

Installation

when installing KensiumWMS Ship Station there are two pieces of software that work in conjunction with each other.

- 1. Acumatica Customization Package.
- 2. Kensium Ship Station MSI installation package "Kensium.ACM.WMS.Desktop.Setup.msi". This is the software the runs on the desktops. Pre Installation

Before installation can begin you will first need to download the required installation files. Contact your Kensium Installation Team member for a link to download the appropriate packages and installation files.

Once downloaded click on the installer. You will see the following screen appear.

Install Completed

Click Close. You have now installed Kensium. From here you can open the application by browsing to the location of where you installed the files. If you did not change the default you will find them here: C:\Program Files (x86)\KensiumIS\KensiumWMS Desktop for Acumatica.

Mode Selection

There are two modes of ship station. On the line: <add key="StartMode" value="ShipStation"> you can select one of the following items:

- 1. **ShipStation:** This is the standard packaging screen for the ship station.
- 2. Barcode: This will turn on the barcode printing features.
