

# Processing center at Processing Centers screen by disabling Level3 Option

- Navigate to Banking in Acumatica
- Select **[Processing Centers]** under **[Credit Card Processing]**
- Create/Select new/Existing Processing Center with **[Active]** status.
- If we created the new Processing center, then follow the steps from **Setup Processing center & Setup Payment method** from above or Select the Existing Processing center.
- Select the Payment Plug-in (Type) as **[Credit Card]** in the drop down and enter all Braintree API details.
- Disable Level 3 option.

The screenshot shows the Braintree configuration interface. The 'PLUG-IN PARAMETERS' tab is selected, displaying a table of parameters. The 'LEVEL 3' parameter is highlighted, indicating it is the focus of the instruction.

ID	Description	Value
COMMODITY	Specify Commodity Code for Level 3	98765
