KENSIUM
Braintree Plugin

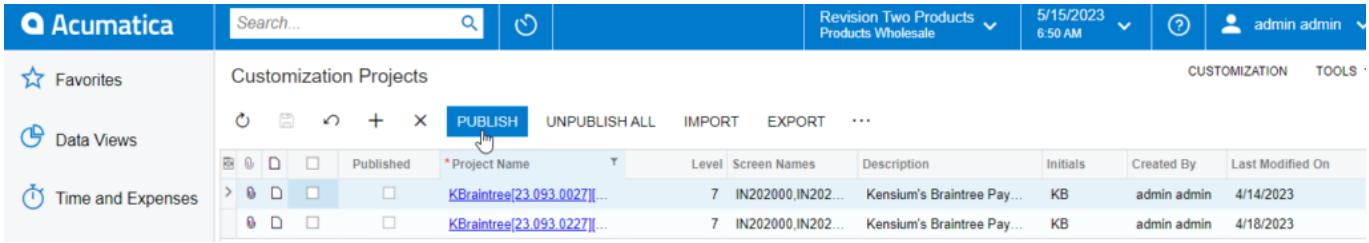

Upgrade Procedure

To avail the benefits of Braintree latest version we have to process the below two steps – i.e.,

- Unpublish the existing package.
- Publish the latest package availed.

Unpublish Solution

- Log in to the Acumatica instance under the tenant with the published Kensium Braintree plugin solution.
- Navigate to **Customization Projects** Screen.
- Select **More Items** and click on the **Customization option**.
- Click on **Customization Projects.**
- The **Customization Projects** will display the following:

Customization Projects Screen

- Clear the check boxes for the following customization project: BRAINTREE [Acumatica Version].
- Click **[Publish]** on the Toolbar to initiate the process and after the Compilation is complete, then Click **[Publish]** in the Compilation window to finalize publication.
- Sequentially select and delete (**X** in the toolbar) the rows with the solution packages unpublished in the previous step.

To Publish a Solution

- In the form toolbar, click **[IMPORT]**.
- Specify the **[File path]**, of the deployment package KBRAINTREE in the Open Package dialogue.
- Click **[UPLOAD]** Sequentially and navigate to individual Customization Projects deployed in steps.
- Click on **[Publish]** with Cleanup for each of them.
