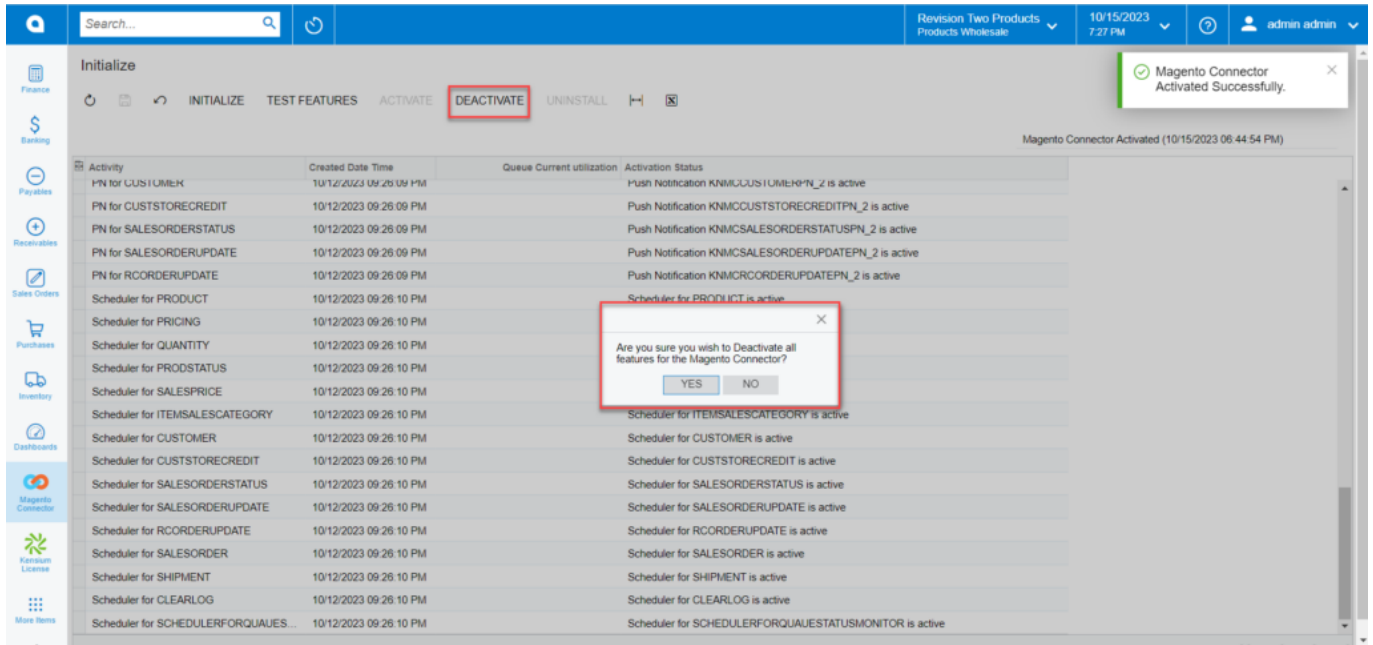

The screenshot shows the 'Initialize' screen of the Adobe Connector. The 'ACTIVATE' button is highlighted with a red arrow. A notification box in the top right corner says 'Magento Connector Activated Successfully.' Below the navigation bar, there is a table with the following columns: Activity, Created Date Time, Queue Current utilization, and Activation Status.

Activity	Created Date Time	Queue Current utilization	Activation Status
MSMQ Service	10/12/2023 09:25:58 PM		The MSMQ Service is available on the server and verified as running.

Initialization screen when activated

To deactivate, a pop-up will appear on the screen. You need to click on [Yes] to deactivate.

