

Setting Up Kensium Commerce in BigCommerce

Under the Acumatica Configuration, you will find the option for Kensium Commerce. Here you need to enter the Configure Site ID, Connector Type and Store Name. The store name which you have created within the Acumatica BigCommerce Store should be entered here and saved.

The screenshot displays the 'Kensium Commerce' configuration page. The left sidebar lists various navigation options, including 'Acumatica Configurations' which is expanded to show 'Kensium Commerce'. The main content area has a title 'Kensium Commerce' and a 'SAVE' button. The configuration fields are as follows:

| Field | Value |
|-----------------|----------------------------|
| Config Site ID: | B2BQAStore |
| Connector Type: | KNBetterB2B.KNB2BConnector |
| Store Name: | B2BQAStore |

Enter the Store Name the same as entered Acumatica
