

Vendor Inventory Management

 Retailers with limited warehouse space and those that fulfill dropship orders can track the available inventory at the vendor location for a specific product. The user can enter the percentage of the vendor's available quantity to sale, along with the number of days to keep the inventory before replenishing the stock items again.

The system tracks vendor inventories by displaying the quantities on hand, as well as the quantities available by the vendor in the footer of the sales orders. This is beneficial to users when sales orders are received and quantities on hand are low. The feature allows users to know what is available for direct shipments from the vendor's inventory.

- To access **[Vendor Inventory Management]** you must enable the check box for **[Vendor Inventory Management]** under CommercePro Features.
- Click on **[Save]**.
- Vendor Inventory Management affects the following screens.
 - Branch wise Inventory Association
 - Update Vendor Inventory
 - ACM Vendor Inventory by details by date
 - Availability calculation Rules

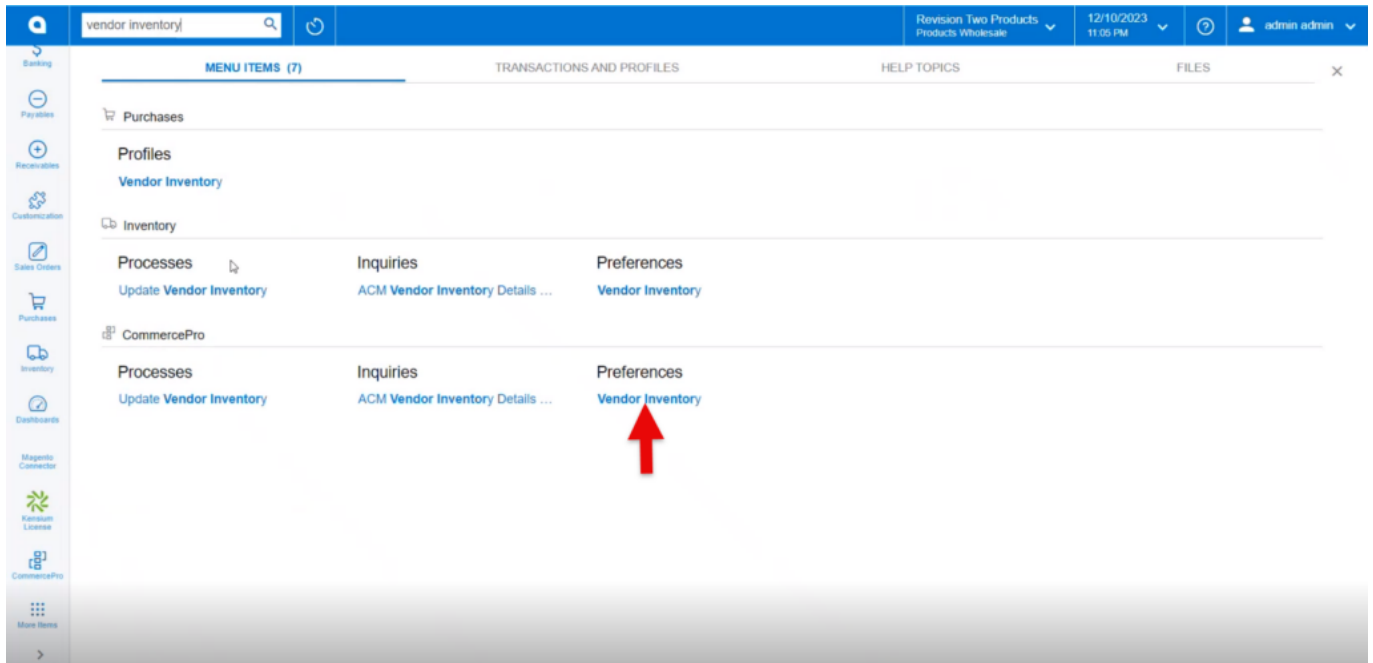

The screenshot shows the 'CommercePro Features Management' page. The 'Vendor Inventory Management' checkbox is checked and highlighted with a red box. A red callout box points to it with the text: 'Upon enabling vendor inventory Management the below check box will auto populated, so both the check boxes should be enabled'. Other features listed include 'Create Kit On Fly', 'Kit Quantity Display', 'Flexible Kit Pricing', 'S3 Images', 'Validate Vendor Details', 'Auto Assign Sales Categories', 'Unit Of Measure Pricing', 'Dynamic Merchandising', 'Free Stock Items', 'Multi-Website Support for Customers and Products', 'Customer Email Uniqueness', 'Customer Order Summary', 'Duplicate Order Check', 'Unique Customer Order Number', 'Unique External Reference Number', 'Line Item Enhancement', 'Collect Payment Then Ship', 'Enable Validation At Terms', 'Enable Validation At Customer Class', 'Shipping Restriction Zones', and 'Drop-Ship Mapping'.

