

About Page

This feature allows the user to see the WMS version and license details such as App Version, Scanned ID, license status, Core Package, and Acumatica Version and the user will be able to do 2 actions: Refresh the License and Reset the license.

About Page

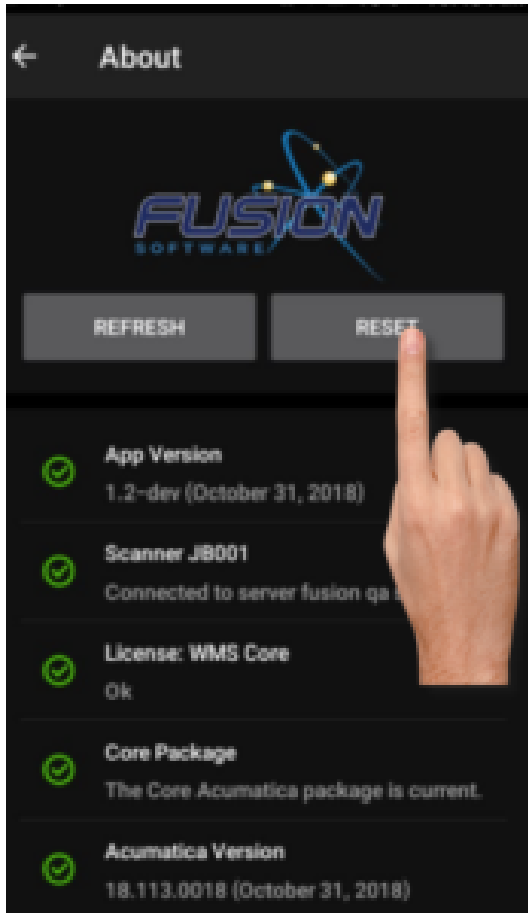

Tap Refresh to refresh license information from the license server.

1. Reset License

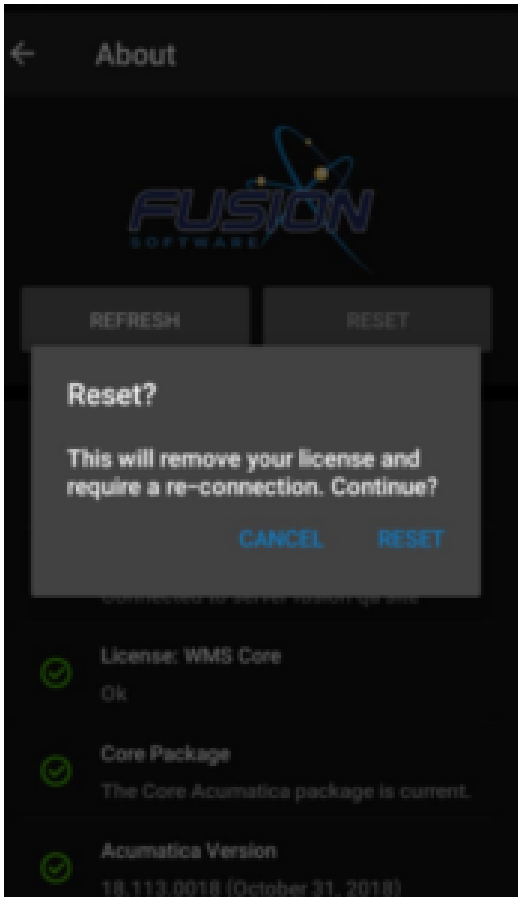

If the user press on the reset button, the license of the user will be removed and the user will require to get a new license, a new window will be shown asking the user to continue.
