

Getting API Path and Token from B2B

 By following the steps, you can get the API Path and the Token from B2B.

Step 1: Go to Store Configuration under Settings.

Store Configuration under Settings

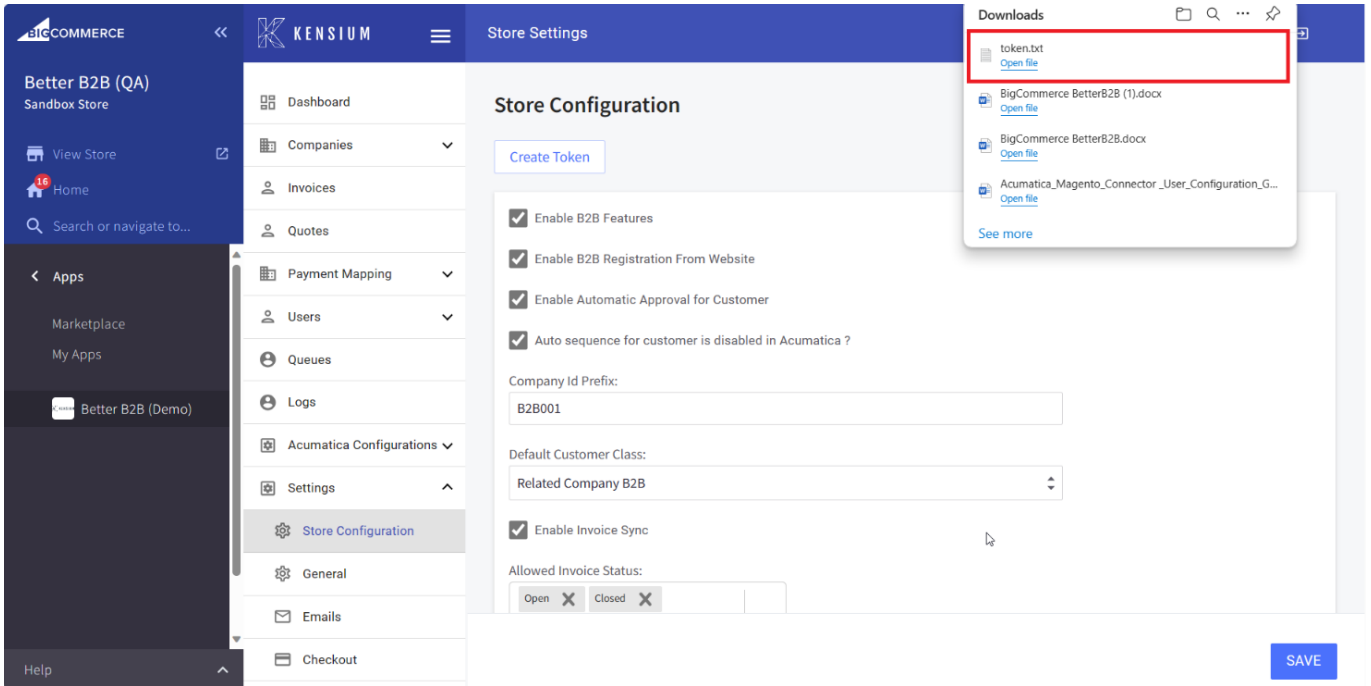

Step 2: Click on [Create Token] at the top of the screen.

The screenshot displays the 'Store Settings' interface for 'Better B2B (QA) Sandbox Store'. The left sidebar contains navigation links for Dashboard, Companies, Invoices, Quotes, Payment Mapping, Users, Queues, Logs, Acumatica Configurations, Settings, Store Configuration, General, Emails, and Checkout. The 'Store Configuration' section is active, showing a 'Create Token' button highlighted with a red box. Below this, several checkboxes are checked: 'Enable B2B Features', 'Enable B2B Registration From Website', 'Enable Automatic Approval for Customer', and 'Auto sequence for customer is disabled in Acumatica?'. The 'Company Id Prefix' is set to 'B2B001', and the 'Default Customer Class' is 'Related Company B2B'. The 'Enable Invoice Sync' checkbox is also checked. The 'Allowed Invoice Status' section shows 'Open' and 'Closed' with 'X' marks. A 'SAVE' button is located at the bottom right of the configuration area.

