Options in the Payment method mapping

- Magento Payment Method: From the drop-down select the Magento Payment method. This should match with the Acumatica for successful mapping. On the drop-down selection, you may have a list of payment methods. You need to choose the one which you have selected in the Acumatica Payment Method screen.
- Card Types: Select the Card Types from the dropdown.
- Acumatica Payment Plugins: Select the payment plugin which is selected within Acumatica Payment.
- Acumatica Payment Methods: Select the Payment method. For the respective payment in Acumatica, you need to select the same.
- Cash Account: The selected cash account in Acumatica should be selected here. Or add the cash account here.

When you are placing an order with a Visa card, for example, it will consider the Acumatica Payment Plugins i.e., KN Payment method, Acumatica Payment Method, and Cash Account. By using these three parameters the application will create a payment record within Acumatica. It will be reflected in the Sales Order.
