

Initialize the Connection

Once the configuration is complete you need to initialize the connector. To initialize the connector, you need to click on the **[Initialization]**. Click on the Commerce Connection and click on **[Initialization]** under Configuration.

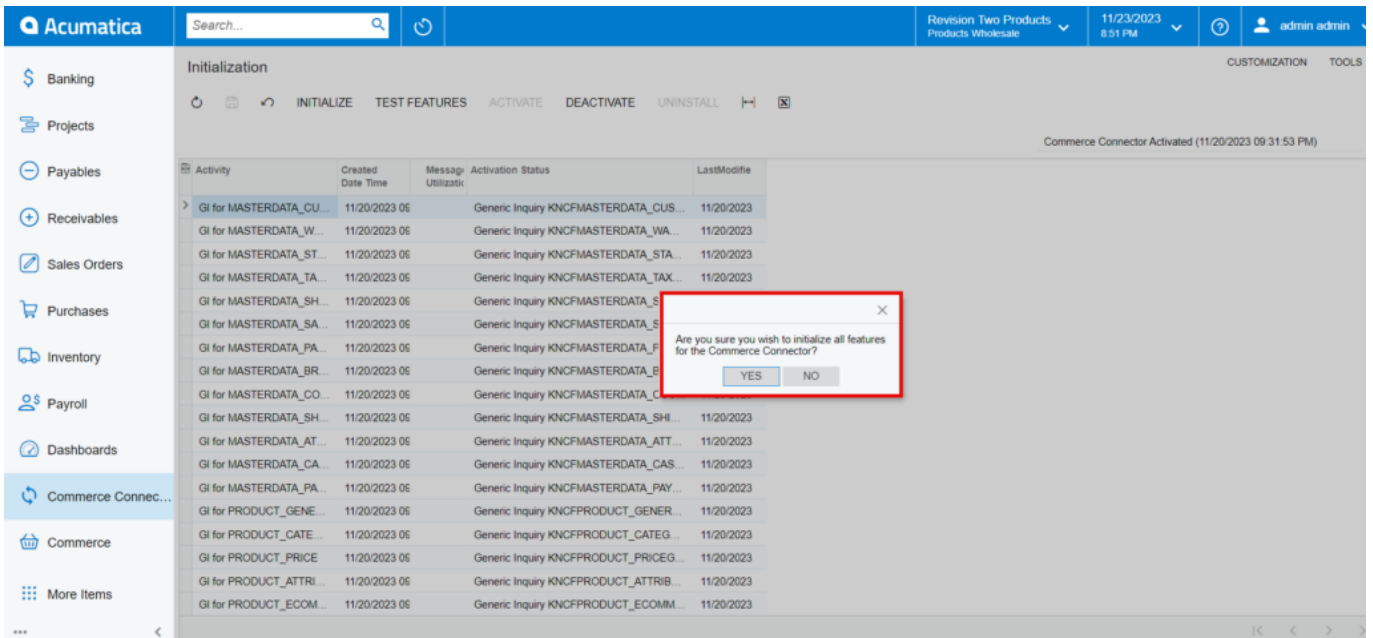

Initialization screen under Configuration

The screenshot shows the Acumatica interface with the 'Commerce Connector' section selected in the left sidebar. The main area displays the 'Initialization' screen. At the top, there are several buttons: 'INITIALIZE', 'TEST FEATURES', 'ACTIVATE', 'DEACTIVATE', and 'UNINSTALL'. The 'INITIALIZE' button is highlighted with a red rectangular box. Below the buttons is a table with columns: 'Activity', 'Created Date Time', 'Message/Utilizati...', 'Activation Status', and 'LastModifie'. The table contains multiple rows of data, including activities like 'GI for MASTERDATA_CU...', 'GI for MASTERDATA_W...', 'GI for MASTERDATA_ST...', etc.

Option to Initialize

Upon clicking the initialization button, you will be redirected to the following screen.

