

Payment Method

 Acumatica, different payment methods are used. The Payment Method which is created within Acumatica under the Banking section should be mapped with Magento. In Acumatica you will have a payment plugin and payment methods.

Payment Method mapping under Mapping Column

Upon clicking Map Payment Methods, you will have a couple of dropdowns from where you need to select the details. This should always match with the Acumatica payment method.

Options in the Payment method mapping

- **Magento Payment Method:** From the drop-down select the Magento Payment method. This should match with the Acumatica for successful mapping. On the drop-down selection, you may have a list of payment methods. You need to choose the one which you have selected in the Acumatica Payment Method screen.
- **Card Types:** Select the Card Types from the dropdown.
- **Acumatica Payment Plugins:** Select the payment plugin which is selected within Acumatica Payment.
- **Acumatica Payment Methods:** Select the Payment method. For the respective payment in Acumatica, you need to select the same.
- **Cash Account:** The selected cash account in Acumatica should be selected here. Or add the cash account here.

When you are placing an order with a Visa card, for example, it will consider the Acumatica Payment Plugins i.e., KN Payment method, Acumatica Payment Method, and Cash Account. By using these three parameters the application will create a payment record within Acumatica. It will be reflected in the Sales Order.

Acumatica

Payment Methods
KNPAYMENT - KN Payment Method

Payment Method ID: KNPAYMENT

Active Use in AP Set Payment Date to Bank Transaction Date
 Use in AR Require Remittance Information for Cash Account
