

Return Sync

 Like the order sync failure, the return records which are not synced due to the data error are displayed here.

The screenshot shows the 'Returns Sync Failure Screen' in the Magento Admin interface. At the top, a yellow notification bar states: 'Task "Rule processing: 2": 1 item(s) have been successfully updated.' with a 'View Details' link and 'System Messages: 6'. Below this, another yellow notification bar says: 'It's time to change your password.' The main content area features a table with columns for 'ID' and 'Error'. The table is currently empty, displaying the message: 'We couldn't find any records.' The interface includes a sidebar with navigation options like Dashboard, Sales, Catalog, and System. At the bottom, the footer contains copyright information for Magento Commerce Inc. (2023) and the version number (2.4.3), along with links for Privacy Policy, Account Activity, and Report an Issue.

Resync the failed return data.
