

# Return Sync

 Like the order sync failure, the return records which are not synced due to the data error are displayed here.

The screenshot shows the 'Returns Sync Failure Screen' in the Kensium Adobe Connector interface. At the top, a yellow banner displays a success message: 'Task "Rule processing: 2": 1 item(s) have been successfully updated.' with a 'View Details' link and 'System Messages: 6'. Below this, a blue banner indicates 'It's time to change your password.' The main content area features a table with columns for 'ID' and 'Error', but it shows '0 records found' and the message 'We couldn't find any records.' The interface includes a sidebar with navigation options like Dashboard, Sales, Catalog, and Reports, and a footer with copyright information and links to Privacy Policy, Account Activity, and Report an Issue.

Resync the failed return data.
