

Add PayPal API Details to Acumatica

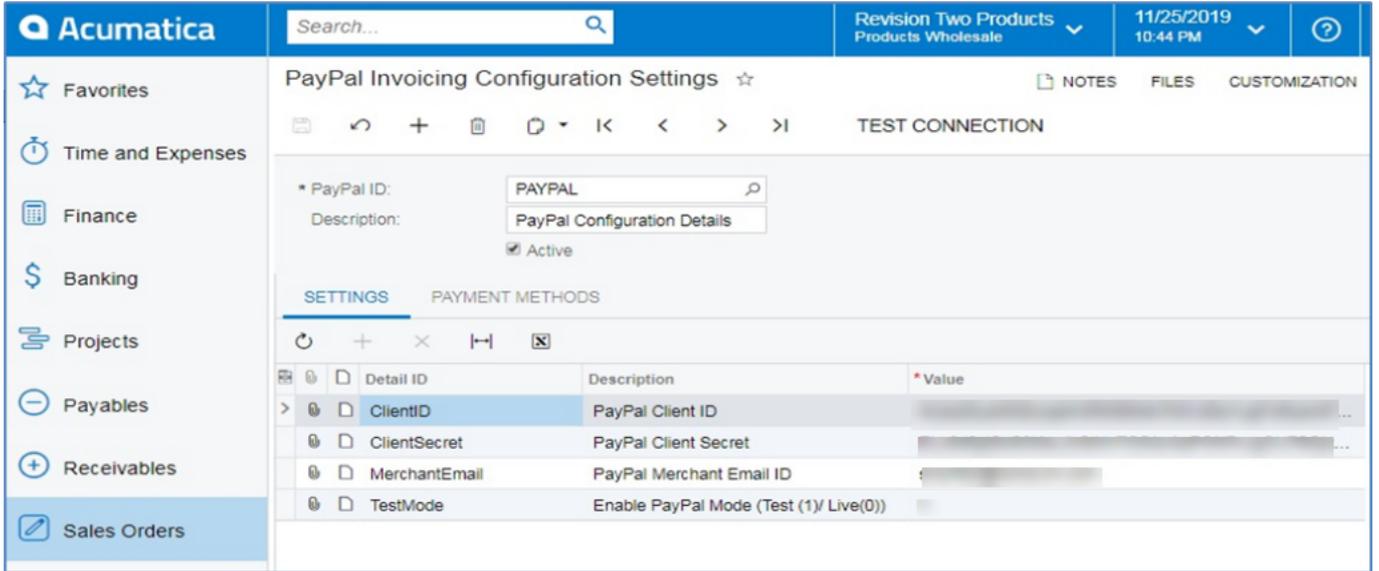

- ✖ • Using your recently generated API credentials, navigate to the Sales Order workspace in Acumatica and click **[PayPal Configuration Settings]**.

The screenshot shows the Acumatica interface for configuring PayPal Invoicing. The left sidebar contains navigation options: Banking, Projects, Payables, Receivables, Customization, Sales Orders (highlighted), Purchases, Inventory, Payroll, and Dashboards. The main content area is titled "PayPal Invoicing Configuration Settings" and includes a "TEST CONNECTION" button. Below this, there are input fields for "PayPal ID:" and "Description:", and an "Active" checkbox. A "SETTINGS" tab is selected, and a table with columns "Detail ID", "Description", and "Value" is visible at the bottom.

PayPal invoicing preferences

- Enter the **[Customer ID]** in the corresponding Value field.
- Enter the customer's secret in the corresponding Value field.
- Enter the merchant's email in the corresponding Value field.
- This is the merchant's email associated with the created account.
- Enter the test mode.

The screenshot shows the Acumatica interface for configuring PayPal Invoicing. The top navigation bar includes the Acumatica logo, a search bar, and system information like 'Revision Two Products Products Wholesale' and the date '11/25/2019 10:44 PM'. The left sidebar lists various modules, with 'Sales Orders' selected. The main content area is titled 'PayPal Invoicing Configuration Settings' and features a 'TEST CONNECTION' button. Below this, there are input fields for 'PayPal ID' (set to 'PAYPAL') and 'Description' (set to 'PayPal Configuration Details'), along with an 'Active' checkbox. A 'SETTINGS' tab is active, displaying a table of configuration details.

Detail ID	Description	* Value
ClientID	PayPal Client ID	[Redacted]
ClientSecret	PayPal Client Secret	[Redacted]
MerchantEmail	PayPal Merchant Email ID	[Redacted]
TestMode	Enable PayPal Mode (Test (1)/ Live(0))	[Redacted]

PayPal Invoicing Configuration Settings

- Click **[Test Connection]** to ensure that the credentials entered are correct and the connection is established.
- A pop-up window will indicate if the connection was successful.
- Now that the connection has been established, you can send **[PayPal invoices]** to customers. The next section describes how to send PayPal invoices in Acumatica.
