Version 5.2.7

Release notes now include new features and bug fixes for all POS components. These components include:

- Kensium Register
- ASI ACU
- ASI Sage

a) New Features

916 ASI Sage – Promotional Pricing

- integration to make some limited promotional pricing items available at the register for POS transactions.

b) Bug Fixes / Critical Improvements

921 ASI ACU – KensiumASI Downsync – Message: Object reference not set to an instance of an object

- Fix download customers in method UpsertCustomers.

648 Kensium Register – Quote can be opened at multiple registers at the same time

- Validation is added to open the same quote in different Registries, in order to do so the permission of an administrator is required.

686 ASI Sage – Incorrect AvaTax Calc in Sage 500 SOs created by Kensium ASI

- Fix was to add ASI configuration for separate Tax Schedules for 'Customer Present' and 'Customer Not Present' POS transactions.