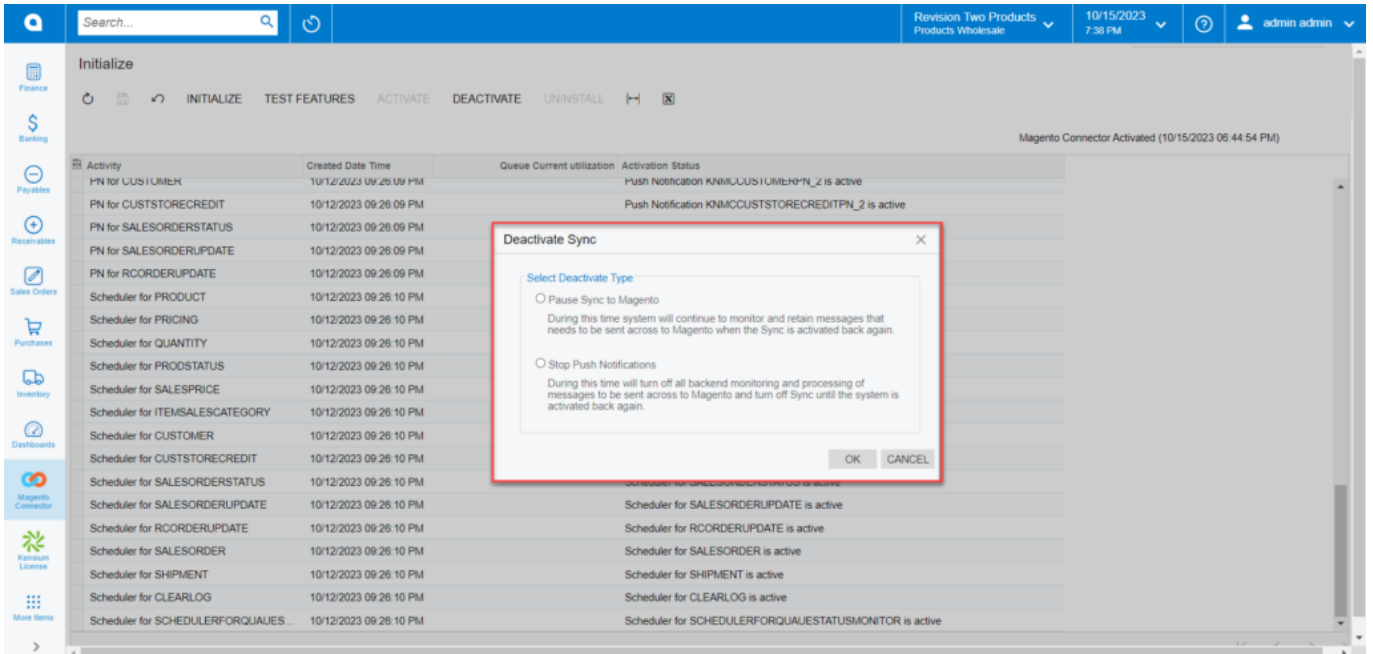

The screenshot shows the 'Initialize' screen of the Kensium Adobe Connector. The 'DEACTIVATE' button is highlighted with a red box. A confirmation dialog box is open, asking 'Are you sure you wish to Deactivate all features for the Magento Connector?' with 'YES' and 'NO' buttons. A green notification banner at the top right says 'Magento Connector Activated Successfully.' The background shows a table of activities with columns for Activity, Created Date Time, Queue Current utilization, and Activation Status.

### Deactivate screen in the Magento connector

In the Deactivate Sync pop-up, you will have two options.

1. **Pause Sync to Magento:** If you select this radio button to enable it the system will continue to monitor and retain the messages that need to be sent to Magento when the Sync is activated back again.
2. **Stop Push Notification:** If you select this radio button to enable it the system will turn off all the backend monitoring and processes of messages to be sent across to Magento and turn off Sync until the system is activated again.

The screenshot shows the 'Initialize' page of the Adobe Connector application. A 'Deactivate Sync' dialog box is open, allowing the user to choose between two options:

- Pause Sync to Magento  
During this time system will continue to monitor and retain messages that needs to be sent across to Magento when the Sync is activated back again.
- Stop Push Notifications  
During this time will turn off all backend monitoring and processing of messages to be sent across to Magento and turn off Sync until the system is activated back again.

The dialog box has 'OK' and 'CANCEL' buttons at the bottom right. The background interface shows a table of activities and their statuses.

Activity	Created Date Time	Queue Current utilization	Activation Status
