

Configuring Kensium POS

You need to configure Kensium POS within the OrderPad Admin. Upon clicking on Kensium POS on the left panel you will have the following options.

- Configuration
 - POS
 - Roles
 - Print Receipt
 - Retail Location
- RMS
 - Terminals
 - Terminals Location Mapping

Options under POS

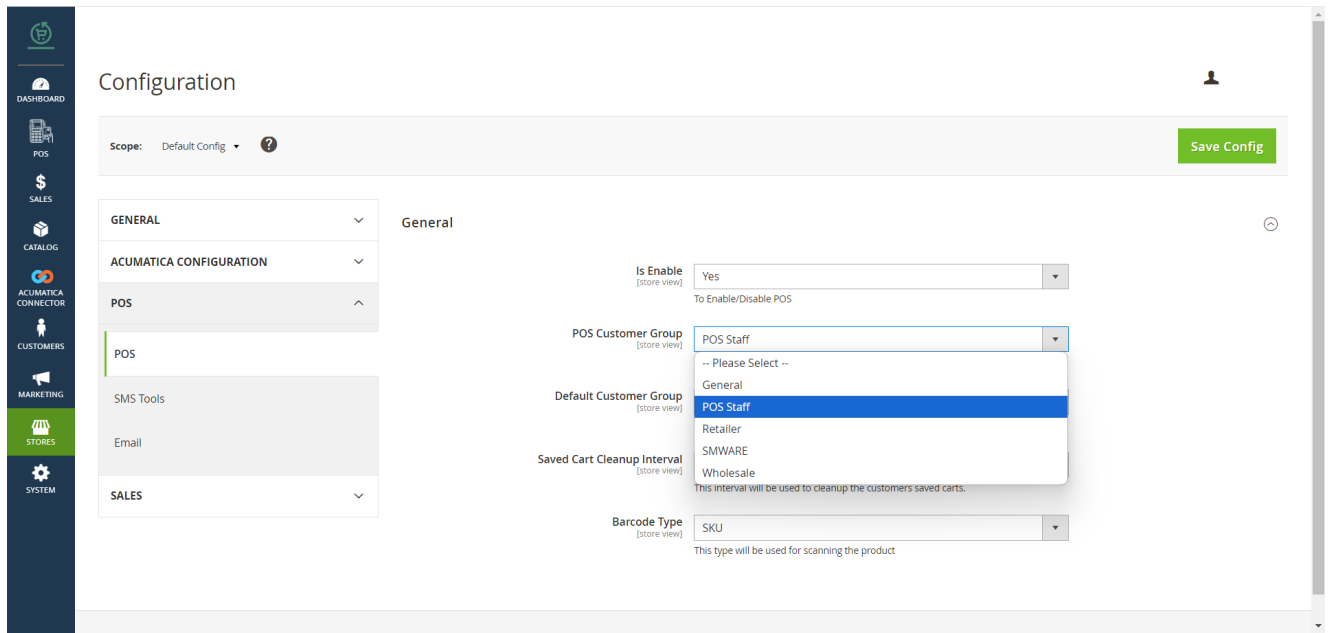

Upon clicking on the POS, you will be redirected to the POS Configuration Screen.

You need to select the following to configure & Enable the OrderPad.

Field	Field Type	Description
KENSIUM POS (General)		

Is Enable	Dropdown Selection	<p>Options available</p> <ul style="list-style-type: none"> • Yes • No <p>Select [Yes] to enable the OrderPad. By selecting No, OrderPad will be disabled.</p>
POS Customer Group	Dropdown selection	<p>The staff created in the OrderPad will be treated as a customer and this option lets you configure the C in Acumatica. You will get an option to map the POS Customer Group for the Staff members.</p> <p>The staff created in the POS Customer Group should be mapped Acumatica Customer Class and Acumatica Price Class for any special discounts to Staff.</p>

Default Customer Group	Dropdown Selection	<p>When a staff member is no longer part of the organization, deleting them will keep them as customers in the OrderPad, but the Staff member's customer group will be changed to the one selected in this configuration. So, select the Customer group used for regular customers.</p>
------------------------	--------------------	---

<p>Saved Cart Cleanup Interval</p>	<p>Dropdown Selection</p>	<p>You can store the customer’s items in the saved cart, anticipating that the customer might return and continue after a certain period for order processing. In the meantime, you can proceed with serving other customers. If the customer doesn’t return, the record in the cart should be cleared. The saved order in the cart will be automatically deleted based on the hours configured during setup. The application enables you to set the cleanup interval within a range of 1-10 hours, and you must select the appropriate interval from the drop-down menu.</p>
<p>Barcode Type</p>	<p>Dropdown Selection</p>	<p>You have two alternatives: you can either scan the barcode affixed to the product or utilize the SKU (Stock Keeping Unit).</p>

The above details explain the General Configuration to connect with the OrderPad.
