

# Configuring **KNCentralizedLicenseConsole** From 23R1

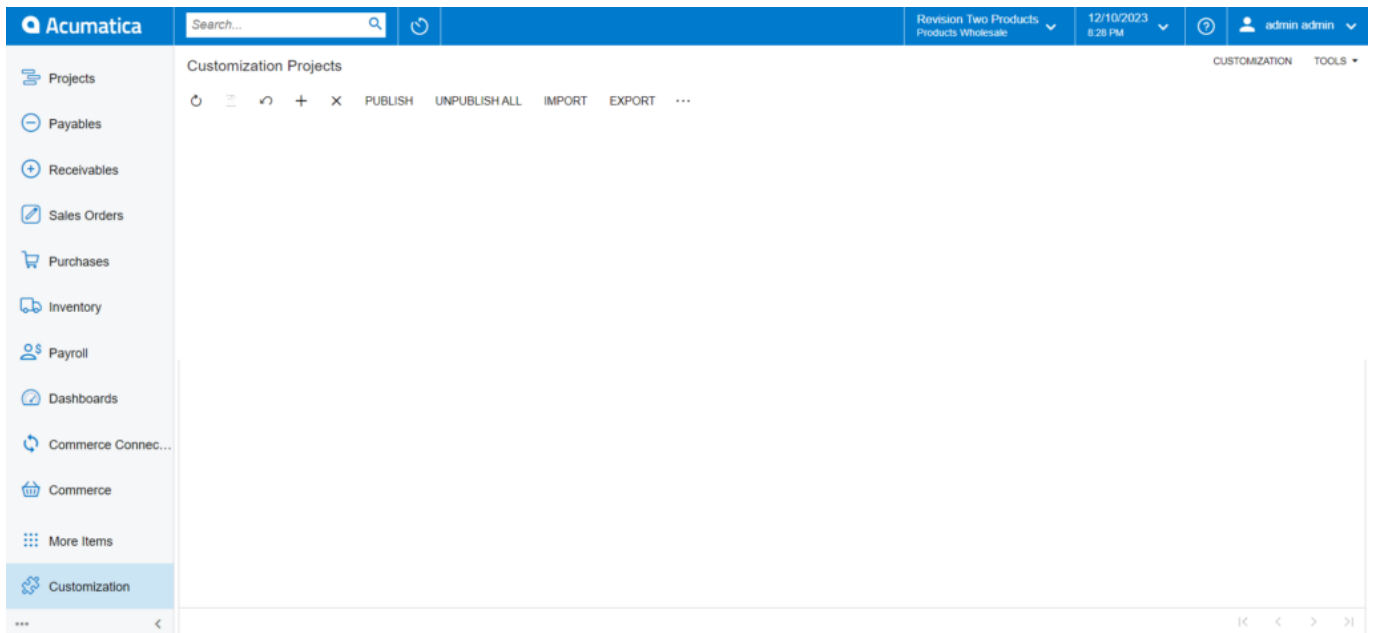

**Centralized License Console**, a potent solution for simplified license administration across our product line, is now **Available**. Whether you use one or more product packages, this integrated license module acts as a central hub for effectively managing licenses. A single download of this package will enable you to use the new module, which is available starting with version 23R1.

We are publishing the **[KNCentralizedLicenseConsole]** package in the instance.

- **New customers:** The New Refactored **[KNCentralizedLicenseConsole]** package will be published in the client instance.
- **Existing Customers:** Before Publishing the new License packages, All the existing product packages should be updated with new Packages which are compatible with the new licensing engine.
  - A Clean-up Script will be run to remove all existing License tables.
  - The new Refactored **[KNCentralizedLicenseConsole]** package will be published in the client instance.

To configure the **[KNCentralizedLicenseConsole]**, you need to follow these steps.

- Save the .zip file of the **[KNCentralizedLicenseConsole]** package to the local hard drive.
- Click on the left panel in Acumatica and select **[More Items]**.
- Click on **[Customization]**, and you will be redirected to the Customization Projects screen.

