

Managing Queue Configuration

 The Queue Configuration in BigCommerce Better B2B is available under the Master Data in the Acumatica Configuration. If you have created a customer in Acumatica and want to sync it to B2B it will be stored in the Queue Configuration provided the option is enabled. If it's not enabled, it will be directly logged.

List of Queue Configuration

To enable the Queue Configuration, you need to check each of the checkboxes like customer create, customer update, customer delete, contact create, contact update, contact delete, address create, address update, address delete,
