Version 5.2.2

Release notes now include new features and bug fixes for all POS components. These components include:

- POS Server
- Kensium Register
- POS Sage Customization Package
- ASI & Comms

Bug Fixes / Critical Improvements

553 Sage ASI – The invoices are not created with the correct branch in the financial tab

- Support for ASI 21R2 is included.

513 ASI – XML – XML ASI Build changes to support TLS 1.2

- TLS 1.2 support is included.

515 ASI-Sage 500 – Refund error – GetPendingInvoiceTaxTotal()

- An option is included to switch to lower TLS version compatibility.

516 Register – Comms crash while attempting to connect to Kensium database

- Fixed issue with fusion database.

507 POS Server – Fortis duplicate Ref No error is not clear

- Improved the error message when Fortis sends a duplicate reference message.

508 POS Server – POS Tenant Manager does not show in default site startup recipes

- The POS Tenant Manager option is included when configuring the default tenant.