## Customization Projects

- Click on **[Import]**, and a pop-up will appear on the screen.

### Customization Projects

- Select the [**KNCentralizedLicenseConsole**] zip file from the local system and click on [**Upload**].

KENSIUM

# Braintree Plugin

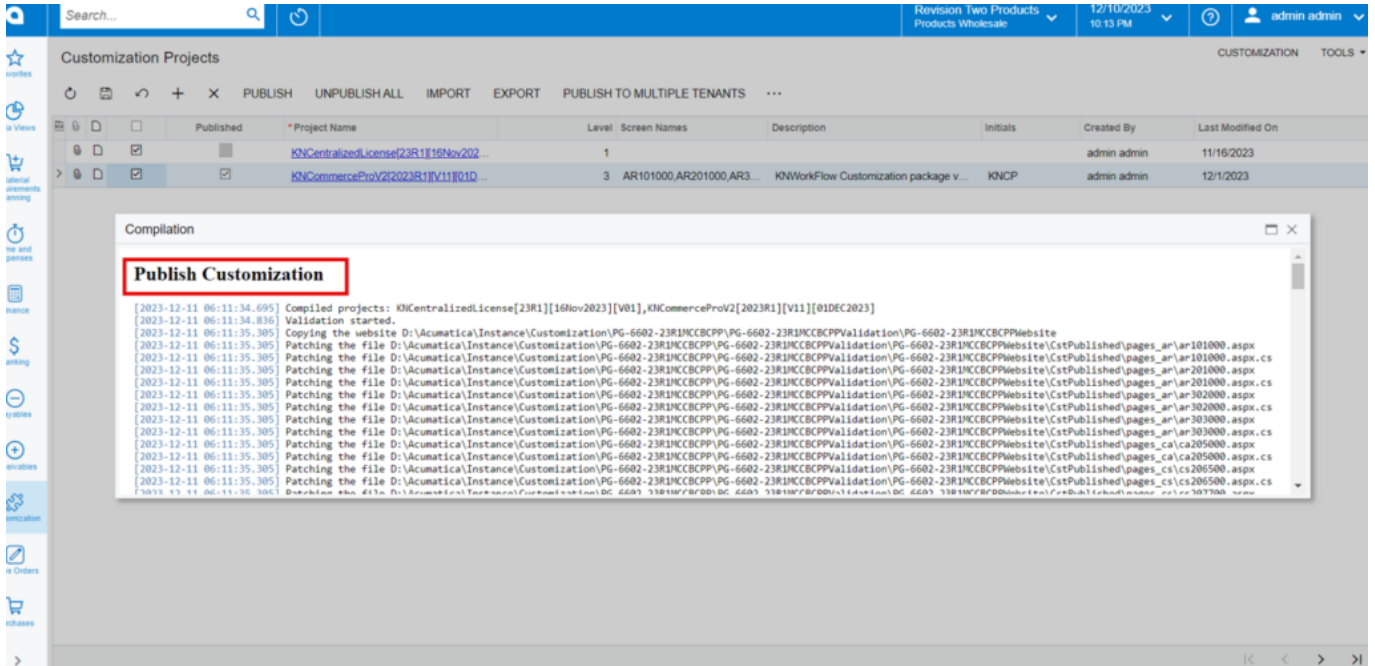

Upload the Zip File

- The file name will appear in the **[Project Name]** column.
- Select the checkbox/row of the project **[KNCentralizedLicense]**.

