

# Enable Custom Payment plugin in Enable/Disable Screen

Since Braintree is a custom plugin, it is mandatory to enable the Custom Payment Plugin settings.

- Navigate to More in Acumatica
- Select **[System Management]**.
- Click on **[Licensing]**.
- Select the **[Enable/Disable]** Features.
- Click on Modify Action and Select the Custom Payment Plugin Checkbox in the Integrating Card Processing section.
- Click on **[Enable Action]**.

# Braintree Plugin

The screenshot shows the 'Processing Centers' configuration screen for the Braintree plugin. The interface includes a left-hand navigation menu with categories like Favorites, Data Views, Time and Expenses, Finance, Banking, Projects, Payables, Receivables, Sales Orders, Purchases, and Inventory. The main content area is titled 'TEST CREDENTIALS' and contains the following configuration fields:

- Proc. Center ID: BRAINTREE
- Name: BRAINTRFF
- Cash Account: 10100 - Petty Cash
- Currency: USD
- Payment Plug-In (Type): BraintreeV2-Tokenized Proce...

There are also several checkboxes for payment settings:

- Allow Saving Payment Profiles
- Synchronize Deletion
- Accept Payments from New Cards
- Allow Unlinked Refunds

Below these fields is a 'PLUG-IN PARAMETERS' section with a table of configuration values:

ID	Description	Value
COMMODITY	Specify Commodity Code for Level 3	00765
ENV	Specify Environment of your Braintree Acc...	sandbox
LEVEL 3	Enable Level 3 Data Processing	<input type="checkbox"/>
MERACCTID	Specify Merchant Account ID. If not specifi...	Kensium
MERCHANTID	Specify Merchant ID of your Braintree Acco...	*****