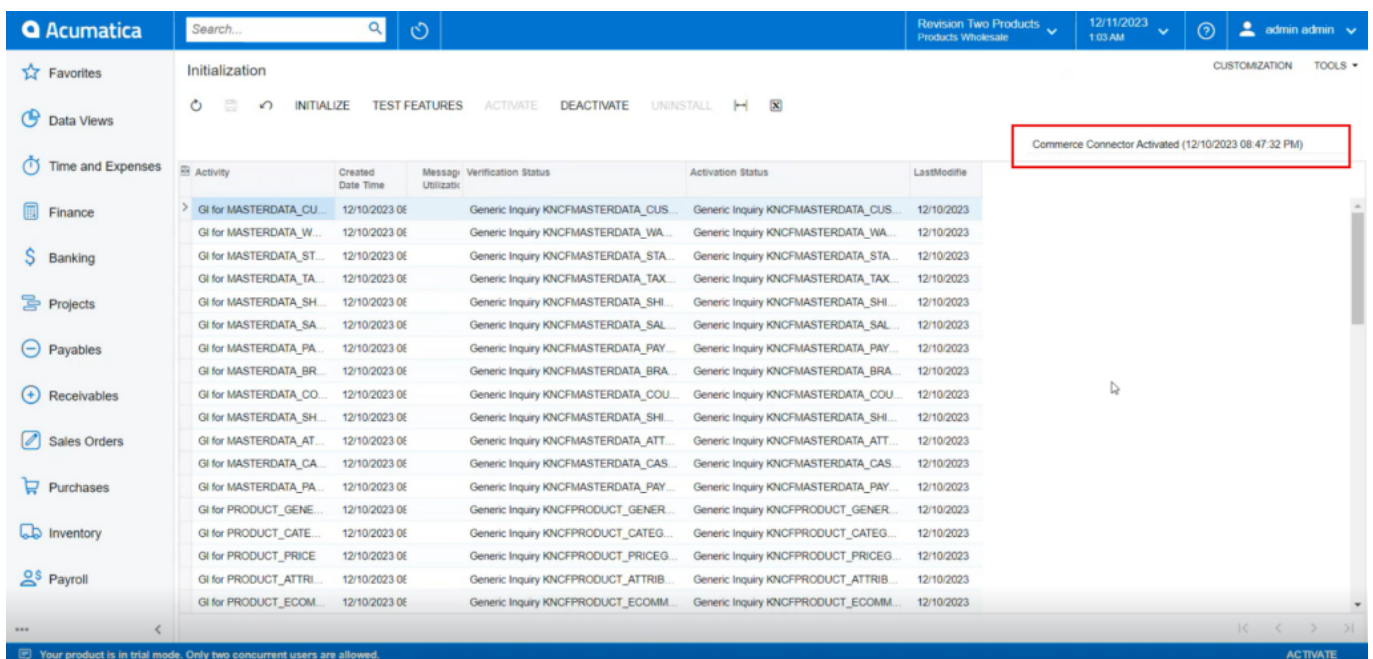

This screenshot shows the same Acumatica interface as the previous one, but with a confirmation dialog box overlaid on the table. The dialog box has a title bar with a close button (X) and contains the text: 'Are you sure you wish to initialize all features for the Commerce Connector?'. Below the text are two buttons: 'YES' and 'NO'. The dialog box is highlighted with a red rectangular box.

Pop-Up for the Initialization

Upon clicking on [Yes] the initialization process will start. This will activate and initialize the scheduler for the same.

You will also have the option to [Deactivate], [Activate], [Uninstall], [Test Features].

During the process of Initialization, the GI [General Information] is created which needs to be added. If you perform any of the actions you will be able to view the action description along with the date and time stamp. The information is based on your last activity. For example, if you disable it will change and show the time and action type.

Action Information in the Initialization Page

The General Information [GI] will be created after the initialization process and it will be displayed under the [Activity] column.