Click on Publish

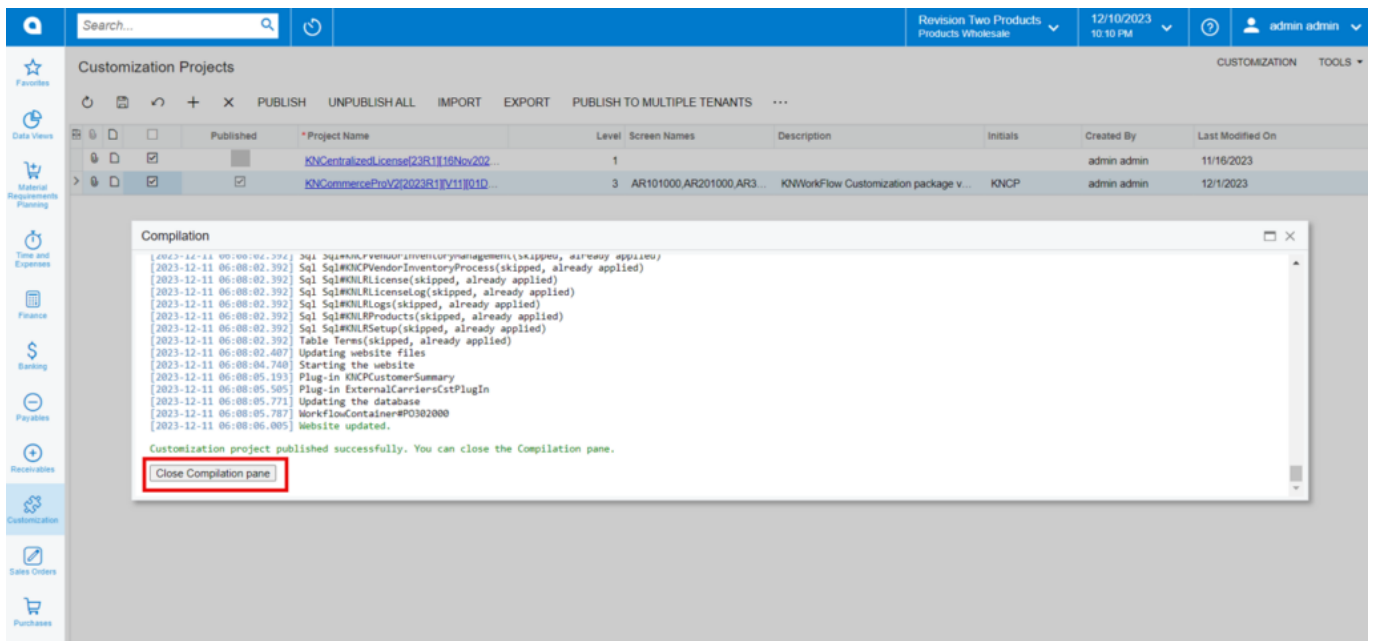

- Click on **[Publish]**.

The screenshot shows the 'Customization Projects' table with two rows. The second row is selected, and a 'Compilation' window is open over it. The window title is 'Publish Customization'. The log text inside the window shows the start of a compilation process for the project 'KNCommerceProv2[2023R1][V11][01DEC2023]'. The 'Publish Customization' button is highlighted with a red box.

### Publish Customization

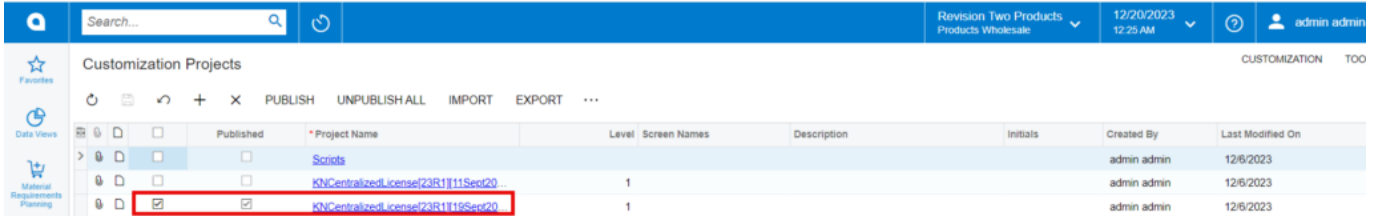

- Click on **[Close Compilation]**.

