

Managing Payment Configuration in Settings

 This section allows you to enable the Payment Gateway. The application supports PayPal, Authorize.Net, Braintree and Apple Pay. For B2B you need to set up the Payment Configuration. Upon clicking on the Payment Configuration, you will be redirected to the following screen. These Payment methods are applicable for Invoice Payments only.

Payment Configuration page

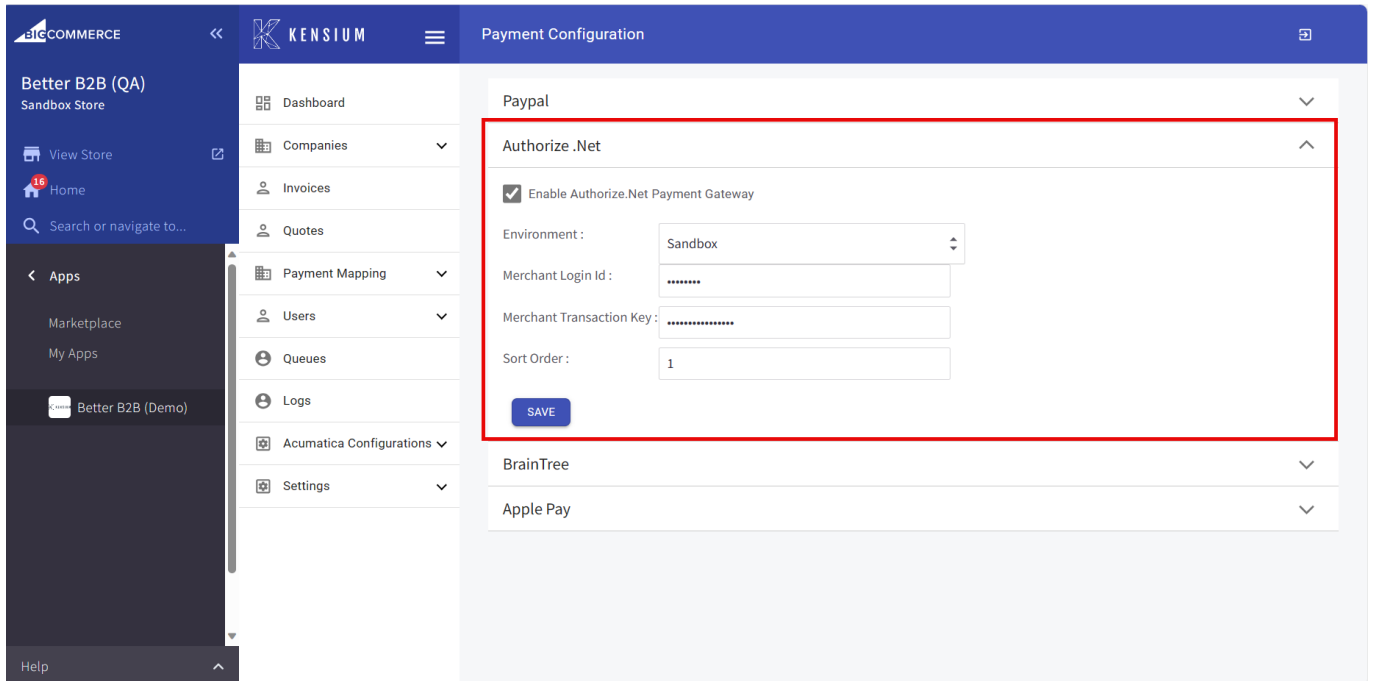

Note that, Payment methods for orders still respect the BigCommerce Payment Method Configuration.

1. PayPal: To enable PayPal you need to check the option for **[Enable Paypal Payment Gateway]**.
 - a. You need to select the [Environment].
 - b. Enter the client ID.
 - c. Enter the Sort Order.

Paypal Details in Payment Configuration

2. Authorize.Net: To enable Authroize.Net you need to check the option for **[Enable Authorize.Net Payment Gateway]**.
 - a. You need to select the [Environment].
 - b. Merchant Login ID: Enter the merchant login ID.
 - c. Merchant Transaction Key: Enter the merchant transaction key.
 - d. Sort order: Select the sort order.

Authroize.net Details in Payment Configuration

Braintree Details in Payment Configuration

4. Apple Pay: To enable Apple Pay you need to check the option for **[Enable Apple Pay Payment Gateway]**.
 - a. You need to select the [Environment].
 - b. Merchant ID: Enter the merchant ID.
 - c. Public Key: Enter the public key.
 - d. Private Key: Enter the private key.
 - e. Sort order: Select the sort order.

The screenshot displays the configuration interface for the BigCommerce B2B Connector. On the left is a dark sidebar with navigation options: 'Better B2B (QA) Sandbox Store', 'View Store', 'Home', 'Search or navigate to...', 'Apps', 'Marketplace', 'My Apps', 'Better B2B (Demo)', and 'Help'. The main content area is divided into two sections. The top section, 'Enable Braintree Payment Gateway', is checked and includes fields for Environment (Sandbox), Merchant ID, Public Key, Private Key, and Sort Order (2), with a 'SAVE' button. The bottom section, 'Apple Pay', is currently unchecked and includes fields for Environment (Sandbox), Merchant ID, Public Key, Private Key, and Sort Order (4), also with a 'SAVE' button. A red rectangular box highlights the Apple Pay configuration section.