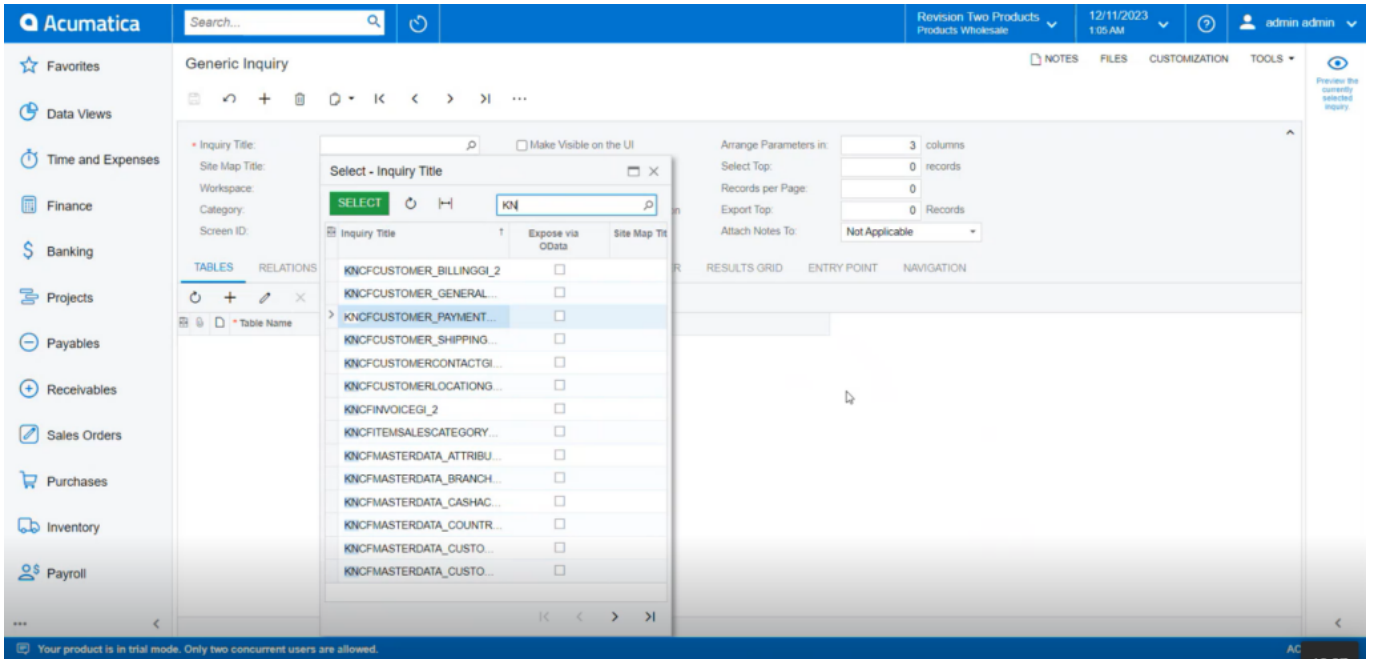

The screenshot shows the Acumatica software interface. At the top, there is a navigation bar with the Acumatica logo, a search bar, and user information (Revision Two Products, Products Wholesale, 12/11/2023 1:03 AM, admin admin). Below the navigation bar is a sidebar with various menu items like Favorites, Data Views, Time and Expenses, Finance, Banking, Projects, Payables, Receivables, Sales Orders, Purchases, Inventory, and Payroll. The main content area is titled 'Initialization' and contains a table of activities. The table has columns for Activity, Created Date Time, Message Utilizati..., Verification Status, Activation Status, and LastModifie. The first row is highlighted with a red box and contains the following data:

Activity	Created Date Time	Message Utilizati...	Verification Status	Activation Status	LastModifie
GI for MASTERDATA_CU...	12/10/2023 0E		Generic Inquiry KNCFMASTERDATA_CUS...	Generic Inquiry KNCFMASTERDATA_CUS...	12/10/2023

Below the table, there is a status bar that reads 'Your product is in trial mode. Only two concurrent users are allowed.' and an 'ACTIVATE' button.