The screenshot shows the 'Customization Projects' table with the same two rows. The 'Compilation' window is still open, but the log text now shows the completion of the compilation process. The message 'Customization project published successfully. You can close the Compilation pane.' is displayed at the bottom of the window. The 'Close Compilation pane' button is highlighted with a red box.

## Close Compilation Pane

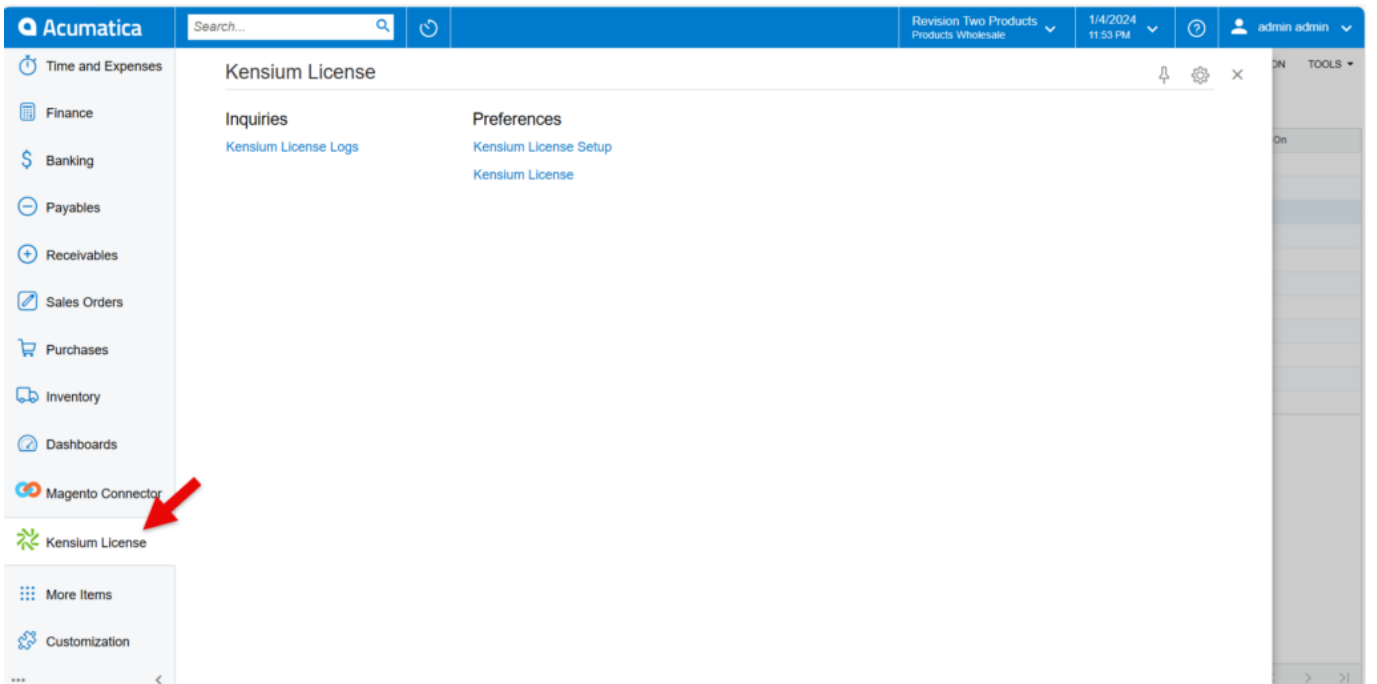

-  You can view the Published **[KNCentralizedLicense]** in the Customization Projects Column.
- You must Enable the check box.

## Package Published

- Click on **[Save]** to publish the **[KNCentralizedLicense]** package to the Acumatica instance.
- Once the packages are published **[Kensium license]** will be available.

The screenshot shows the Acumatica interface. On the left sidebar, the 'Kensium License' menu item is highlighted with a red arrow. The main content area displays the 'Kensium License' configuration page, which includes sections for 'Inquiries' (Kensium License Logs) and 'Preferences' (Kensium License Setup, Kensium License).
