

# Return Sync

 Like the order sync failure, the return records which are not synced due to the data error are displayed here.

The screenshot shows the 'Returns Sync Failure Screen' in the Magento Admin interface. At the top, a yellow notification bar states: 'Task "Rule processing: 2": 1 item(s) have been successfully updated.' with a 'View Details' link and 'System Messages: 6'. Below this, another yellow notification bar says: 'It's time to change your password.' The main content area features a table with the following controls: 'Actions' dropdown, '0 records found', 'Filters' button, 'Default View' dropdown, 'Columns' dropdown, '20 per page' dropdown, and pagination for '1 of 1'. The table header has columns for 'ID' and 'Error'. The table body contains the message: 'We couldn't find any records.' The footer includes the copyright notice 'Copyright © 2023 Magento Commerce Inc. All rights reserved.' and 'Magento ver. 2.4.3' with links for 'Privacy Policy', 'Account Activity', and 'Report an Issue'. The left sidebar contains navigation icons for Dashboard, Sales, Catalog, Kensium A-M Connector, Customers, Marketing, Content, Reports, Stores, and System.

Resync the failed return data.
