

By clicking on the Product Schema Acumatica will open the [Product Schema] screen which includes  and  In the first place, the screen should appear blank. All the tabs like [General Settings], [Price/Cost Information], [Attributes], [Ecommerce Data], [Related Items], [Packaging], and [Cross Reference Details] should be blanked. They should not contain records under all these columns.

The screenshot shows the Acumatica Product Schema screen. The top navigation bar includes a search bar, a refresh icon, and a user dropdown for 'admin admin'. The left sidebar has a 'Product' section selected, along with other modules like Finance, Banking, Payables, Receivables, Sales Orders, Purchases, Inventory, and Dashboards. The main content area is titled 'Product Schema' and shows a table with three columns: 'Active', 'Schema Name', and 'Display Name'. A message 'No records found.' is displayed in the center of the table area, accompanied by a small icon of a document with a refresh symbol.

In the first place, the columns should be blank

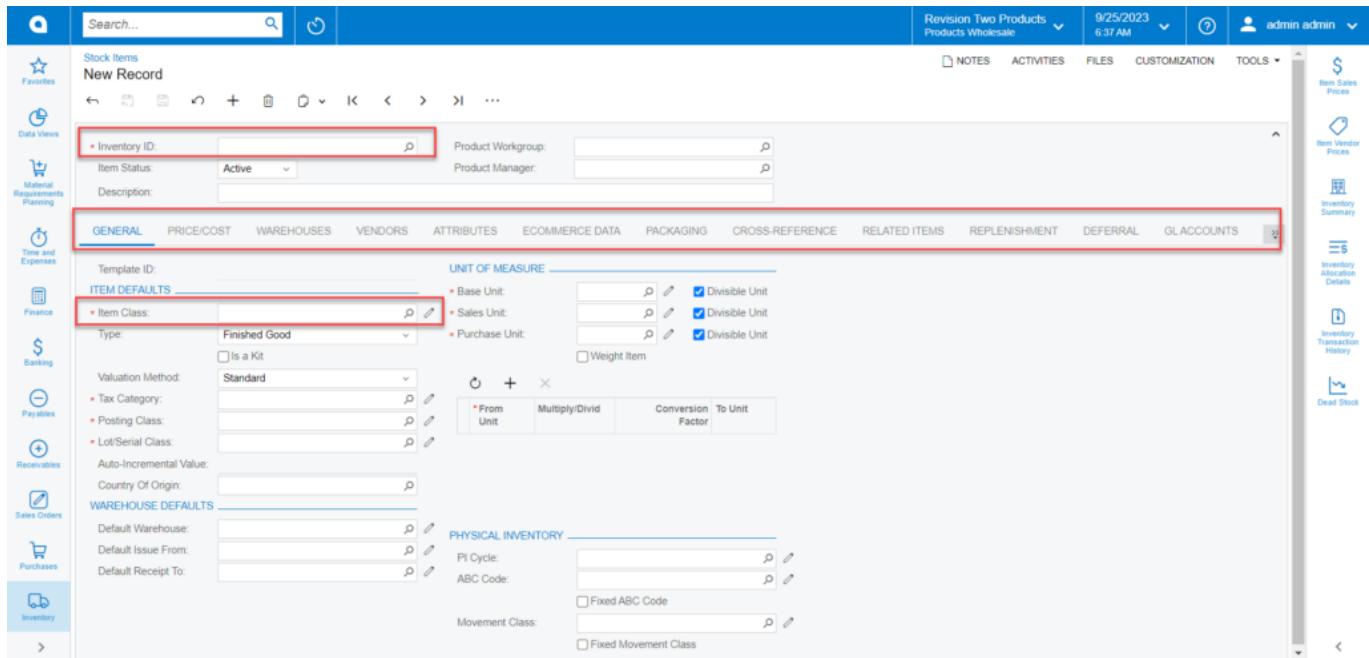

- By clicking on this option, the application will run a process and pull up all the fields. This will retrieve all the field names which have been used in the application. Under the General Settings, the application will show the Schema Name and Display Name. Display Name is the field label name used in Acumatica.

The screenshot shows the Kensium Adobe Connector interface for managing product schemas. On the left, there's a sidebar with various modules: Finance, Banking, Payables, Receivables, Sales Orders, Purchases, Inventory, Dashboards, Magento Connector, Kensium License, and More Items. The main area is titled 'Product' and shows a table of schema definitions. The 'GENERAL SETTINGS' tab is selected. A message box in the top right corner indicates that the schema refresh operation has completed. The 'REFRESH SCHEMA' button is highlighted with a red box.

