Price Type in Acumatica

Step 3. On the Create Price Worksheet select the Stock Item. On the [Price Type] Acumatica provides 3 options.

- Base
- Customer
- Customer Price Class

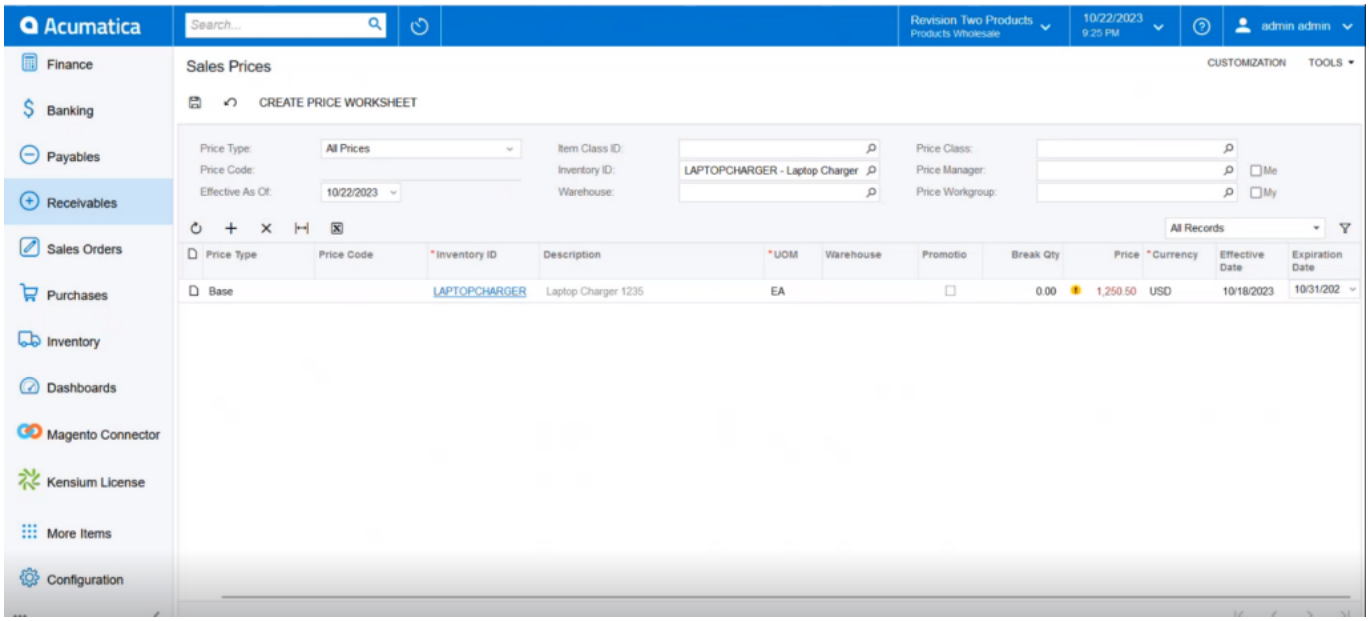

Price Type

Step 4. **Base** (Directly on the Product)- In base you can directly change the price from the grid. You can set the date range for how long this special pricing will be applicable.

Customer Price

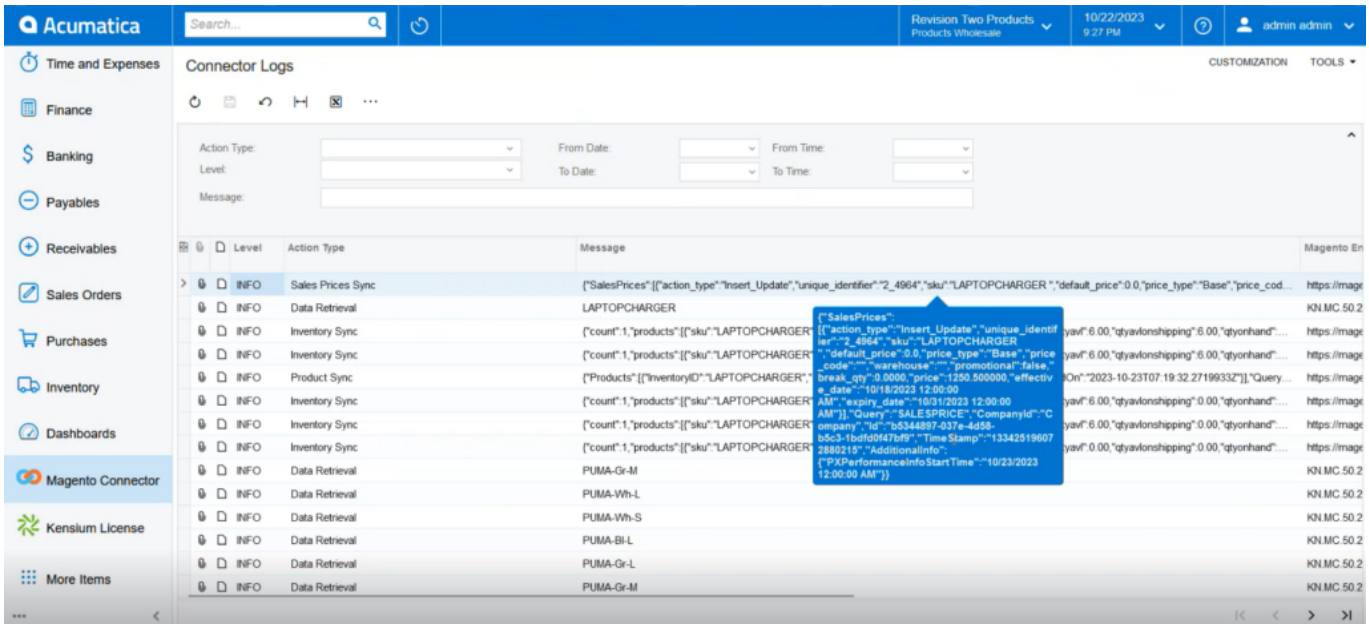

Step 6. **Customer Price Class:** Under the same customer class, you can apply the special price against the stock item within a range of time. For, if you have Customer Class International, all the customers who are within this class the price will be applied. You need to select the Customer Class from the lookup. This option is not for a single customer. As far as the range of customers who fall under the class the special price will be applied.