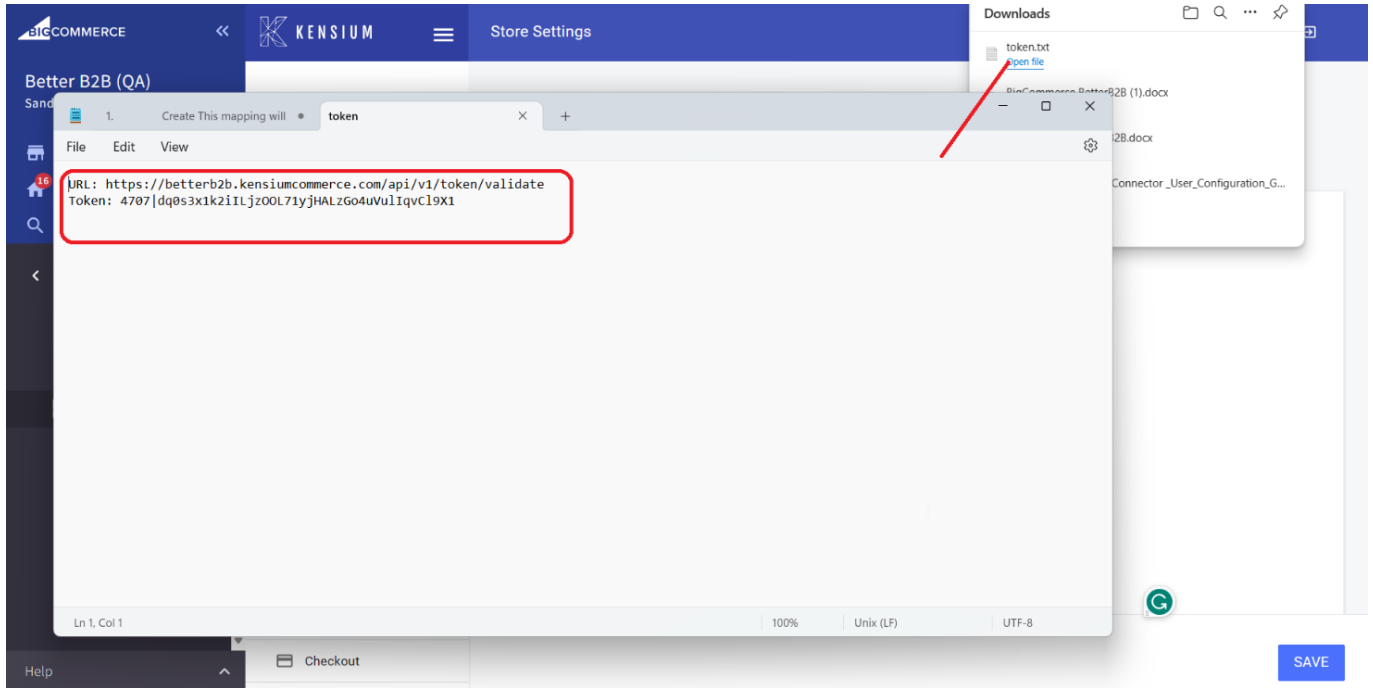

Option to Create Token

Step 3: Upon clicking a token file will be generated.

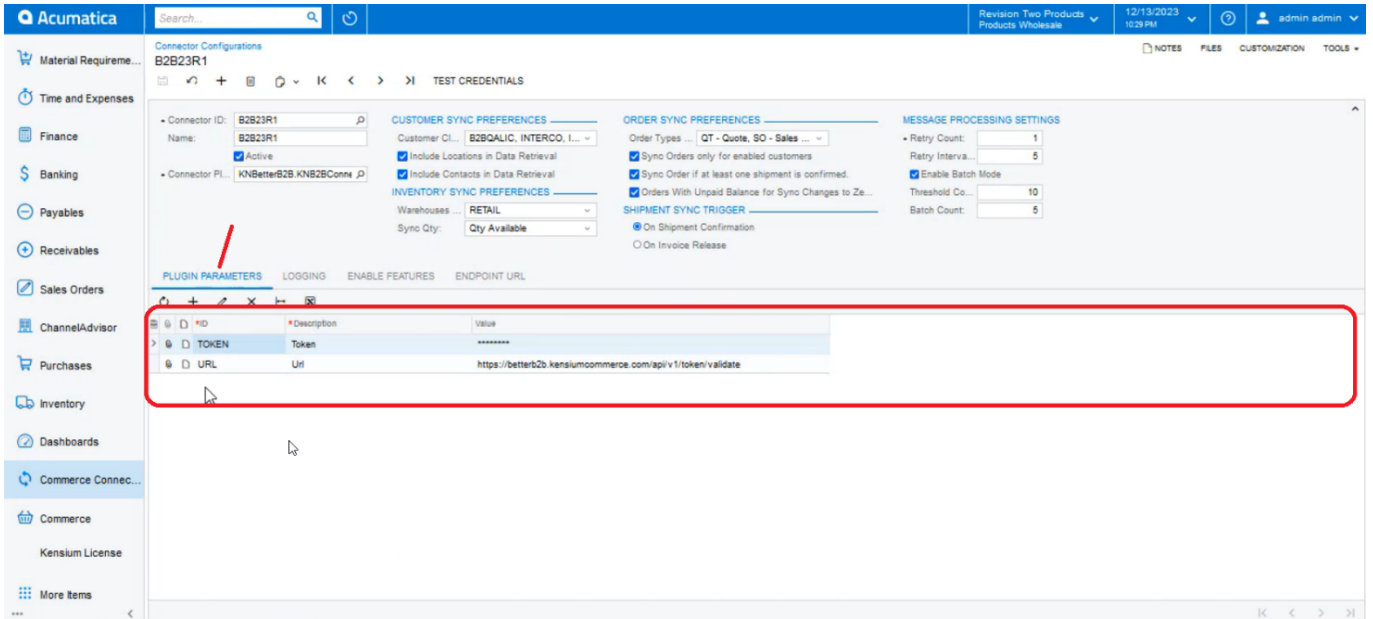

Token file generated in B2B

Step 4: Open the .txt file for the URL and the Token. Multiple downloads will generate the same URL and the token.

URL and the Token

Step 5: Go to Commerce Connector in Acumatica Click on Connector Configuration and select the store name. Under Plugin Parameters enter the details that you have got from B2B.
