

# Calculate Kit QTY Process

If the sync is not getting updated in the stock items screen, you need to navigate to left side panel of Acumatica and click on CommercePro then click on **[Calculate Kit Qty Process]**.

## Calculate Kit Qty Process

- You need to enable the check box.
- Click on **[Process]**.

The screenshot displays the 'Calculate Kit Qty Process' window in the Kensium CommercePro application. The window title is 'Calculate Kit Qty Process' and it includes a search bar, a 'PROCESS' button (highlighted with a red box), and a 'Process All Products' checkbox. A 'Processing' dialog box is open, showing the message 'Processing completed, 00:01:07 Elapsed'. The dialog box contains a table with the following data:

Processed	Errors	Warnings	Remaining	Total
1	0	0	0	1

The dialog box also includes a 'CLOSE' button.
