

Configurable Product Supported in OrderPad

The configurable Products are supported in OrderPad. The configurable product which you create in Acumatica will be synced to OrderPad.

Illustration.

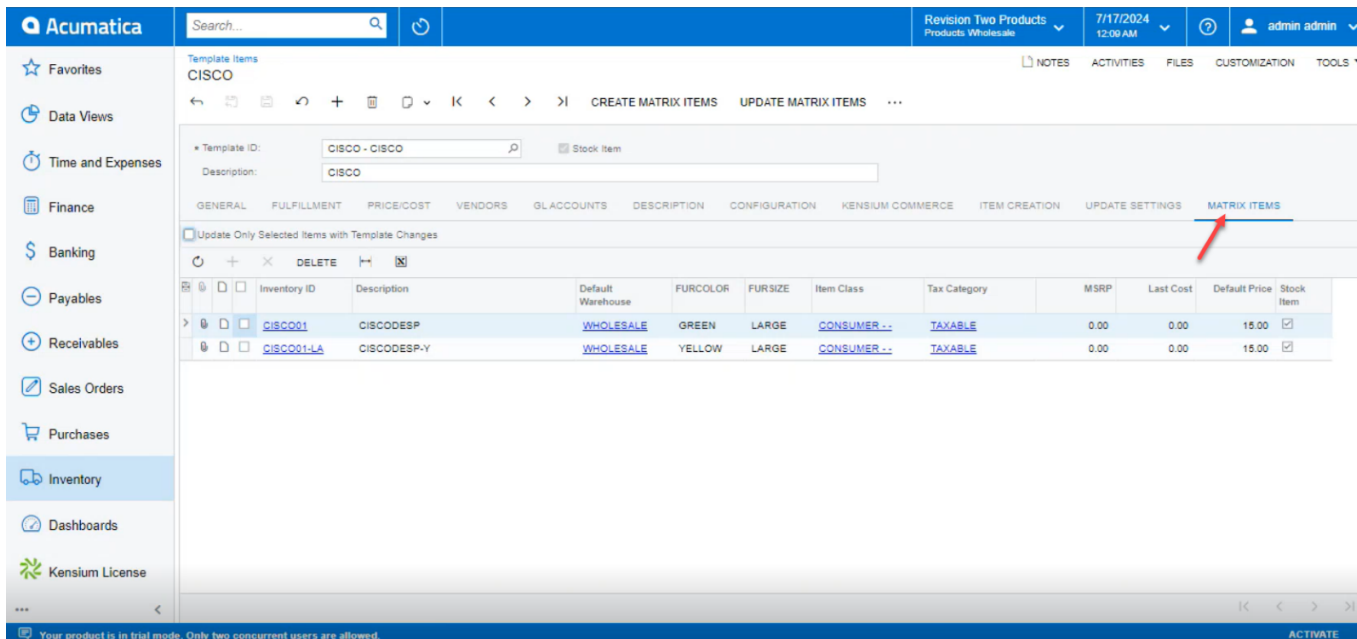

- Navigate to Acumatica and go to Template Items. Create a Configurable product here.

The screenshot shows the Acumatica interface for creating a Template Item. The top navigation bar includes the Acumatica logo, a search bar, and user information (admin admin). The left sidebar lists various business functions like Favorites, Data Views, Time and Expenses, Finance, Banking, Payables, Receivables, Sales Orders, Purchases, Inventory, Dashboards, and Kensium License. The main content area is titled 'Template Items' and shows a product named 'CISCO'. The 'FULFILLMENT' tab is selected, displaying various default settings for the item, including Item Status (Active), Item Class (CONSUMER), Type (Finished Good), Valuation Method (Average), Tax Category (TAXABLE), Posting Class (CON), Lot/Serial Class (NOTTRACKED), Country Of Origin, Warehouse Defaults (WHOLESALE), and Physical Inventory settings (PI Cycle, ABC Code, Movement Class). The 'UNIT OF MEASURE' section shows Base Unit (EA), Sales Unit (EA), and Purchase Unit (EA), all marked as Divisible Units. A status bar at the bottom indicates 'Your product is in trial mode. Only two concurrent users are allowed.' and an 'ACTIVATE' button.

Creating Configurable Product

- Add the Matrix Items.
