

Return Sync

 Like the order sync failure, the return records which are not synced due to the data error are displayed here.

The screenshot shows the 'Returns Sync Failure Screen' in the Magento Admin interface. At the top, a yellow notification bar states: 'Task "Rule processing: 2": 1 item(s) have been successfully updated.' with a 'View Details' link and 'System Messages: 6'. Below this, a blue notification bar says: 'It's time to change your password.' The main content area features a table with the following structure:

| Actions | ID | Error |
|-------------------------------|----|-------|
| We couldn't find any records. | | |

Navigation controls include 'Filters', 'Default View', 'Columns', and pagination for '20 per page' (1 of 1). The footer contains copyright information for 2023 Magento Commerce Inc. and links for 'Privacy Policy', 'Account Activity', and 'Report an Issue'. The version 'Magento ver. 2.4.3' is also noted.

Resync the failed return data.
