

Template Items

 In the Template Items you can use the same item class which you have created before. This feature allows you to create different combinations of a particular product. To access the Template Items, you need to go to [Inventory] on the left panel of Acumatica and click on [Template Items] under [Profiles].

Access Template Items

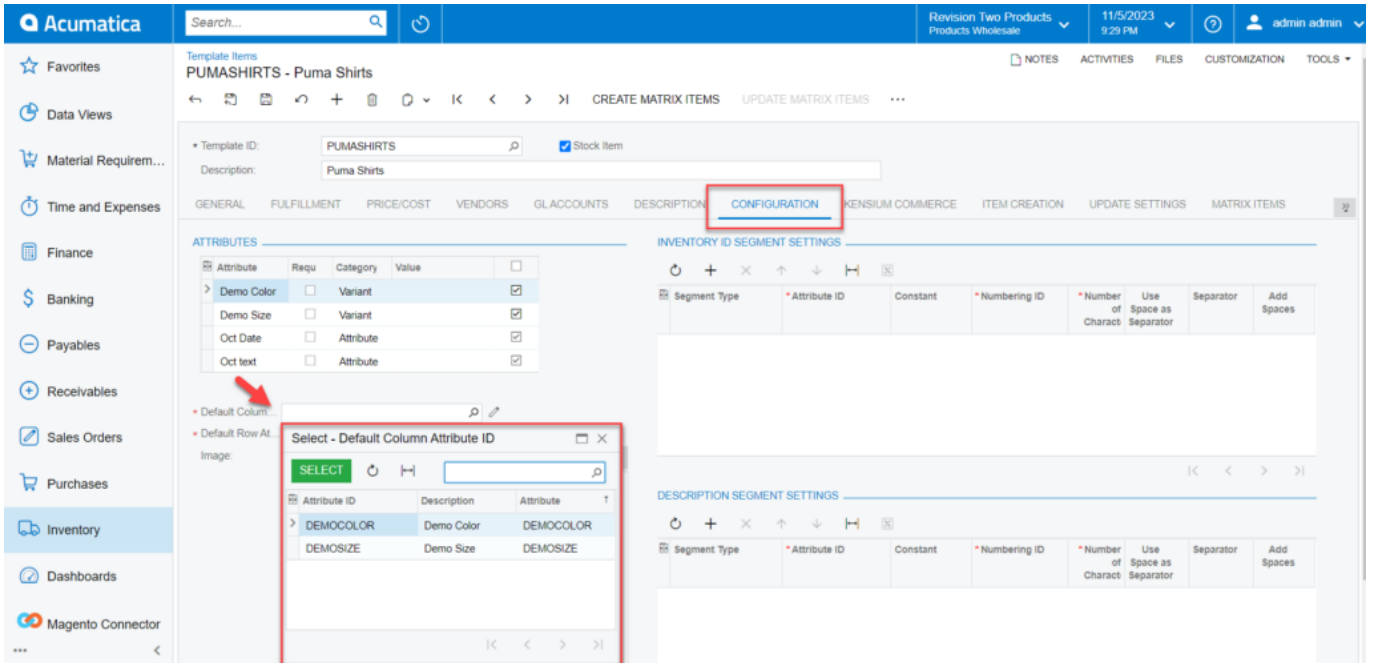

Upon clicking on the Template Items, you will be redirected to the following screen where you can create the product with the same item class.

The screenshot shows the Acumatica interface for configuring a template item. The main content area is titled 'Template Items' and 'PUMASHIRTS - Puma Shirts'. The 'Item Class' field is set to 'EXEMPT - Exempt Tax Category' and is highlighted with a blue selection box. Other fields include 'Template ID' (PUMASHIRTS), 'Description' (Puma Shirts), 'Type' (Finished Good), 'Valuation Method' (Average), 'Tax Category' (EXEMPT - Exempt Tax Category), 'Posting Class' (AOL - All Other Items), 'Lot/Serial Class' (NOTTRACKED - Not Tracked), and 'Country Of Origin' (US - United States of America). The 'UNIT OF MEASURE' section shows 'Base Unit', 'Sales Unit', and 'Purchase Unit' all set to 'EA' with 'Divisible Unit' checked. The 'WAREHOUSE DEFAULTS' section shows 'Default Warehouse' (RETAIL - Retail Warehouse), 'Default Issue From' (STORAGE - Storage and receiving), and 'Default Receipt To' (STORAGE - Storage and receiving). The 'PHYSICAL INVENTORY' section shows 'PI Cycle', 'ABC Code', and 'Movement Class' fields.

Item class in Template Items

The check box or text box will not allow you to create the combination. So, a Combo and multi-select combo will allow you to create the combination.
