

Configure C-KITs Package

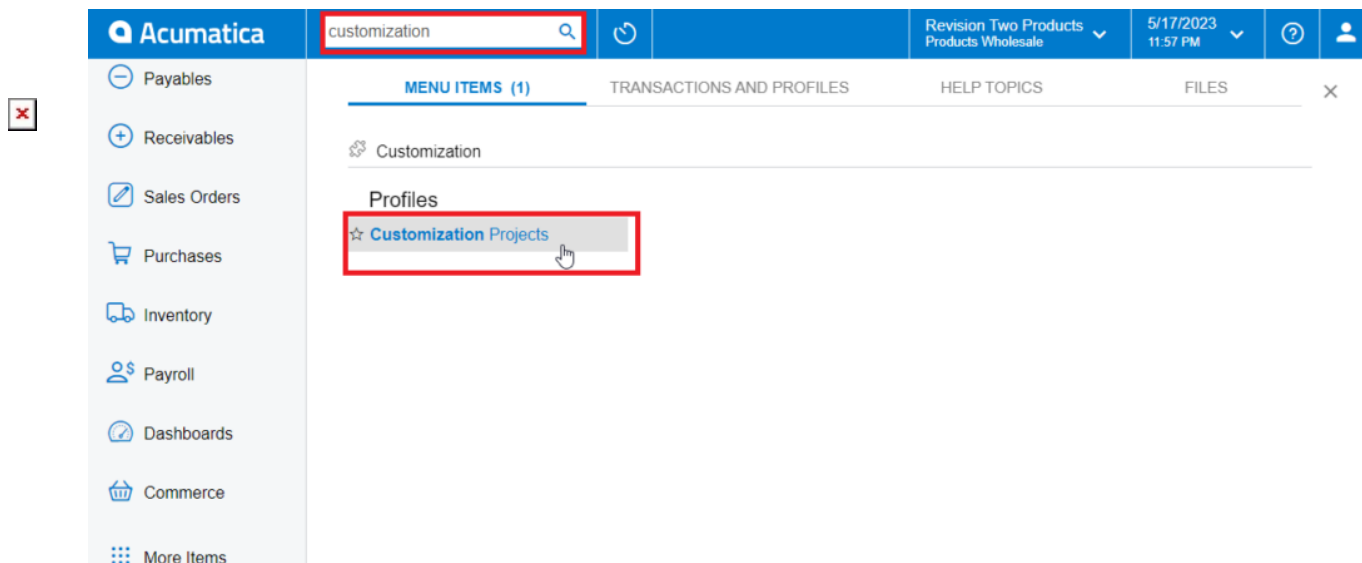

1. Save the .zip file of the **C-KITs** package to the local hard drive.
2. Go to the left navigation pane in Acumatica and choose **“More Items”**.
3. Click **“Customization”**.

Customization Projects

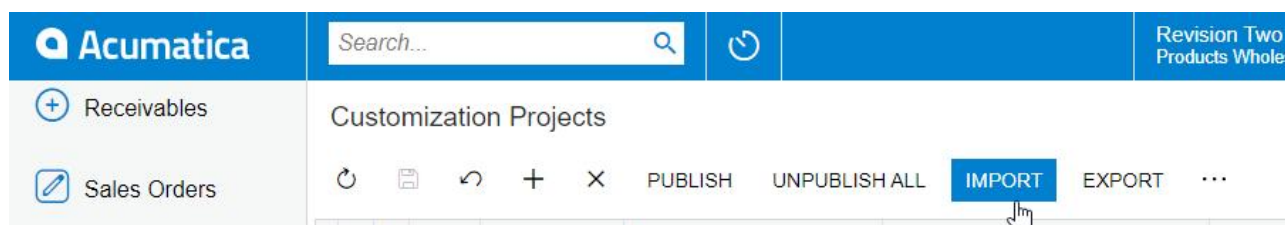

OR

Type the keyword as **“Customization”** in the universal search bar.