GI under the Initialization

When the application is initializing it is creating KNCFMASTERDATA_Customer in verification status.

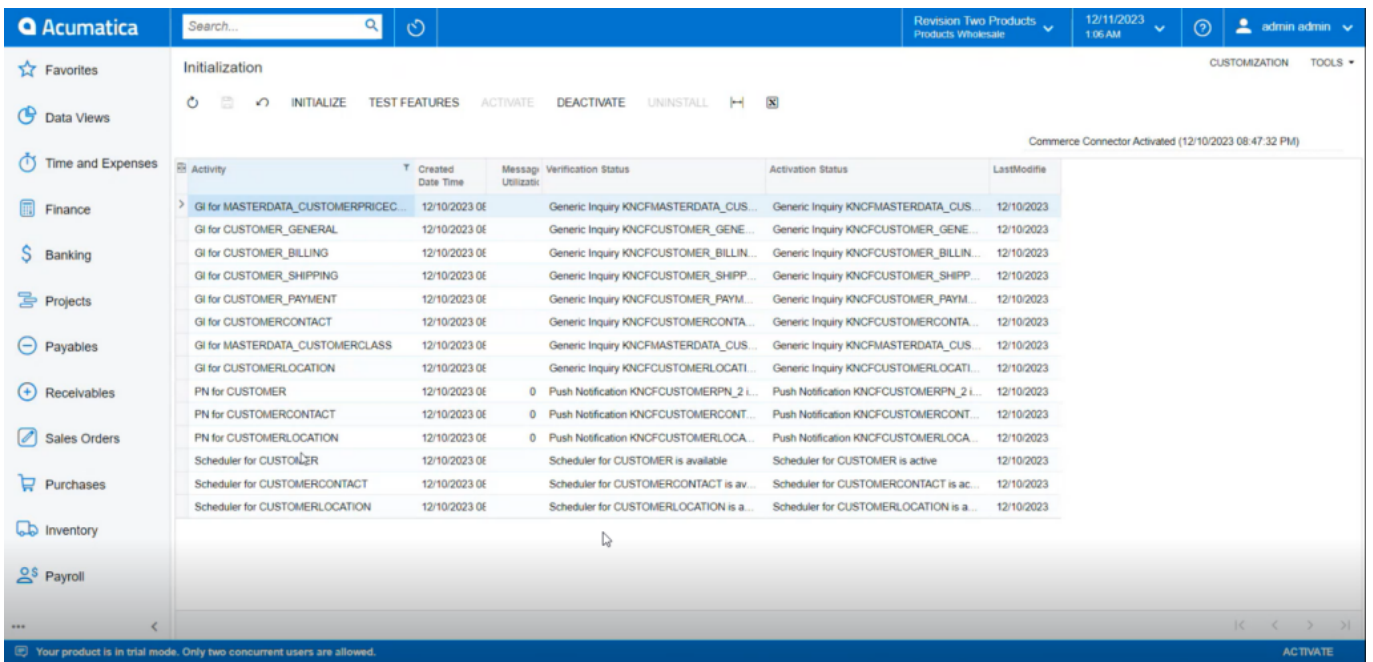

The screenshot shows the Acumatica 'Generic Inquiry' interface. A modal window titled 'Select - Inquiry Title' is open, displaying a list of tables with checkboxes for selection. The tables listed include:

- KNCFCUSTOMER_BILLINGGI_2
- KNCFCUSTOMER_GENERAL...
- KNCFCUSTOMER_PAYMENT...
- KNCFCUSTOMER_SHIPPING...
- KNCFCUSTOMERCONTACTGI...
- KNCFCUSTOMERLOCATIONG...
- KNCFINVOICEGI_2
- KNCFITEMSALESCATEGORY...
- KNCFMASTERDATA_ATTRIBU...
- KNCFMASTERDATA_BRANCH...
- KNCFMASTERDATA_CASHAC...
- KNCFMASTERDATA_COUNTR...
- KNCFMASTERDATA_CUSTO...
- KNCFMASTERDATA_CUSTO...

