

Managing Customer Price Class Synchronization

To sync the customer price class, from Acumatica to B2B go to the **[Preferences]** in Acumatica. Upon clicking on the Preferences, you will be redirected to the Customer Class Screen.

Customer Class Screen

You need to add the Customer Price Class as shown below.

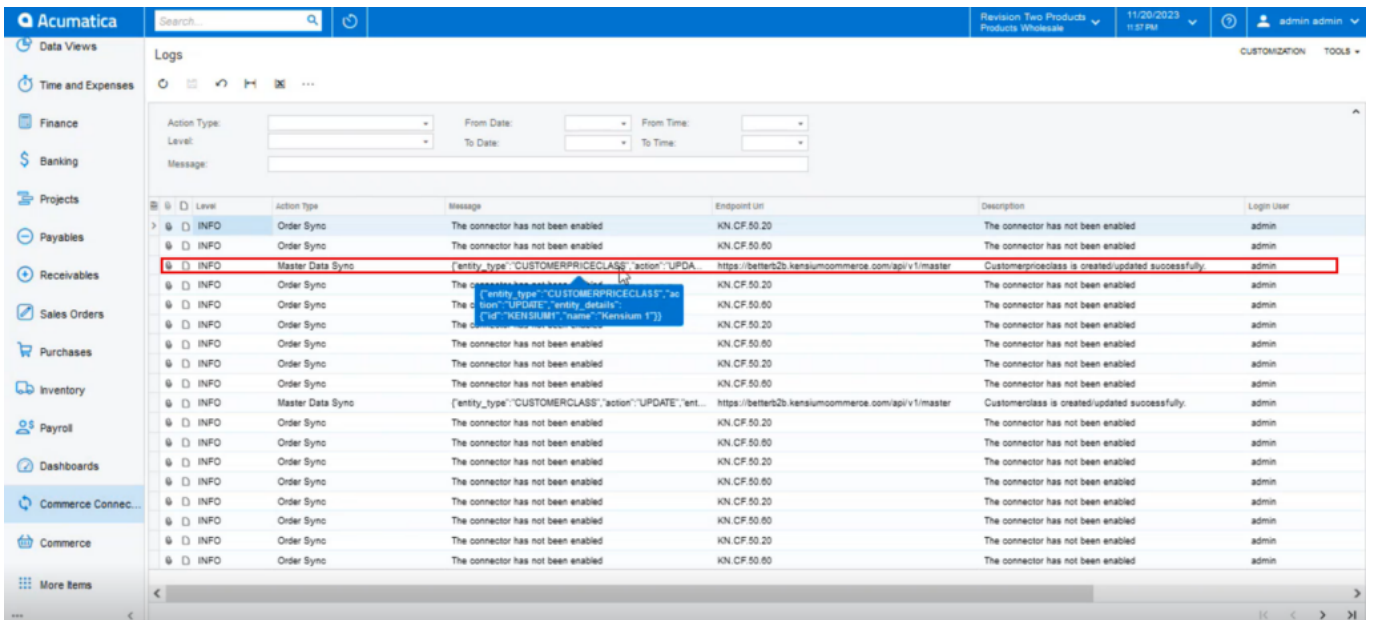

The screenshot shows the 'Customer Price Classes' screen in Acumatica. A table lists several price classes, with 'KENSIMUM1' highlighted in red. The table has columns for Price Class ID, Description, and Sort Order.

Price Class ID	Description	Sort Order
INTERCO	Related Company Pricing	4
KENSIMUM1	Kensium 1	1
RETAIL	Retail Pricing	1
WHOLESALE	Wholesale Pricing	2
WHOLESALE2	Wholesale Pricing - High Volume	3

Adding a Customer Price Class

Upon adding the **[Customer Price Class]** go to the Log screen under the **[Reports]**.

The screenshot shows the 'Logs' screen in Acumatica. A table displays log entries, with one entry highlighted in red. The highlighted entry shows a successful update of a customer price class. The table has columns for Level, Action Type, Message, Endpoint URL, Description, and Login User.

Level	Action Type	Message	Endpoint URL	Description	Login User
INFO	Order Sync	The connector has not been enabled	KN.CF.50.20	The connector has not been enabled	admin
INFO	Master Data Sync	[entity_type="CUSTOMERPRICECLASS";action="UPDATE";url="https://better2b.kensiumcommerce.com/api/v1/master"]	https://better2b.kensiumcommerce.com/api/v1/master	Customerpriceclass is created/updated successfully.	admin
