

Managing Queue Configuration

 The Queue Configuration in BigCommerce Better B2B is available under the Master Data in the Acumatica Configuration. If you have created a customer in Acumatica and want to sync it to B2B it will be stored in the Queue Configuration provided the option is enabled. If it's not enabled, it will be directly logged.

List of Queue Configuration

To enable the Queue Configuration, you need to check each of the checkboxes like customer create, customer update, customer delete, contact create, contact update, contact delete, address create, address update, address delete,

Enabling the Queue Configuration

On sync from Acumatica to BigCommerce Better B2B if queues are enabled you will be able to see the Queue name, Pending Queues and Failed Queues.

The screenshot shows the 'Queues' page in the application. The left sidebar contains navigation options like 'Dashboard', 'Companies', 'Invoices', 'Quotes', 'Payment Mapping', 'Users', 'Queues', 'Logs', 'Acumatica Configurations', and 'Settings'. The main content area displays a table of queues with columns for 'Queue Name', 'Pending Queues', and 'Failed Queues'.

Queue Name	Pending Queues	Failed Queues
Acumatica To B2B Company Sync	0	0
Acumatica To B2B Contact Sync	0	0
Acumatica To B2B Location Sync	0	0
Acumatica To B2B Invoice Sync	0	0
Acumatica To B2B Quote Sync	0	0
Acumatica To B2B MasterData Sync	0	0
B2B To Acumatica Location Sync	0	0

Queues details screen

For the [Failed Queues] you will have the option to [Retry Fail Jobs] under Failed Queues.

The screenshot shows the 'Failed Queues' page. It features a 'Retry Failed Jobs' button at the top. Below it is a table with columns for 'UUID', 'Queue', 'Payload', 'Exception', and 'Failed Time'. The table currently displays 'No Queues' and has a 'View 20' link at the bottom right.

UUID	Queue	Payload	Exception	Failed Time
No Queues				

Option to Retry the Failed Jobs
