SQL Updates

In most cases, new versions of RMS will perform automatic database migrations when they are first run. This can include adding, updating and editing fields.

In some cases, manual changes to a database are required. The release notes describe when these manual changes are necessary.

This section is a reference to the SQL scripts that can be used to perform the manual database changes.

SQL Topics

- Import OnLoyalty (4441)
- Open ID fix (5028)
- OnLoyalty Migration (5644)
