

Managing Common Configuration

Upon applying for the license, the most important step is to configure through the Common Configuration. Under the **[Configuration]**, you will have an option of **[Common Configuration]** as shown below.

Option for Common Configuration

Upon clicking on the **[Common Configuration]** you will be redirected to the following screen.

The screenshot shows the Acumatica interface with the 'Commerce Connect...' module selected in the left sidebar. The main area displays the 'Common Configuration' page. Under the 'INDIVIDUAL SYNC STATUS' tab, a table lists various sync actions, each with an 'Active' checkbox. The table is highlighted with a red border.
