Inventory in Acumatica Through PO Receipts

To access the inventory through PO Receipt you need to go to Payables on the left panel and click on Purchase Orders under [**Transaction].**

Purchase Orders under [Transaction]

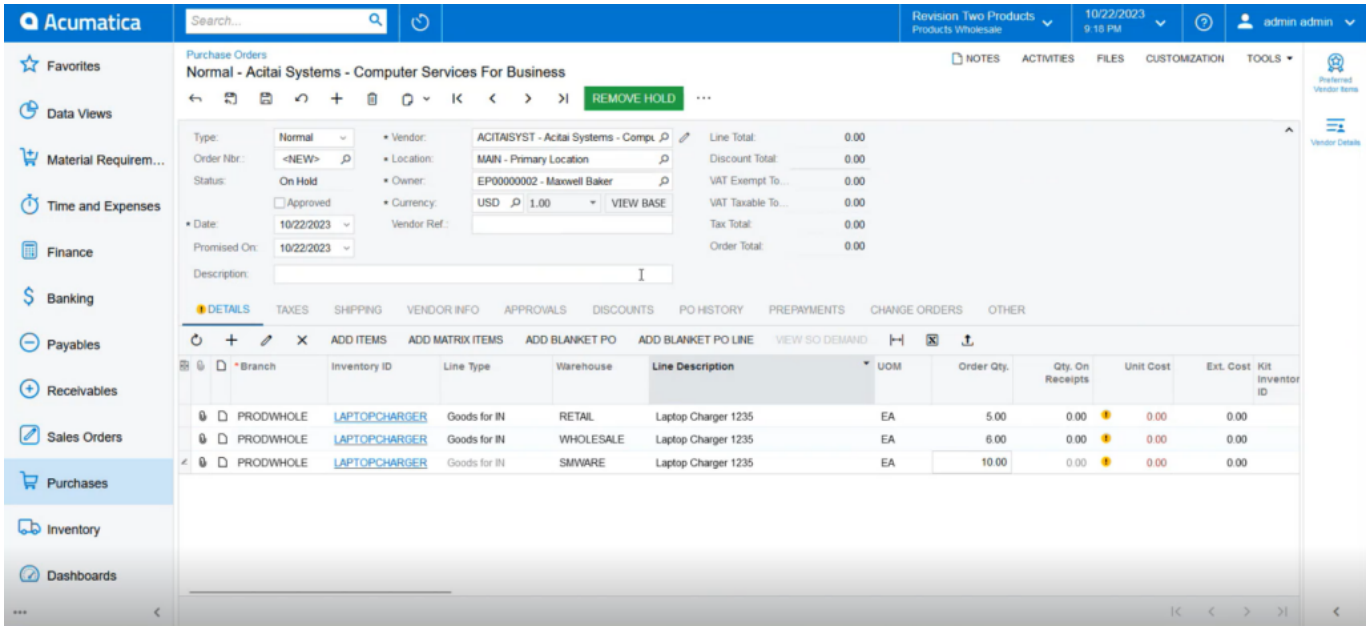

Click on the [New] or + sign to create the purchase order. The logic of warehouse i.e., Wholesale and Retails remains the same. In the Setup Parameter of Acumatica, these two warehouse types are defined.

To create the PO receipt, follow the steps.

Step 1. Create the PO with all the details including the Warehouse details as shown below. In the following screenshot apart from Wholesale and Retail another warehouse has been selected.
