Introduction

Kensium Point of Sale is a full featured, retail management solution featuring POS, Gift & Loyalty, and eCommerce integration built for Sage merchants who won't compromise.

Benefits:

1. Reliable platform: KensiumPOS runs on any Windows devices ideal for stationary or mobile requirements.
2. No downtime: KensiumPOS unique design allows it to remain operable even without internet.
3. Increased efficiency: Seamless integration with Sage applications eliminates redundancies, lowers carrying costs and increases working capital.
4. Flexible Customer Types to fit your needs.
   a. **Sage Customers** – Sage customers are seamlessly synced to each KensiumPOS register or can be created at the register. KensiumPOS transactions are posted individually enabling for Cash & Carry or future fulfillment.
   b. **Marketing Customer** – When individual client history is critical, but it is not necessary to set the account up in Sage, Marketing customers can be used. With Marketing Customers, KensiumPOS retains all transaction data including payment methods and discounts but only inventory and payments are passed to Sage. Using KensiumPOS unique roll-up capabilities, this minimizes transactions counts for Sage posting.
   c. **Default Customer** – For quick transactions or customers unwilling to provide demographic data, there is always the KensiumPOS Default Customer. Like Marketing Customers, the KensiumPOS Roll-up feature can combine marketing customer transactions for posting into Sage.
5. Fulfillment Options. – All the bases covered.
   a. **Cash & Carry** – KensiumPOS allows for single step transactions with multiple payment types on each cash & carry transaction.
   b. **Sage Fulfilment** – For special orders, out of stock, or where a shipment is required, KensiumPOS can create a Sales Order in Sage for future fulfillment.
   c. **Mixed Mode** – When a transaction requires both carry out and future fulfillment KensiumPOS can manage that with only one payment record.
   d. **BOPIS / BORIS** – Because of its tight integration with Sage, KensiumPOS can also handle in store pick up and return of items purchased online.
6. Increased efficiency and visibility: KensiumPOS is an extension of Sage. Purchasing, Inventory movement and pricing, Customer management, etc. are all managed by Sage. While KensiumPOS may extend Sage to a retail environment, Sage remains the one source of up-to-date information – One Source of Truth.

	Note that, Kensium POS currently supports the Sage 100 and Sage 300 only.
