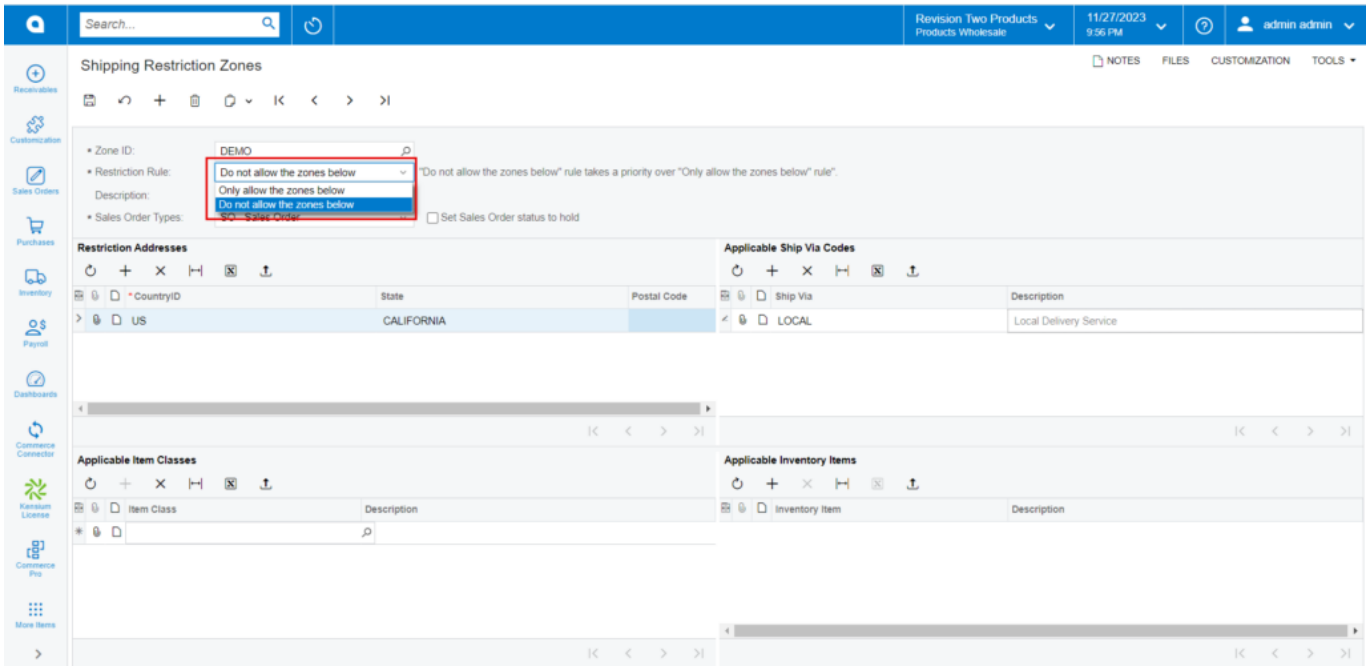
Do not allow the zones below

- Select **[Do not allow the zones below]** from the Restriction Rule.

It will check the requirements, and if a sales order meets any of them, shipment will not be produced because it is not permitted.



Restriction Rule

Restriction Addresses:

- Click on **[+]** icon.
- Search for **[Country ID].**
- Search for **[State].**
- Enter **[Postal Code].**

Applicable Ship Via Codes:

- Search for **[Ship Via].**
- You can add the Description.

Note: If the product is classified as an item class or item grid the restriction will apply based on Address

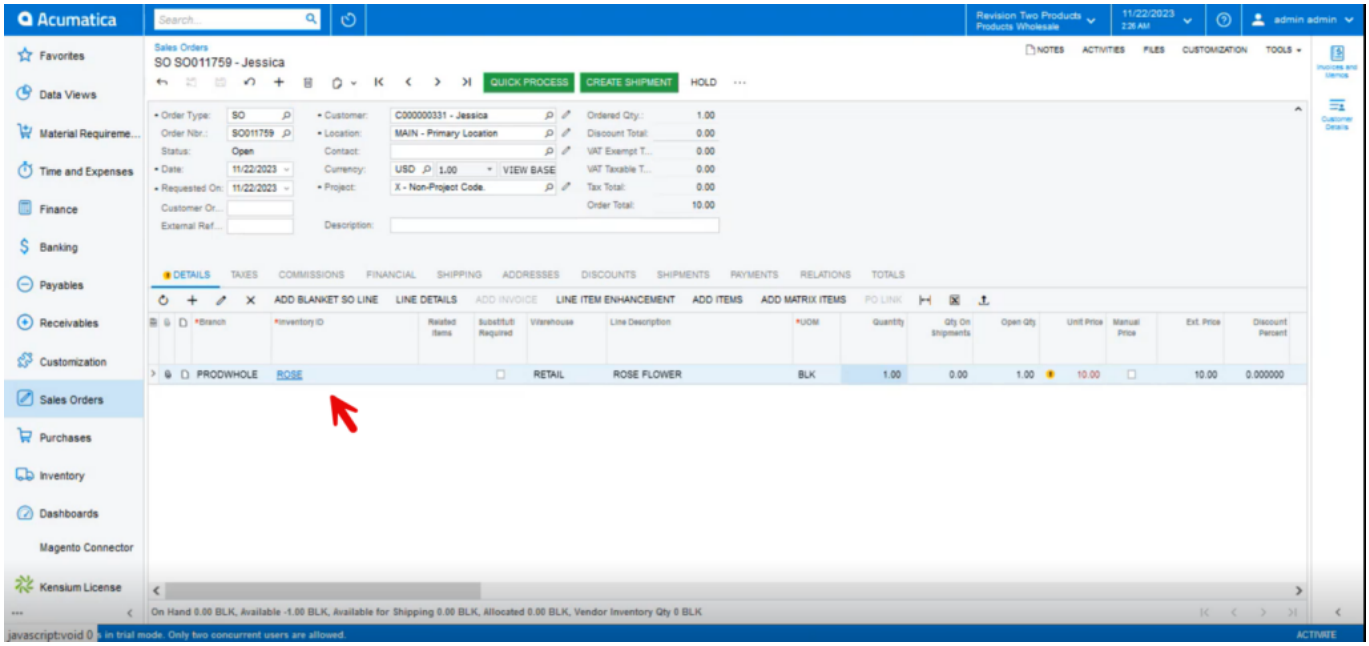
KENSIUM

and ShipVia.

Sales orders

- You need to navigate to the sales order screen.
- Search for the customer.
- Search for **[Inventory ID].**
- Enter the **[Quantity].**



Sales Orders

Before clicking on shipment check for shipping and addresses details that should be same as Restriction Addresses, Applicable Ship Via Codes details.

Note: The system will automatically prioritize the **[Don't Allow Restriction]** if both the allow and do not allow restriction are added for the same product.
