

Licensing Process

Configuring KNCentralizedLicenseConsole

Centralized License Console, a potent solution for simplified license administration across our product line, is now **Available**. Whether you use one or more product packages, this integrated license module acts as a central hub for effectively managing licenses. A single download of this package will enable you to use the new module which is available starting with version 23R1.

We are publishing the **[KNCentralizedLicenseConsole]** package in the instance.

- **New customers:** The New Refactored **[KNCentralizedLicenseConsole]** package will be published in the client instance.
- **Existing Customers:** Before Publishing the new License packages, All the existing product packages should be updated with new Packages compatible with the new licensing engine.
 - A Clean-up Script will be run to remove all existing License tables.
 - The new Refactored **[KNCentralizedLicenseConsole]** package will be published in the client instance.

To configure the **[KNCentralizedLicenseConsole]**, you need to follow these steps.

1. Save the .zip file of the **[KNCentralizedLicenseConsole]** package to the local hard drive.
2. Click on the left panel in Acumatica and select **[More Items]**.
3. Click on **[Customization]**, and you will be redirected to the Customization Projects screen.

Customization Projects

- Click on **[Save]** to publish the **[KNCentralizedLicense]** package to the Acumatica instance.
- Once the packages are published **[Kensium license]** will be available.

The screenshot shows the Acumatica interface. On the left sidebar, the 'Kensium License' option is highlighted with a red box and an arrow. The main content area displays 'Kensium License' with sub-sections for 'Inquiries' (Kensium License Logs) and 'Preferences' (Kensium License Setup, Kensium License). The bottom status bar indicates 'Your product is in trial mode. Only two concurrent users are allowed.' and an 'ACTIVATE' button.

Kensium License