After refreshing the schema the fields are displayed

Once the  routine is performed, you will get a message  

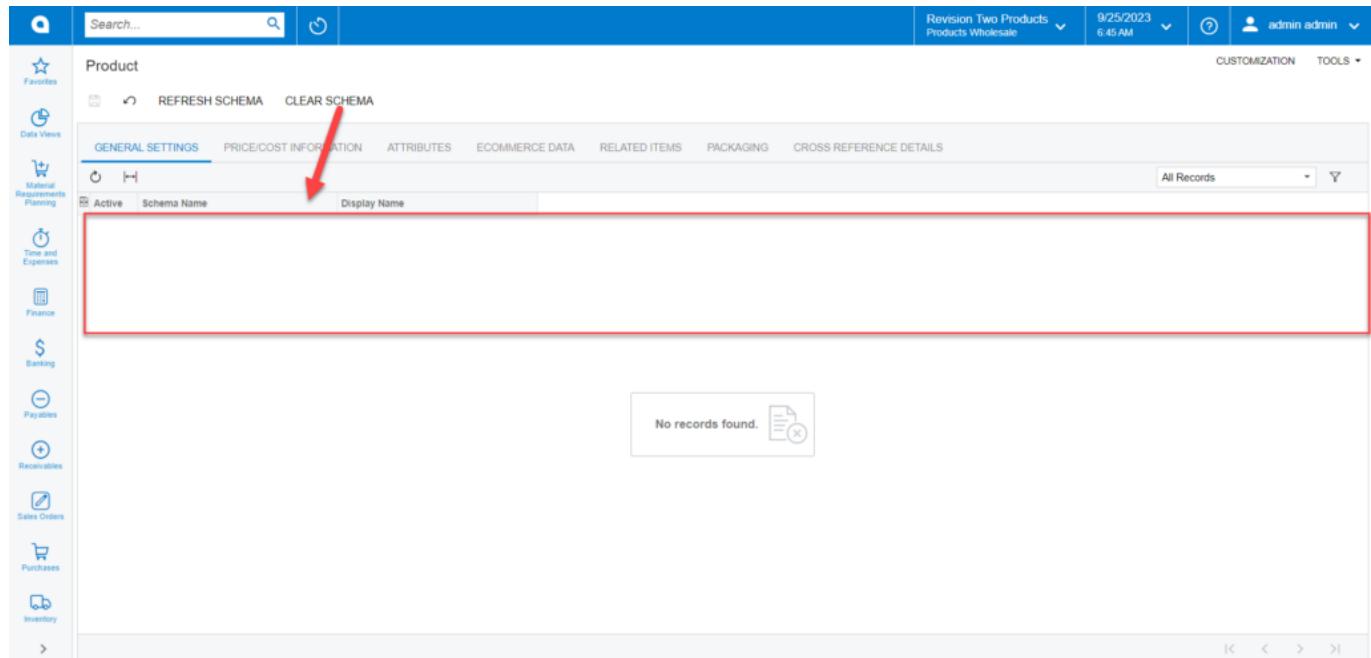

For, if you open the stock item browse in Acumatica, you will have General, Price/Cost, Warehouses, Vendors, Attributes, Ecommerce Data, Packaging, Cross-References, Related Items, Replenishment, Deferral, GL Accounts etc. tabs. At the same time, you will have some mandatory fields like Inventory ID, Item Class etc. as shown below.

Stock items browse with different tabs

In both columns, you can view the Schema names and the Display Name which indicates the field label name as shown in the above figure.

