Pop-Up for the Initialization

Upon clicking on [Yes] the initialization process will start. This will activate and initialize the scheduler for the same.

You will also have the option to [Deactivate], [Activate], [Uninstall], [Test Features].

During the process of Initialization, the GI [General Information] is created which needs to be added. If you perform any of the actions you will be able to view the action description along with the date and time stamp. The information is based on your last activity. For example, if you disable it will change and show the time and action type.

When you perform the [uninstall] action, this activated column is going to be deleted because you are cleaning the system and uninstalling the connector. So,

upon uninstalling all the GI, Push Notification and Activated schedulers are going to delete.