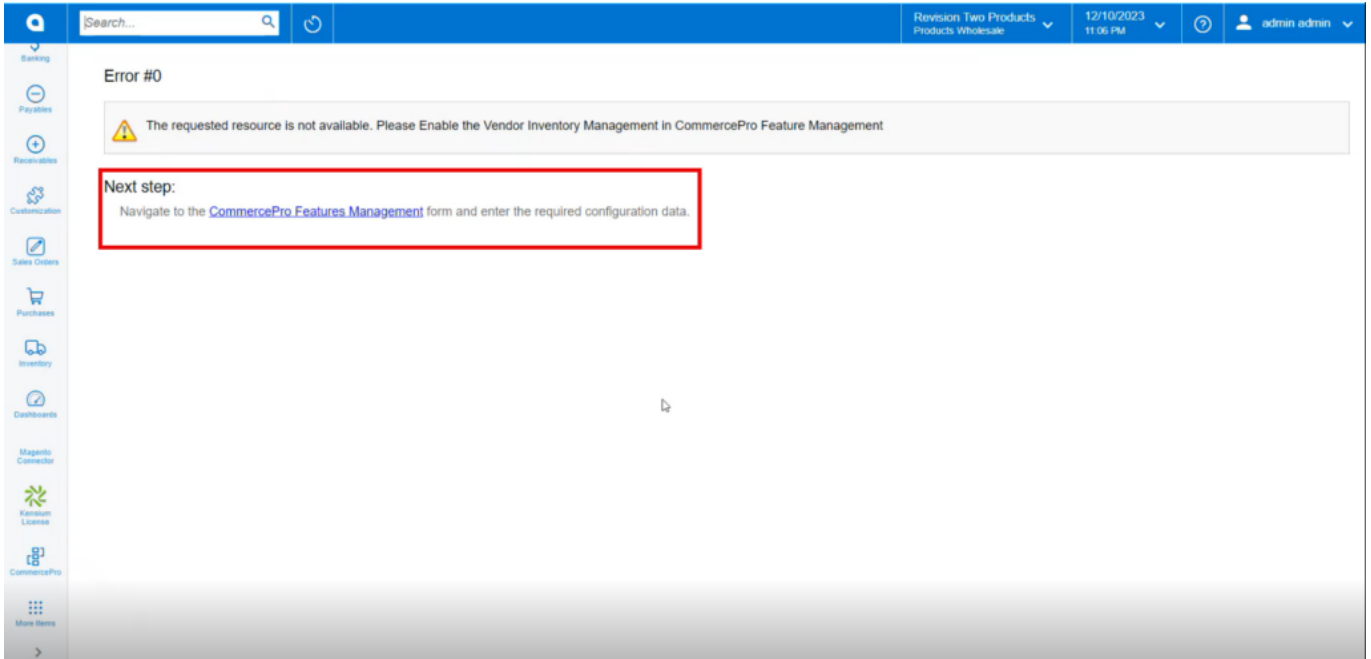

CommercePro Features

Upon enabling the check box for **[Vendor Inventory Management]**, one more check box **[Validate Vendor Details]** will be auto populated.

- You must enable the check box otherwise it will throw an error in the vendor Inventory screen.

Vendor Inventory

The screenshot shows a software interface with a blue header bar. On the left is a vertical navigation menu with icons for Banking, Payables, Receivables, Communication, Sales Orders, Purchases, Inventory, Dashboards, Magento Connector, Kensium License, and CommercePro. The main content area displays an error message: "Error #0" followed by a warning icon and the text "The requested resource is not available. Please Enable the Vendor Inventory Management in CommercePro Feature Management". Below this, a red-bordered box contains the text "Next step: Navigate to the [CommercePro Features Management](#) form and enter the required configuration data." The top right of the header bar shows "Revision Two Products Products Wholesale", the date "12/10/2023 11:06 PM", and the user "admin admin".

Alert Message

- Navigate to Branch wise inventory Association, Availability Calculation Rules.
