

Viewing Schema APIs

 Schema data can be viewed in Acumatica to show what schema is being included within the API call. Once schema is selected (See Sec. 2.2.1-3), it will be included in the entity's API call to the commerce platform. Navigate to the Commerce Connector Workspace and find the APIs section. The following Schema can be viewed:

- Category
- Customer
- Product

Click one of the Schema options. The Output Json Return Value will display the hard coded form that includes all the schema field to be included in data transfers.

The screenshot shows the Acumatica interface with the 'Product Schema' selected. The left sidebar lists various modules: Finance, Time and Expenses, Payroll, Payables, Receivables, Sales Orders, Purchases, Inventory, Dashboards, Commerce Connector, More Items, and Customization. The main content area displays the 'Output Json Return Value' for the 'Product Schema'. The JSON data is shown in a text editor with a rich text toolbar. The JSON structure includes fields for 'GeneralSetting', 'General', 'Inventory ID', 'FieldSchema', 'Stock Item Summary', 'Data Type', 'Item Status', 'FieldSchema', 'Stock Item Summary', 'Data Type', 'Description', 'FieldSchema', 'Stock Item Summary', 'Data Type', 'Item Class', 'FieldSchema', 'General Settings -> Item Defaults', 'Data Type', 'String', 'Tax Category', 'FieldSchema', 'General Settings -> Item Defaults', 'Data Type', 'String', 'UOMConversions', 'SalesCategories', 'PriceList', 'Field', 'MSRP', 'FieldSchema', 'PriceCost Info -> Price Management', 'Data Type', 'Decimal', 'Field', 'Default Price', 'FieldSchema', 'PriceCost Info -> Price Management', 'Data Type', 'Decimal', 'Miscellaneous', 'Ecommerce', 'Field', 'Visibility', 'FieldSchema', 'Ecommerce -> Magento', 'Data Type', 'String', 'Field', 'Enabled for Magento Sync', 'FieldSchema', 'Ecommerce -> Magento', 'Data Type', 'Boolean', 'PackageDetails', 'PackageInfo', 'Boxes', 'CrossReference'.