The interface also shows various configuration options on the right, such as 'Arrange Parameters in 3 columns', 'Select Top: 0 records', and 'Records per Page: 0'. The bottom status bar indicates 'Your product is in trial mode. Only two concurrent users are allowed.'

All the general enquiries are created when we are creating the Initialization.

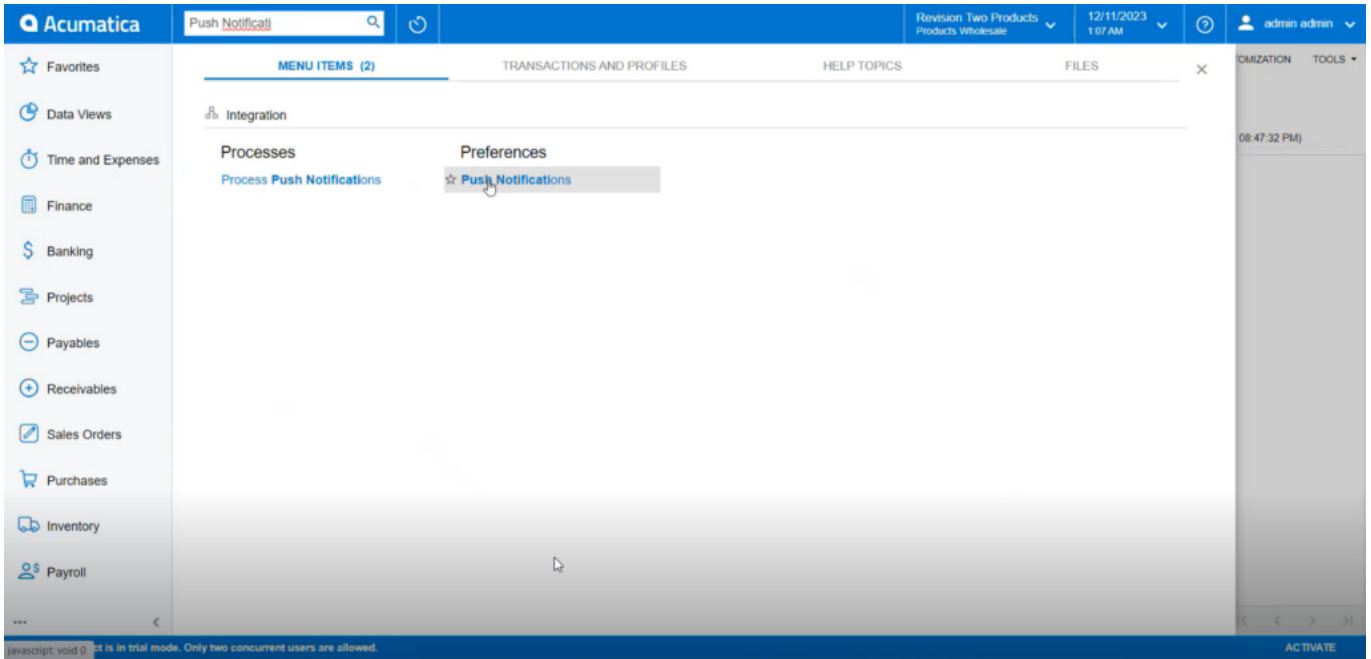

The screenshot shows the Acumatica 'Initialization' screen. A table displays the results of the initialization process, including activities, their creation dates, messages, verification statuses, and activation statuses. The table is as follows:

Activity	Created Date Time	Message Utilizati...	Verification Status	Activation Status	LastModifie

When you perform the [uninstall] action, this activated column is going to be deleted because you are cleaning the system and uninstalling the connector. So,

upon uninstalling all the GI, Push Notification and Activated schedulers are going to delete.
