Location Groups

Menu: Stores & Locations / Locations

Feature: Locations

Editions: Cloud, Corporate, Store

Location groups are used to represent collections of locations. Every location can belong to one or more location groups.

Some purposes of locations groups are to:

- Identify which locations are available for order fulfillment and pickup. Checkout methods – which configure the mobile checkout process – use the location groups for this purpose.
- Identify which locations must be matched when using loyalty point rules.

Standard Fields

- Code is a unique identifier for the location group.
  - This value may be referenced by other systems, including during import and export.
  - The value cannot be changed after the location group is first saved, unless the clerk has Change Codes permission.
- Name is the name of the location group. This value is not displayed to customers.
- Note is an optional note about the location group. This value is not displayed to customers.