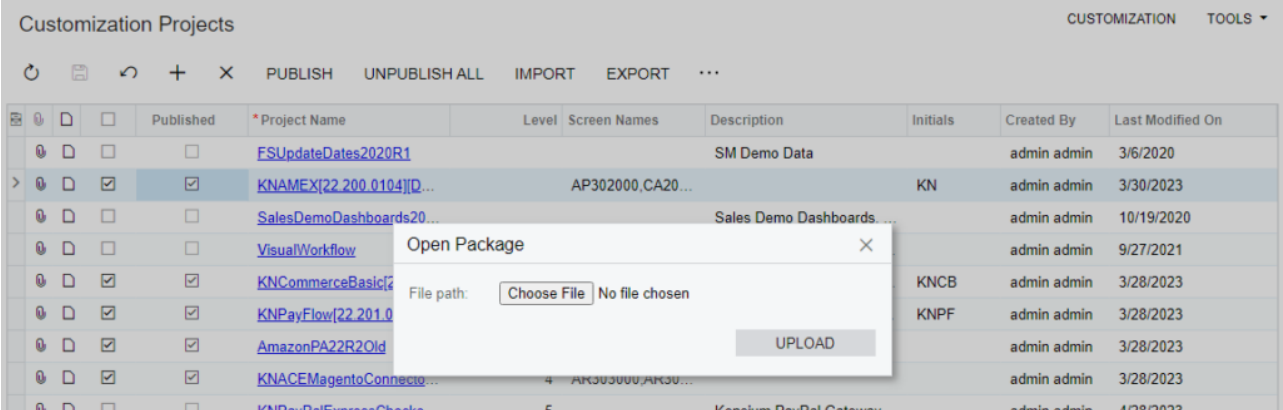

Customization Projects through search bar

4. Click **"Customization Projects"**.
5. Click the **"Import"** button.

Import product package

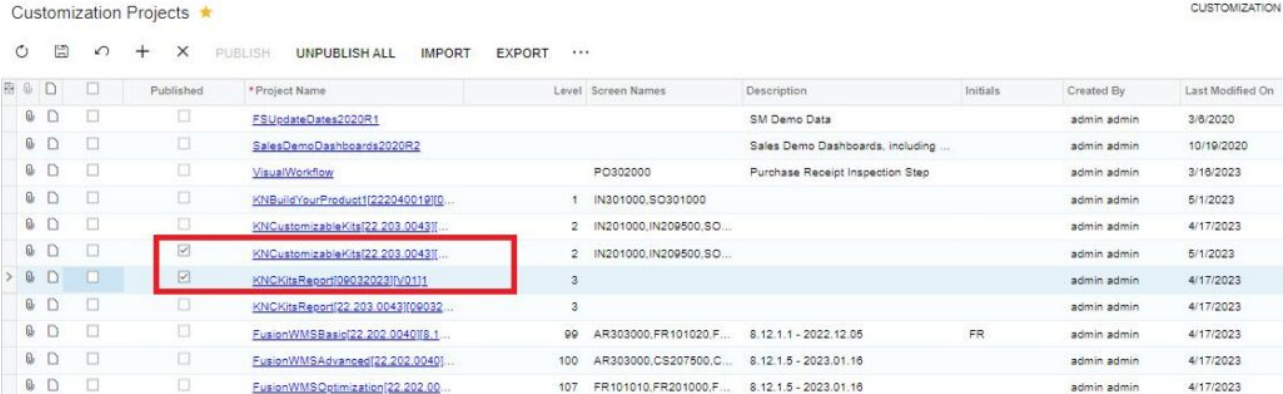

6. Select the **C-KITs .zip** file from your local desktop and click **Upload**.

The screenshot shows the 'Customization Projects' interface. A table lists various projects with columns for 'Published', 'Project Name', 'Level', 'Screen Names', 'Description', 'Initials', 'Created By', and 'Last Modified On'. An 'Open Package' dialog box is open, prompting the user to 'Choose File' or 'No file chosen', with an 'UPLOAD' button.

Upload product package from local desktop

7. The file name will appear in the **Project Name** column.
8. Select the checkbox/row of the project(**C-KITs**).

The screenshot shows the 'Customization Projects' interface. A table lists various projects. One row, 'KNCKitaReport[22.203.0043][V011]', is highlighted with a red box, indicating it is selected.

Select project and publish

9. Click the **Publish** button.
10. Click **Save** to publish the **C-KITs** package to the Acumatica instance.
