

CommercePro Feature Management

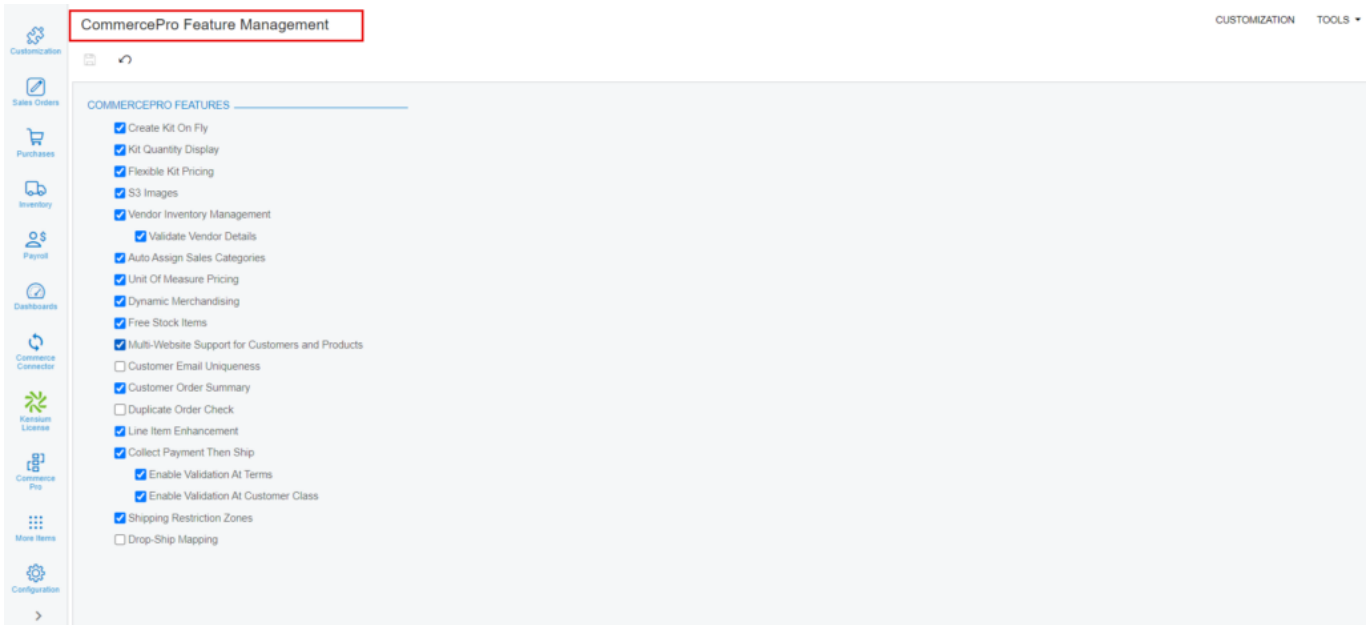

CommercePro Feature Management refers to the ability to control and configure features within the platform. This could include enabling or disabling certain functionalities or managing access permissions.

- To access **[Commerce Pro Feature Management]**, you need to navigate to the left side panel of **[Acumatica]** and click on **[CommercePro]**.
- Upon clicking, you will be redirected to Commerce Pro screen then click on **[Commerce Pro Feature Management]** under **[Preferences]**.

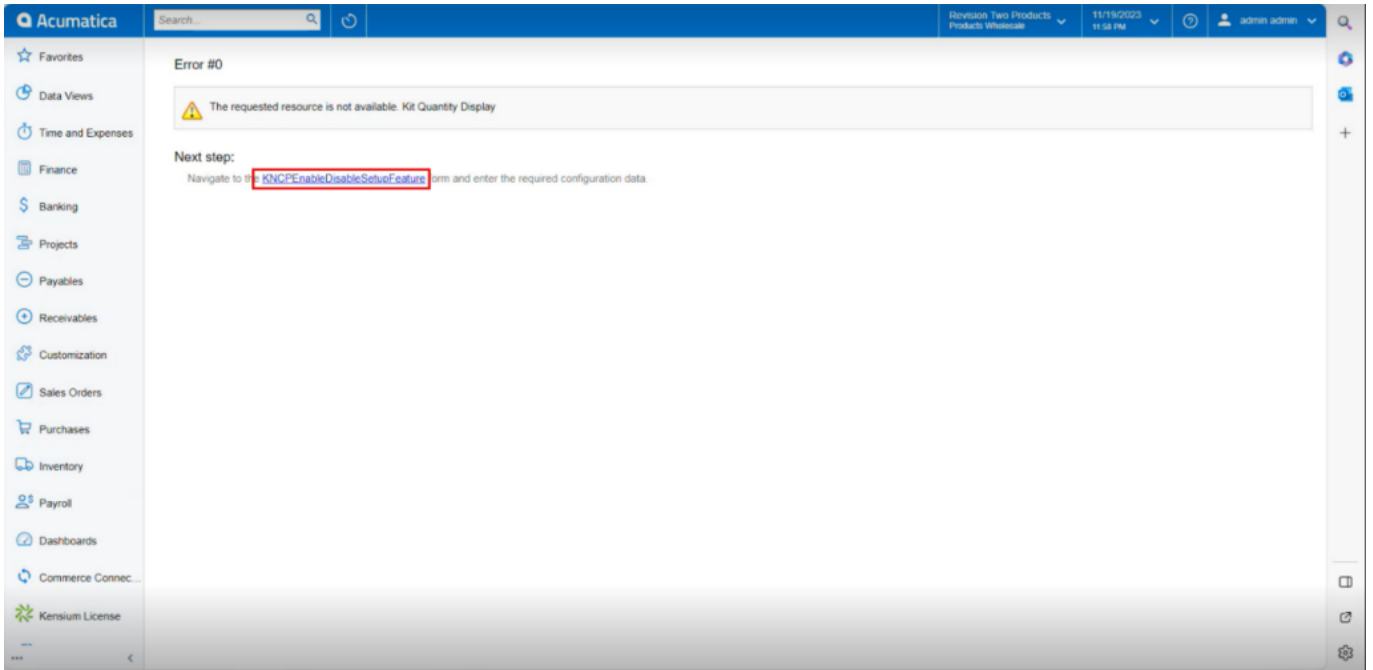

Commerce Pro

- You can view CommercePro features; these features will be accessible in stock items screen only if you enable Check boxes.

Commerce Pro Feature Management

- If you disable the check boxes and try to access the CommercePro features, will you get an error which is shown in the below screenshot.

The screenshot shows the Acumatica CommercePro interface. The top navigation bar includes the Acumatica logo, a search bar, and user information (Revision Two Products, Products Wholesale, 11/19/2023 11:34 PM, admin admin). The left sidebar lists various modules: Favorites, Data Views, Time and Expenses, Finance, Banking, Projects, Payables, Receivables, Customization, Sales Orders, Purchases, Inventory, Payroll, Dashboards, Commerce Connect, and Kensium License. The main content area displays an error message: "Error #0" with a warning icon and the text "The requested resource is not available: Kit Quantity Display". Below the error, a "Next step:" section instructs the user to "Navigate to the [KNCPEnableDisableSolveFeature](#) form and enter the required configuration data." The URL [KNCPEnableDisableSolveFeature](#) is highlighted with a red box.