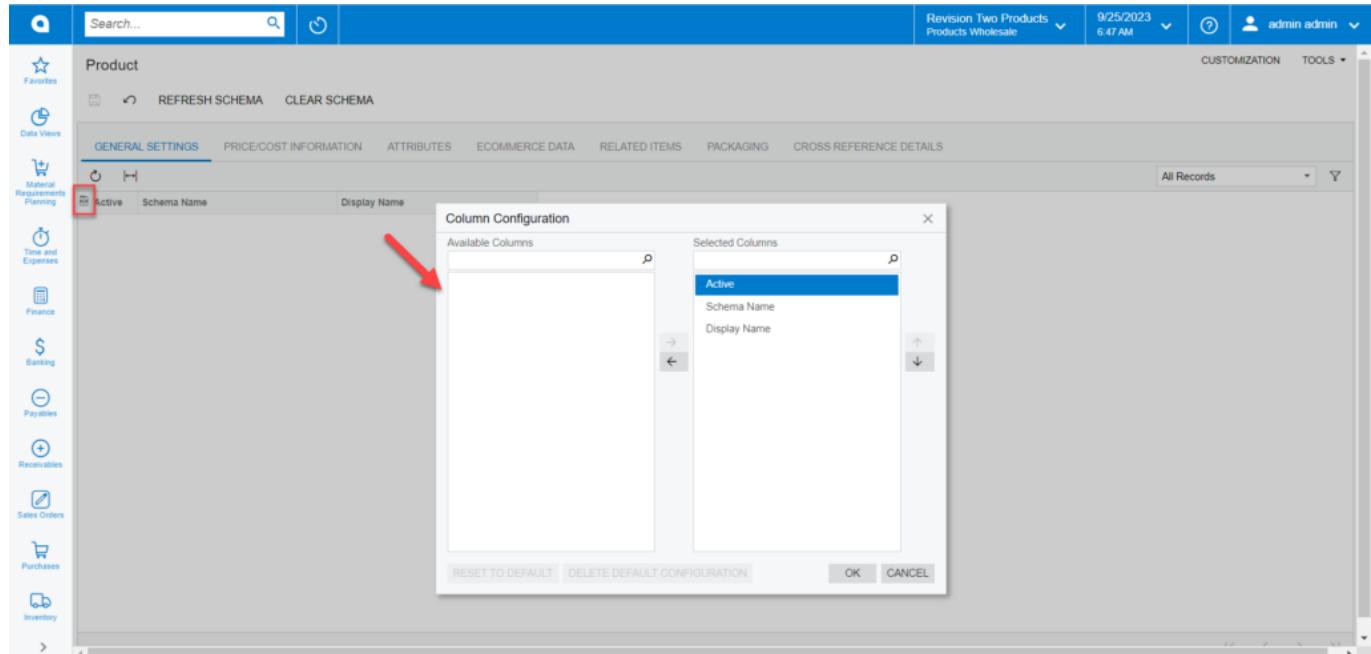

- By clicking on the Clear Schema option, the application will clear all the [Schema Name] and the [Display Name].

The screenshot shows the Kensium Adobe Connector interface for managing product schemas. The top navigation bar includes a search bar, a refresh icon, and user information (Revision Two Products, 9/25/2023, 6:45 AM, admin admin). The left sidebar contains various navigation links such as Favorites, Data Views, Manual Requirements Planning, Time and Expenses, Finance, Banking, Payables, Receivables, Sales Orders, Purchases, and Inventory. The main content area is titled 'Product' and shows a grid for managing schemas. The grid has columns for 'Active', 'Schema Name', and 'Display Name'. A red box highlights the 'Display Name' column. The top of the grid has buttons for 'REFRESH SCHEMA' and 'CLEAR SCHEMA'. A red arrow points to the 'CLEAR SCHEMA' button. Below the grid, a message says 'No records found.' with a refresh icon.

Clear Schema option will clear all the Schema & and Display Name

-  This option will allow you to configure the columns. You can customize the column by clicking the [Active] button on the left of the grid. A popup will appear on the screen for [Column Configuration]. You can include or exclude columns as per your requirement.

- **Attributes** in the Product Schema section is followed by the [Price/Cost Information]. This will show the Attribute ID, Substitute ID, Description, Attribute Types, and attribute values. The [Active] check box in the schema indicates the active attributes which are reflected in the in-stock item browse while creating a new product.

 You need to define the attributes you want to see in the Product browse.

The screenshot shows the Kensium Adobe Connector interface for managing product attributes. The top navigation bar includes a search bar, a refresh icon, and user information (Revision Two Products, 9/25/2023, 10:14 PM, admin admin). The left sidebar contains various navigation links such as Favorites, Data Views, Time and Expenses, Finance, Banking, Projects, Payables, Receivables, Sales Orders, Purchases, and Inventory. The main content area is titled 'Product' and shows a table of attributes. The table has columns: Active, AttributeID, Substitute ID, Description, Attribute Type, and Attribute Values. The 'Active' column contains checkboxes, with the first row (ACOLOUR) having its checkbox checked. The 'AttributeID' column lists attribute IDs like ACOLOUR, ASCOLOUR, ASIZE, ASSEMBLED, ASSIZE, CCOOL, CHCOLOR, CHSIZE, COLO, COLOPWA, COLOR, COLOUR26, COLOURTS, CONFIGURAB, CUSTCLASS, CUSTOMCLR, and EECOLOUR. The 'Substitute ID' column shows values like kcolour, ASCOLOUR, kszie, etc. The 'Description' column provides a brief description of each attribute. The 'Attribute Type' column indicates the type (e.g., Combo, Text). The 'Attribute Values' column lists the possible values for each attribute. A red box highlights the first row (ACOLOUR) in the table.
