KENSIUM
BigCommerce B2B Connector

System Requirements

The Kensium BigCommerce B2B Connector incorporates a BigCommerce App designed to activate B2B functionalities within the BigCommerce platform. This app ensures seamless data synchronization with Acumatica.

Leveraging Acumatica as the primary source of information, B2B customers can perform a range of actions, including purchasing, making payments, generating quotes, and more, directly from their BigCommerce website.

To enable the BigCommerce B2B Connector you must have the following as pre-requisite:

- Correct login credentials for accessing Acumatica ERP.
- Correct login credentials for accessing BigCommerce.
